

18.10. Supplier instructions for submitting tender responses via Excel

Introduction to the tender response template

As a supplier, you may be invited to participate in a tender managed using mSupply. The client may send you a tender response template Excel document in xlsx format, which you are expected to complete and submit for evaluation. This allows the client to import bid responses from multiple suppliers, and easily compare them within the mSupply Tender Module.

You must use Microsoft Excel 2016 or newer to view and edit the tender template.

The tender template will look like this. You can also download a reference template from [here](#):

supplier_tender_reference_template.xlsx

The **yellow** section contains the item that you may bid for. **Do not modify any contents of the yellow section.**

The **blue** section is where you can enter the price for the items you wish to bid on.

TenderItems ManufacturerList CurrencyList											

The Excel template contains three worksheets. **Do not modify the name of the worksheets.**

- **TenderItems:** Main worksheet containing the tender items, as shown above.
- **ManufacturerList:** Contains the manufacturers that populate the [manufacturer dropdown list](#) in the main worksheet. If a new manufacturer is required, add it directly in the TenderItems worksheet.
- **CurrencyList:** Contains the available currencies that populate the [currency dropdown list](#) in the main worksheet. If a new currency is required, add it directly in the TenderItems worksheet.

The currency and the manufacturer column should appear as a [dropdown list](#). If this doesn't work, please make sure you are using Microsoft Excel and that the version supports xlsx file format.

Do not change the cell format. If the cell is set to text or number, then it must be left as it is. Changing the cell to a different format will cause issues later with information potentially being lost.

The Excel file has the header row frozen, allowing you to scroll down the list and enter data while still being able to view the corresponding header.
