

# Importing prescribers

\*

<note> Applicable in Dispensary mode only</note>

From the *File* menu, choose *Import Prescribers*, and the *Import alert* window is displayed.

You may import a list of prescribers who have the authority to prescribe medicines.

Your list should be in the format of a 6-column spreadsheet, saved as a tab delimited file. The columns should be in the following order: <HTML>

</HTML>

| Column 1 | Unique code for each prescriber                |
|----------|--|
| Column 2 | Last name                                      |
| Column 3 | First name                                     |
| Column 4 | Initials - these will appear on patient labels |
| Column 5 | Registration code                              |
| Column 6 | Category                                       |

<HTML>

</HTML>

Your tab delimited spreadsheet file would appear something like this:

|   | A           | B                | C                 | D               | E                   | F               |
