*

The Help Menu

You can click the blue arrows icon to retrieve the current version number from the internet. (This will not download a new version- it will only advise whether a newer version is available for download).

Authorisation

The Authorisation button is provided largely for developers' use. Its purpose is to assist our technical staff to resolve clients' problems. It is recommended that you ignore it.

Updating mSupply

For single user versions of mSupply, you can see if you have the latest version by choosing Special > **Check for updates**

Choosing this item from the Special menu will connect to the mSupply web site and compare your current mSupply version with the version you are now using.
