

4.17. Inventory adjustments

Choose **Items > Show inventory adjustments**

Inventory adjustments allow you to increase or decrease the stock of an item that is recorded in mSupply®. You will need to adjust the inventory if:

- Stock is discarded (due to damage or expiry)
- You do a Stocktake and find that physical stock is different to the stock recorded in mSupply®. In this case the first thing to do is to see if you can find out where a mistake may have been made in issuing stock. For example, you may be able to retrieve extra stock mistakenly given to a client, or may need to ask a supplier for an order that has been entered but never actually received.
- Stock has been stolen.
- As a general rule, consider using a regular invoice to account for any transactions with a customer or supplier. Only use an inventory adjustment as a last resort.

If you are doing a “normal” stocktake, it's better to use the stocktake module described [here](#) as it will create the needed inventory adjustments automatically.

Add stock

Choose **Items > Inventory adjust (Add stock)** Use this function when you have performed a stocktake and find that the physical stock of an item or items exceeds the amount recorded in mSupply®.

Inventory adjust - add stock

Name	inventory adjust- add stock	Confirm date :	30/00/00	Colour	Black
Their ref		Period	30/11/2017 - 31/12/2...	Invoice number :	190
Comment		Category	None	Entry date :	12/05/2020
				Status :	nw
				Goods received ID :	0
				Purchase Order ID :	0
				Requisition ID :	0
				Entered by :	sussol
				Store :	General Warehouse

General Summary by Item Summary by Batch Log

L...	Lo..	Item code	Item Name	Qty	Pack	Batch	Expiry	Cost Price	Sell Price	Price extension	Adjustment reason
1		DORAAM05...	AMO-VICLIN, 500mg, blister, tab.	4	100	qwertyf1...	31/07/2024	2.10	2.10	8.40	

Other charges

Item(s) :		Subtotal	8.40
Amount:	0.00	0 % tax:	0.00
		Total	8.40

Hold Export batch: 0 Margin: 0.00

OK & Next Delete OK

A transaction that is like a supplier invoice will be created. Enter the details in just the same way you would as if you were receiving goods from a supplier, except that mSupply® fills in the **Name** field for you automatically, and does not allow you to edit it.

After a stocktake, this can be used to adjust any stock lines where the stock recorded in mSupply® is less than the physical stock.

You will be asked to enter the margin when starting this transaction. For a normal inventory adjustment, set this to zero. If you are using this procedure to enter stock when starting to use mSupply® for the first time, enter the percentage to apply here.

Reduce stock

Use this function when you have done a stocktake and find that the physical stock of an item or items is less than the amount recorded in mSupply®. A transaction that is just like a customer invoice will be created, except that you do not choose the customer. The section on entering customer invoices describes the entry procedure. See the section on Issuing goods - Customer invoices [here](#)

[illegible]

Inventory adjustments are treated by mSupply as a kind of Supplier invoice (or credit). To view or edit an inventory adjustment, Choose the “Show inventory adjustments” option from the “Item” menu.
