

## 14.03. Barcode scanning and receiving goods

Added: Version 4.01

When you receive goods into mSupply, that is when you tell mSupply about the barcode that belongs to each line of stock. At the moment it is not possible to receive stock using a barcode scanner (the functionality is coming soon though - watch this space) but this is still the point in your process where you tell mSupply about the barcode that belongs to each line of stock.

This is a vitally important step: once the barcode associated with the stock you receive is recorded, mSupply can recognise it anywhere when you scan it later.

The linking of barcodes with received stock is carried out on a supplier invoice.

Create a supplier invoice in the normal way (either manually (see [Receiving goods - a supplier invoice](#) or by finalising a goods received note (see [Goods receipt notes](#))). If the *We use barcode scanners* preference is turned on (see [Barcode scanning preferences](#)), this is what a blank supplier invoice window looks like:

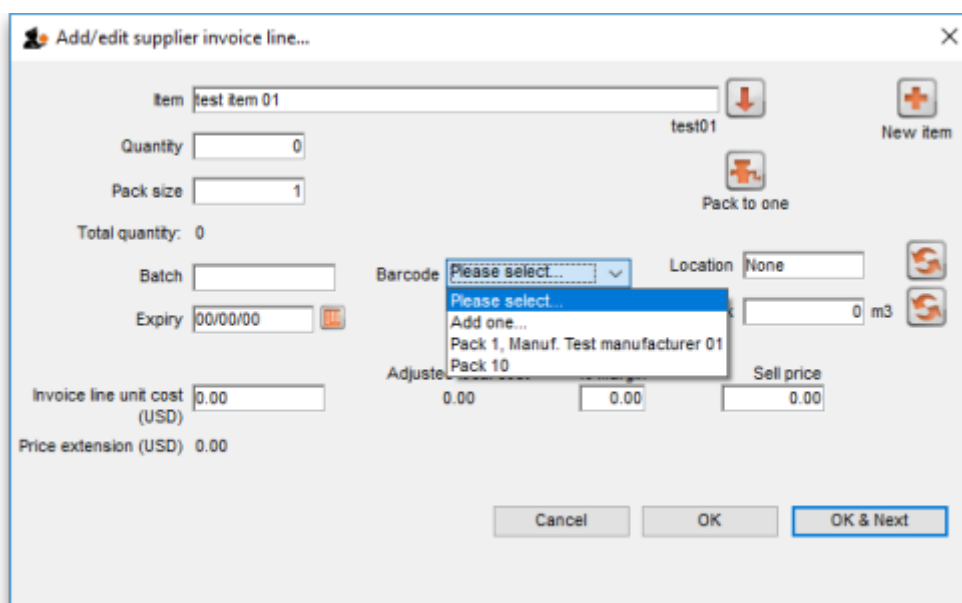

The screenshot shows the 'Supplier invoice' window in mSupply. The window title is 'Supplier invoice'. It contains several input fields and buttons. The 'Print barcode labels' button is highlighted with a red box. Below the main form is a table with columns: L..., Lo..., Item Name, Qty, Pack, Batch, Expiry, Cost Price, Sell Price, and Price extension. At the bottom of the window, there are 'Other charges' fields for 'Item(s)' and 'Amount' (0.00), and a summary section with 'Subtotal: 0.00', '0% tax: 0.00', and 'Total: 0.00'. There are also checkboxes for 'Hold' and 'Finalise', and buttons for 'OK & Next', 'Delete', and 'OK'.

It is exactly the same as a standard supplier invoice, except for an additional *Print barcode labels* button (see [Barcode label printing](#) for details)

Clicking on the *Add line* button shows an extra *Barcode* field on the invoice line window:

When the item has been selected in the usual way, the *Barcode* drop down list is filled with a list of all the barcodes assigned to the item, showing the pack size and manufacturer for each:

If one of the barcodes matches the stock that is being received, select it: this will set the *Pack size* field to match the pack size that belongs to the barcode. You can still manually edit the *Pack size* field but if it doesn't match the barcode you have selected when you click on the *OK* or *OK & Next* buttons, you will be warned and told to correct it (either select another barcode with a matching pack size or alter the pack size).

If none of the barcodes in the drop down list match the one on the stock, you can click on the *Add one...* option. This will immediately open the *Add barcode* window so you can add the new barcode. See [Adding barcodes to items](#) for details.

When you are using barcode scanning, you must select a barcode from the *Barcode* drop down list, you will not be allowed to add the line without it.
