

15.08. Barcode scanning with handheld computers

Added: Version 8.00

It is possible to use a handheld computer barcode scanner with mSupply. This gives you greater flexibility as you are not tethered to a device running mSupply. A handheld computer barcode scanner looks like this:

Currently mSupply is compatible with Honeywell handheld computer barcode scanners like the CK65 shown in the image above.

Requirements

1. The scanner must be able to connect to the mSupply server used in the warehouse. This is usually achieved WiFi must be available in the warehouse wherever you want to use the scanner. This WiFi must be on the same LAN as the
