# 12.02. Adding barcodes to items

1/5

#### Added: Version 4.01

Assigning barcodes to items is an important setup activity. It is this step that enables mSupply to recognise which item a particular barcode belongs to.

You can add barcodes to items before or during the goods receipt process. The process described here is used for both - to see how the goods receipt process fits in, see Barcode scanning and receiving goods.

To start the process, view the details page of the item you want to add barcodes to (go to Item > Show items..., click on the OK button, double-click on the item you want in the list). Then click on the Barcodes tab on the left hand side of the details window:

ral	🖬 Item name	test item 01		Store: General	
Misc Usage Stock Ledger Quotes Backorders Notes Reconcile Bill of materials	General	None	Default sell price of prefer	Default margin 0 rice of preferred packsize 0.00 rice editable when issuing	
Purchase Orders Order options Dispensing Reporting Log Requisitions Stores Barcodes		None ~	VEN Category Not assigned Vital Essential Necessary	Stock category Normal stock Critical stock On essential drug list Custom fields user_field_1 user_field_2	
	Shelf locations Shelf location Bulk shelf location Preferred pack size Volume per pack Restricted to :	Vone Outer pack v 1 Weight per 0 m3	olume 0 m3	user_field_3 user_field_5 0.00 user_field_6 user_field_4 user_field_7	

This will show you a list of the current barcodes assigned to the item:

Add     Delete       otes     Number     Manufacturer     Pack size     Barcode     Parent       il of materials     Manufacturer     Pack size     Barcode     Parent       urchase Orders     I     Image: Control of		Long heaton

		Number	Number     Manufacturer       Image: I	Number     Manufacturer     Pack size       Image: State	Number     Manufacturer     Pack size     Barcode       Image: Second	Number         Manufacturer         Pack size         Barcode         Parent           Image: Image

This item currently has no barcodes assigned to it but this is the information each column displays:

- Number: a sequential number for each barcode, starting at 1
- **Manufacturer**: the name of the manufacturer of the medicine
- **Pack size**: the number of individual items (tablets, bottles etc.) in the pack this barcode represents
- **Barcode**: the human readable form of the barcode, just the type identifier and the 14 digit GTIN. An identifier of 01 indicates a global GS1 barcode, an identifier of 04x identifies an internal mSupply barcode (assigned because the manufacturer didn't put one on the item's packaging
- **Parent**: the number (shown in the Number column) of the barcode that is the parent (i.e. has the next largest pack size) of this barcode

#### **Deleting a barcode**

To delete a barcode, click on it in the table to select it and click on the *Delete* button. You will be asked to confirm the deletion. But please note, you will not be able to delete any barcode that has been assigned to a line of stock.

## Editing a barcode

To edit a barcode, simply double-click it in the table. This will open the 'add a barcode' window shown in the *Adding a barcode* section below but the window will be populated with the barcode's details. Simply edit the details as described in the *Adding a barcode* section. Please note that, if a barcode has already been assigned to stock, you will not be able to edit the pack size or the barcode itself.

### Adding a barcode

1 New Barcode...  $\times$ testi03 Item Test item 03 Barcode S Pack size Manufacturer Barcode for next outer-level packaging Manufacturer Barcode Select Pack size OK & Next Cancel OK

To add a barcode to the item, click on the *Add* button. This window appears:

Item: this is the name of the item you're adding a barcode to, followed by its code. It is non-editable

**Barcode**: the human-readable form of the barcode; the 2 or 3 digit type identifier followed by the 14 digit GTIN only. You can't type anything in here, you have two options:

• Scan the item's barcode with a barcode scanner - the barcode's identifier and GTIN will appear in the textbox. If the barcode is not GS1 compliant you will see a warning message and you will not be able to save the barcode (just in case you've scanned the wrong thing. Why would

anyone go wild with a scanner and start scanning anything they can find?

• Click on the sicon next to the Barcode field to have mSupply supply its own unique, internal GS1 compliant barcode. Each time you click on the icon, mSupply will supply a new barcode.

Pack size: the pack size (number of individual items in one pack) that this barcode belongs to

**Manufacturer**: the manufacturer that this barcode belongs to. Type the first few characters of the manufacturer's name and press the Tab key to select it from a list of matching names. If the manufacturer you want doesn't exist in mSupply, click on the 🗈 button next to the manufacturer field

Last update: 2019/10/25 barcode\_scanning:adding\_barcodes\_to\_items https://docs.msupply.org.nz/barcode\_scanning:adding\_barcodes\_to\_items?rev=1572034366 20:12

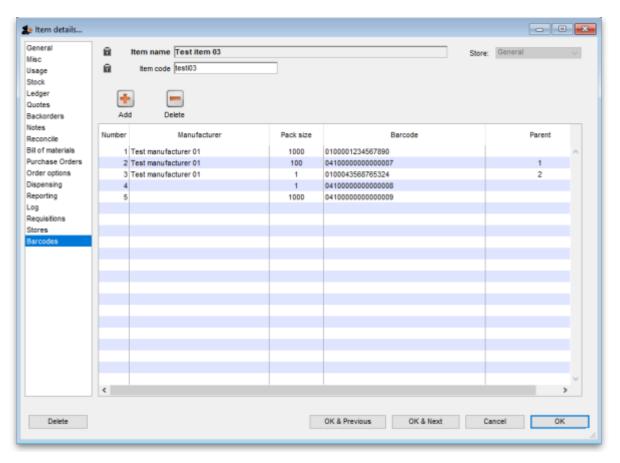

to add it.

**Barcode for next outer-level packaging table**: this is where you select the barcode that is the 'parent' of this one i.e. the one with the next biggest pack size. Selecting one is optional but it allows mSupply to identify barcodes that should go on tertiary level packaging (they can have different printing requirements). The table will show all the other barcodes entered for this item. To select the parent, simply click on the checkbox in the *Select* column to check it.

GS1 barcodes are unique to the combination of item, pack size and manufacturer. So you won't be able to add 2 barcodes to the same item with the same pack size and manufacturer.

#### Here is an example of an item with several barcodes added:
