

How to remove stock lines that have '0' available

Occasionally users will come across stock lines in mSupply that cannot be removed easily. It almost like you have stock but you cannot carry our stock take or inventory adjustment to reduce the stock level to zero.

Below are two examples :

Above we have Paracetamol 500mg where for the highlighted batch (red square) we have a total of 100 but available is 0. This means that 100 in stock but all of this has be reserved for a customer.

Below is another example :

For Amoxicillin 250mg we have 92 in total and 42 available. This means that we have $92 - 42 = 50$ reserved for customers.

Handling reserved stock

Customer invoices that are of status "nw" or "sg" will end up reserving stock. This theoretically means that you have the stock but it cannot be used as it has been reserved by the invoices.

You as a manager will be required to view the "nw" and "sg" invoices and decide if they are still valid or not. If the invoices are valid then you should **"confirm"** them if not they can be deleted.

So search for customer or prescription that are of "nw" status. Follow the image below. Do customer > Show invoices... or patient > Show Prescriptions...

The screenshot shows a 'Find transaction...' dialog box. At the top, there is a dropdown menu set to 'customer invoices'. Below it is a text input field containing '15' followed by the text 'most recent transactions, or:'. A red rectangular box highlights the search criteria section, which contains three dropdown menus: 'status', 'equals', and 'nw'. At the bottom of the dialog, there are three buttons: 'Complex Find', 'Cancel', and 'Find'.

Search for "Status" equal to "nw" as above. If the "nw" invoices exist, then you will be shown a list. Double click to review. Delete if the invoice is not valid otherwise **"Confirm"**.

 "nw" invoices will exist in the database if you have suffered un-expected hardware or network communication failure.

Now repeat similar for "sg" type invoices :

The screenshot shows a 'Find transaction...' dialog box. At the top, there is a dropdown menu set to 'customer invoices'. Below it is a text input field containing '15' followed by the text 'most recent transactions, or:'. A red rectangular box highlights the search criteria section, which contains three dropdown menus: 'status', 'equals', and 'sg'. Below the search criteria is a checkbox labeled 'Use list view if one entry found'. At the bottom of the dialog, there are three buttons: 'Complex Find', 'Cancel', and 'Find'.

 "sg" invoices are part of the warehouse functions. You may have simply forgotten about these invoice or the customer lost interest in the order.

Your search for "nw" or "sg" invoice may result is the list below.

Types	Name	Type	St...	Entered	Confirmed	Invnum	Total	Their ref	PS printed dt.	Comment	Exp btch

	NUR	nts	ci	sg	15/01/2017		149248	0			0
	NUR	nts	ci	sg	01/02/2017		150145	37.8			0

Note the highlighted "Status" column

Your job is now to review each invoice and to either "confirm" them or to delete them. These invoices may no longer be valid, you have to decide on this.

Confirming a invoice

Just incase, if you don't know this, then this is how you confirm the invoice.

Note the status detail. We want this to show "cn" and not "nw" or "sg" Hit the "confirm" truck.

For prescription, you won't see the "confirm" truck, simply review and click "OK" to close the prescription and mSupply will automatically confirm. For prescription, you will be facing "nw" invoices.

The Result

Once all the "sg" and "nw" invoices are processed, then your stock figures should update and they shouldn't be any stock that has been held as reserve.

Below the images should speak for themselves. Please compare the image below with the ones above at the start of this topic.
