

# Procedures

\*

<note>Internally, a procedure in HIS is treated like a service item in mSupply, so many of the same concepts apply - see [Items](#)</note>

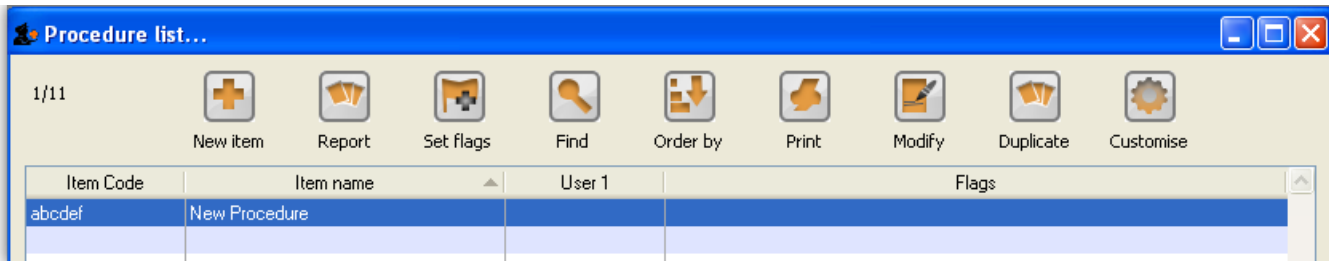

The **Special > Show procedures** menu item allows you to track surgical and other procedures performed on patients. It brings up the following window:

The 'Find procedure...' dialog box contains the following fields and controls:

- Item name:** A dropdown menu.
- starts with:** A dropdown menu.
- and:** A dropdown menu.
- category is:** A dropdown menu with 'Don't Care' selected.
- and:** A dropdown menu.
- department is:** A dropdown menu with 'Don't care' selected.
- Buttons:** 'Complex Find', 'Cancel', and 'Find'.

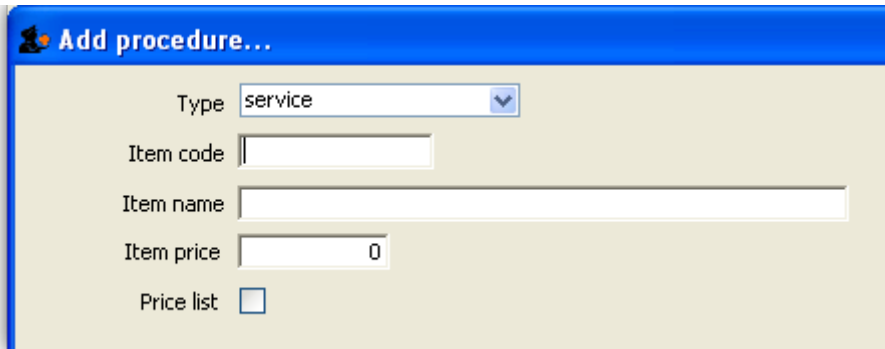

After setting the parameters, and clicking on OK, it will either show the list of procedures:

The 'Procedure list...' window displays a toolbar with icons for 'New item', 'Report', 'Set flags', 'Find', 'Order by', 'Print', 'Modify', 'Duplicate', and 'Customise'. Below the toolbar is a table with the following data:

Item Code	Item name	User 1	Flags
abcdef	New Procedure		

in which case, you can double-click on a procedure to view/edit it or select *New item* to create a new one. Or, if there are no existing procedures, it will go straight to the *Add procedure* window:

The 'Add procedure...' dialog box contains the following fields and controls:

- Type:** A dropdown menu with 'service' selected.
- Item code:** A text input field.
- Item name:** A text input field.
- Item price:** A text input field with '0' entered.
- Price list:** A checkbox.

The type of a procedure is fixed as “service”. As for items, once a procedure has been added, there are extra fields and tabs available. However, only a subset of the normal item fields are available.
