13.05. Requisition reports

You can report on requisitions in 2 ways:

- grouped by item, showing which customers the item was requisitioned by, what has been sent and what is outstanding or
- grouped by customer, showing which items a customer has requisitioned, what has been sent and what is outstanding.

You can access the reports from the *Reports* > *Requisitions* menu option of by clicking on the *Requisitions* option on the Reports tab of the navigator:

C C mSupply navigator											
Customer 2	Suppliers Item	Reports Sp	ecial Admin								
Stock and items Show total stock value	Management	Transactions	Others								
Current stock	ABC analysis Management summary	Transactions Purchase orders	Transport report								
Graph: total stock	Backorder report	Requisitions	Update price list								
litem List	Custom report	Debit/credit	Price list								
Item slow movers	Expiring Expiring items	Debtors	 Item ledger Users report Suggest order quantities 								
Location report	Expiring items	Customer statements	Suggest order quantities								
			-								
 Data File: mSupply405.4dd General user 1 (pass= user1) 	mSı	pply									

Whichever way you choose, the requisition report options filter is displayed:

	Requisition Report options
Report type	Grouped By Item

Entry date is fro	m 01/09/19 🛄 To 19/09/2019 🤃 This month 🗢
Include requisiti	ions with these statuses: 🗸 Suggested (sg)
	Confirmed (cn)
	Finalised (fn)
Include line	es that have been fully supplied
Item filter	
Item code	🗯 starts with 🔹
and	Category 1 😳 is
and	VEN Category Don't Care
and	 Department is Don't Care
Requisition cust	omer filter
Name	Contains C
and ᅌ	Category 1 is
and 🔇	Category 1 😋 is
and	Customer group is Don't Care
	Cancel

Use the **Report type** drop down list to select which type of report you would like: *Grouped by item*, *Grouped by Item* (*Pivot table/Excel friendly*) or *Grouped by customer*.

The **Requisition filter** settings enable you to select which requisitions you want to include in the reports, based on their entry date (this month so far is set by default but note the quick date selection drop down list and the date pickers to enable quick selection of reporting dates) or status.

If you leave the **Include lines that have been fully supplied** checkbox unchecked, the report will only include lines where not all the stock requested has been sent to the customer i.e. outstanding requisition lines only. If you check the checkbox, all requisition lines will be included in the report.

The **Item filter** section allows you to select which items will appear in the report (only requisition lines for items matching these filters will be included in the report. If you don't set any of these, there will be no filtering by item.

Finally, the **Requisition customer filter** section allows you to select the customers whose requisitions will be included in the report. If you don't set anything in this section, requisitions for all customers will be included in the report.

Example output

These are examples of what the requisition reports like like:

Grouped by item

		Requisitions grouped by item for requisitions entered from "From date" to "To date"									
				Requisition		_	Requisition	Their stock on	Quantity	Quantity already	To be
item name	Our stock on hand			comment	Status	Туре	Date	hand	requested	issued	Supplied
ALBENDAZOLE, 200mg, tab	5000	1234	CPI	R234	sg	request	10/11/17	0	500	100	400
		1235	Metta	R296	1g	request	11/11/17	1	22	4	18
		1236	DRC-Mindat	R245	sg	request	04/12/17	20	750	70	680 150
		1237	DRC-Madupi	R233	sg	request	12/12/17	15	600	450	150
