1/4

In mSupply the settings for label printer are set in the "Choose label printing preferences window", which you open via the mSupply menu bar: Special > Printing preferences

00		Choose label	printing	preferen	ces			
New Printer Delete Printer) nter							
Description / location	Connection Type	IP Address	Port	Label width	Label height	Top margin	Left margin	Default Pri
Serial label printer	Serial		1	74	35	2	2	
Network_10.1.1.99	Network	10.1.1.99	9100	74	35	2	2	

This window will show you **ALL** mSupply printers that have been set up for your whole organisation. Your mSupply printer descriptions must include your site name and make sure that you **do not** delete printers for other sites!!!

Changing your mSupply default printer

To change the mSupply default printer in the "Choose label printing preferences window" simply click the checkbox in the right-hand **Default Printer** column for the printer you wish to use.

Note this is different from your Windows default printer. You are setting the default printer for mSupply to use (the default printer you have set for Windows can be another printer altogether).

The mSupply printing preferences are stored for the **computer** you're setting it from (not the mSupply user or the mSupply site you're logged in to). When you change the mSupply default printer you are changing it for everyone who uses the computer.

Editing a printer

In the "Choose label printing preferences" window double-click the printer entry in the list. This will open the "Add label printing preferences" window - see below for info on each setting.

Adding a printer

If you are setting up up your label printer hardware for the first time, you will first need to follow the instructions here: 25.18. Label printer hardware setup. When your printer hardware is connected and ready to be set up in mSupply open the "Choose label printing preferences" window and click the New Printer button. This will open the "Add label printing

The printer preference settings

preferences" window - see below for info on each setting.

Description:

e.g. Busby Pharmacy GK420t Since mSupply printing preferences window lists **ALL** the mSupply printers for your organisation it's important that the Description includes the site name to avoid confusion.

Add label printing prefe	rences
Description Connection type Network Port number 9100 Connection settings see the below for the settings under each connection type Make this printer default	Label Type One-Part C Label settings see below for the settings under each label type
Reset printer	Cancel OK

Connection Type:

If printer connected with a network cable (recommended) choose **network** If printer connected with USB choose **USB** If printer connected with a serial cable choose **serial**

Label Type:

One-Part Three-Part

Make this printer default:

Checking this box means that mSupply on this computer will always print to this printer. <u>Important</u> the default printer is set is "per computer" - if you move to a different computer it will need to be set there too.

Reset printer

You can use this button to send a command to the printer to reset it. Occasionally a printer may misbehave if it's memory is corrupted by an electricity spike or the like, and this button may help. If your printer is not behaving we recommend you contact Sustainable Solutions support@msupply.org.nz rather than charging ahead on your own.

Printer connection type settings

<u>Network</u>	
Connection type Network	
Port number 9100	
Address	
_	Port number
For network connections this will usually be 9100	
Address	
The IP address of the printer
