#### Updated: Version 4.02

#### NeedsUpdate

# **6.04.** Ordering from one store to another

If you run mSupply using virtual stores then you can place an order for goods with another store within mSupply.

There are two ways you can do this:

- Create Purchase Orders.
- In versions of mSupply newer than v4.01, Internal Orders are the desktop equivalent of supplier requisitions in mSupply mobile. If you're already using purchase orders and goods received records in your workflow, this is a simpler and easier way to place orders in another store:
  - 1. In the requesting store:
    - 1. Create an Internal Order to the supplying store.
    - 2. When the internal order is finalised, a response requisition is automatically created in the supplying store
  - 2. In the supplying store:
    - 1. One or more customer invoices can be created from a single response requisition
    - 2. When each customer invoice is finalised, a supplier invoice is automatically created in the requesting store

# **Internal Orders**

Internal Orders are also known as supplier requisitions or request requisitions.

#### Entering an internal order

To begin the process, choose *Supplier* > *Show internal orders* or click on the *Internal orders* icon on the *Suppliers* tab of the Navigator:

Last update: 2021/04/28 purchasing:ordering\_from\_one\_store\_to\_another https://docs.msupply.org.nz/purchasing:ordering\_from\_one\_store\_to\_another?rev=1619601647 09:20

The following window will open, showing you a list of all historic internal orders. Click on the *Show* drop down list to filter the list by the status of the internal orders.

New internal Delete				Show: All
D Name	Date entered	Order date	Status	Comment
1609 Central Medical Stores	03/02/2022	03/02/2022	sg	
		_		

Either double-click on an existing order to edit it, or click the **New internal order** button to create a new one.

If you have activated programs in mSupply see the *Programs* heading below

#### The example below has a few lines already entered:

	Central Medical Stores	CMS		Referen			<u>F</u> c		Black		13852

e Sort order										K & Next	

- The *Name* will default to the supplying store for the current store, but any other store in the data file can be selected in the usual way (i.e. enter the first few characters and hit the *Tab* key to find matches).
- The Order date defaults to the current date. You can change it.
- Use either the **New line** button to manually add a single item, or **Add from master list** to add any items in the current store's master list which are not there already.
  - If adding from a master list, the cursor will go into the first new item's *User requested quantity* cell.
  - If adding a single item, the cursor will go into the *User requested quantity* cell for that item.

Li Item code	item name	Unit	Our stock on hand	Average monthly consump	Months of stock	Calculated quantity	User requested quantity	Comment	
1 NC0071	Amoxycillin 250mg tabs	ea	43,962	17,651	2	8,993	9,000		
2 NC0082	Paracetamol 500mg tabs	63	27,328		2		1,000		
7 NC0010	ORS sachet (Littre)	64	5,740	1,124	5	0	500		
c.									3
									3

Note that, while a filter is active, some of the other buttons are disabled e.g. you can't save the sort order unless all lines are visible.

You can also filter item lines which have a lot of stock (and therefore don't need to be ordered) by entering a value in the *Threshold MOS* field. This will automatically tick the *Hide stock over threshold* checkbox, and hide any lines which have their *Months of stock* greater than or equal to *Threshold MOS*.

Last update: 2021/04/28 purchasing:ordering\_from\_one\_store\_to\_another https://docs.msupply.org.nz/purchasing:ordering\_from\_one\_store\_to\_another?rev=1619601647 09:20

¢										
E Sort order								- finalise	Cancel O	E&:Next OE

When the order is then saved, it will automatically generate a corresponding response requisition in the supplying store. From there, one or more customer invoices can be raised in the supplying store which, when finalised, appear as supplier invoices back in the requesting store in the same way as regular stock transfers.

#### Programs

See the 4.05. Programs page for information on setting up programs.

Using programs activates a comprehensive system for managing orders and supplies by program. When you click on the **New internal order button**, before the order window opens, another window appears to allow you to select the program and period etc. that the order belongs to:

	New internal order
Order type	
	Program O General 🔿
Order details	
Program	CONSOMMABLES DE SERVI
Requisition type	Commande Urgente ou Exc
Supplier	NPSP AGENCE D'ABIDJAN
Period	17 SEPT /23 OCT. 2019
	Start date 17/9/19
	End date 23/10/19
	Cancel

- **Order type:** Selecting *General* will create a standard, non-program based requisition and none of the Order details section fields will apply. Selecting *Program* will create a program based requisition and you must fill in the details in the **Order details** section.
- Order details section
  - **Program:** The program this requisition belongs to. Select one of the programs you have defined and assigned to this store.
  - Requisition type: Select one of the types of order you have defined for this program. Normal orders will follow the quantification rules and be limited in the number of orders per period. Emergency orders will not follow quantification rules and will not be limited in the numbers of orders per period but will typically be limited in the numbers of lines that can be entered on them.
  - **Supplier:** The supplying store for this store will be selected by default. Other stores can be seleted if required.
  - **Period:** The period this requisition is for. Will contain a list of all the periods which are still available for you to enter a requisition for i.e. those for which you have not already entered the maximum number of requisitions.

When you click on the **OK** button on this window, the requisition is created for you. The items defined for the program are automatically added to it and the suggested order quantity is calculated for you following the quantification rules.

Note that items belonging to the program will only be added to the order if they are also visible in the supplying store. This is to avoid the situation where you request an item that they don't have visible to them and therefore can never have any stock to supply!

# **Purchase orders**

- This method of ordering stock from another mSupply store is deprecated: Internal Orders (above) is the way to do it.
- Purchase orders are used for Ordering stock from suppliers outside of mSupply

### Using a purchase order to order from another store

For the most part, the process is the same as for creating a normal purchase order. There are, however, a few significant differences:

• In the *Name* field of the purchase order, enter the name of the store which will supply your goods.

The names of suppliers which are stores will appear in *RED* in the choice list of suppliers. If the name of the store you select as a supplier is *BLACK*, then you have not chosen another store as a supplier (you will be creating a standard purchase order not an internal requisition), and the instructions in the remainder of this section do not apply.

• The *Internal requisition* label will appear after the name to indicate that this is going to be an internal requisition.

🗶 Nev	v Purchase	order

	1	EFV600	Efavirenz tablet 600mg	20	1	20	0	-				18/04/2011		
	2	Formraw	Formaldehyde solution 20% 5	L 150	5	150	0	1799	0	0	0.00	18/04/2011	General	
	< 1													2
		Supplier d Percenta		smount	0.0	00				Estin	Estimate	ed subtotal er discount	-	.000
		Locked	Auto calc usage	Einal	ze orde	r 🗆 I	rint long der	scription	Print m	y signature				
									0	OK 8.Next		Delete	ОК	

Once confirmed, it will no longer be possible to:

- modify the purchase order lines, except for updating the expected data of delivery (EDD).
- delete the purchase order or any of its lines (mSupply will give you a warning if you try).

# Processing the order (supplying store)

For versions of mSupply newer than v4.01, confirming the purchase order will create a response requisition in the supplying store (with your store's name in the *Name* field). This allows the supplying store to create multiple customer invoices to supply the order (and hence to better handle partially fulfilled orders). Once each customer invoice has been **finalised**, a goods received note for the purchase order will be created back in the store where you created the purchase order which started this whole process off (called the customer or receiving store).

### Handling partially fulfilled orders

If you have unfilled lines on the customer invoice (i.e. red placeholder lines), when you finalise the customer invoice you will be asked if you want to create a new invoice with the unfilled lines. This new invoice retains the link to the purchase order that created the original customer invoice, and can be used to issue further goods to the customer.

Note that you can also create another invoice that is linked to the original purchase order at any time by using the "Duplicate" button on the toolbar of the customer invoice list.

## Receiving the goods (requesting store)

Now, back in your store, where you created the purchase order which started this whole process off, you can view the goods received record via the **Suppliers** tab on the Navigator or via the **File > Supplier > Show goods received** menu item (or via the **File > Supplier > Show purchase** orders > Goods received tab)

🏚 Edit Purchase								_	×

Notice that on the goods received note the lines from the customer invoice will have been filled in automatically. Process the goods received note in the normal way and note that, as with all other goods received, the goods are not added to your store's stock and available for issue until the goods received note has been finalised and the resulting supplier invoice confirmed. Note that, from mSupply v3.85, the original purchase order lines will only be updated with the stock received when the goods received note has been finalised.
