# 10.08. Label printing preferences

In mSupply the settings for label printer are set in the "Choose label printing preferences window", which you open via the mSupply menu bar: Special > Printing preferences

This window will show you **ALL** mSupply printers that have been set up for your whole organisation. Your mSupply printer descriptions must include your site name and make sure that you **do not delete printers for other sites!!!** 

### Changing your mSupply default printer

To change the mSupply default printer in the "Choose label printing preferences window" simply click the checkbox in the right-hand **Default Printer** column for the printer you wish to use.

Note this is different from your Windows default printer. You are setting the default printer for mSupply to use (the default printer you have set for Windows can be another printer altogether).

The mSupply printing preferences are stored for the **computer** you're setting it from (not the mSupply user or the mSupply site you're logged in to). When you change the mSupply default printer you are changing it for everyone who uses the computer.

### **Editing a printer**

In the "Choose label printing preferences" window double-click the printer entry in the list. This will open the "Add label printing preferences" window - see below for info on each setting.

# Adding a printer

If you are setting up up your label printer hardware for the first time, you will first need to follow the instructions here: **25.18. Label printer hardware setup**.

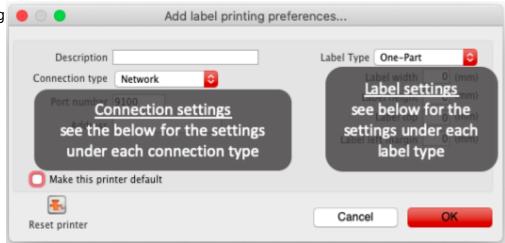

When your printer hardware is connected and ready to be set up in mSupply open the "Choose label printing preferences" window and click the **New Printer** button. This will open the "Add label printing preferences" window - see below for info on each setting.

# The printer preference settings

#### **Description**

Since the mSupply printing preferences window lists **ALL** the mSupply printers for your organisation it is vital that the Description includes the site name to avoid confusion.

e.g. <u>Busby Pharmacy</u>

#### **Connection Type**

If printer connected with a network cable (recommended) choose **network**If printer connected with USB choose **USB**If printer connected with a serial cable choose **serial**See below for the printer connection settings for each type of connection

#### **Label Type**

One-Part

GK420t

Three-Part See below for the printer connection settings for each type of connection

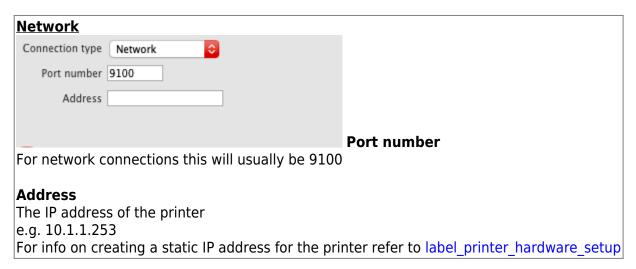

#### Make this printer default

Checking this box means that mSupply on this computer will always print to this printer. Refer to the Changing your mSupply default printer section above to find out what setting a default mSupply printer does.

#### Reset printer

You can use this button to send a command to the printer to reset it. Occasionally a printer may misbehave if it's memory is corrupted by an electricity spike or the like, and this button may help. If your printer is not behaving we recommend you contact Sustainable Solutions <a href="mailto:support@msupply.org.nz">support@msupply.org.nz</a> rather than charging ahead on your own.

## **Printer connection settings**

USB	
Connection type	USB
Address	
Enter the Win	dows name of the printer. It must be

**Address** 

Enter the Windows name of the printer. It must be entered **exactly**. There is no need for the Windows printer name to match the mSupply printer description.

To confirm the Windows printer name go to the Windows Control Panel > Printers and Scanners. Right click on the printer and select properties.

The Windows printer name is recorded on the General tab.

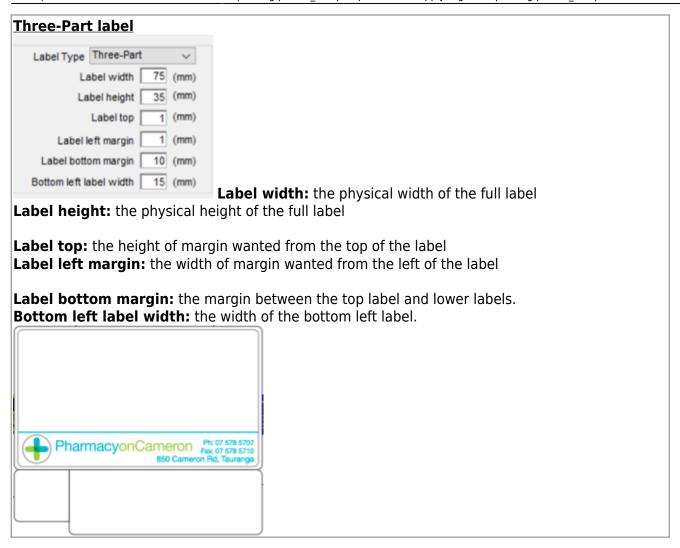

Enter the Windows serial port number for the printer.

To confirm the port number go to the Windows Control Panel > Printers and Scanners. Right click on the printer and select properties.

The Windows port number is recorded on the Ports tab.

### **Printer label settings**

One-Part label				
Label Type One-Part	•			
Label width 74	(mm)			
Label height 35	(mm)			
Label top 2	(mm)			
Label left margin 2	(mm)			
		<b>Label width:</b> the physical width of the full label		
Label height: the physical height of the full label				
<b>Label top:</b> the height of margin wanted from the top of the label <b>Label left margin:</b> the width of margin wanted from the left of the label				

# **Other settings**

There are other general preferences that can affect the way your labels are printed. See the 15.01. General preferences page (label printing section) for details.
