

24.04. Schedules and periods

Schedules and periods

Schedules are regular timeframes (e.g. monthly, fortnightly) that may be used for cyclical operations, such as program orders (special types of requisitions). There is no limit to the number of schedules.

Periods are specific timeframes which exist *within* schedules. Periods have a distinct start and end date. They must be sequential and must not have any overlapping dates or gaps between periods.

Permission to add/edit schedules and periods

In a [sync system](#), schedules and periods must be added on the **central server** and will then sync to other sites. Permission must be switched on for a user to add/edit schedules and periods.

1. Go to **Admin > Edit Users** > double click the user to be edited > **Permissions**.
2. In the Admin section, check the **Edit periods and period schedules** box.
3. Click **OK**.

Using Schedules in Programs

The most common use of schedules is for setting up programs for supplying different facilities on different schedules. You can read more about using programs [here](#)
