

## 20.09. HIS preferences

**Organisation name:** Enter the hospital name here.

**Country:** Enter the country you are located in.

**Max picture size:** Enter the maximum size of patient pictures that can be inserted. We suggest you set this value to 500KB.

**Maximum number of users:** Enter the maximum number of users that can log into the HIS system at one time. For example, if you purchase a 10 user licence, and assign 6 users to the HIS system, it will allow 4 users to log in to the pharmacy (mSupply) module.

The screenshot shows a standard macOS-style dialog box titled "HIS Preferences". It contains four text input fields arranged vertically on the left side. The first field is labeled "Organization Name", the second "Country", the third "Max picture size" (with "0" entered and "KB" to its right), and the fourth "Max number of users". At the bottom right of the dialog are two buttons: "Cancel" and "OK".
