

4.18. Inventory adjustments

Inventory adjustments allow you to increase or decrease the stock of an item that is recorded in mSupply®. You will need to adjust the inventory if:

- Stock is discarded (due to damage or expiry)
- Stock has been stolen.
- You find some stock on the shelf that is not in mSupply and you don't know where it came from.

DO NOT use inventory adjustments for distributing stock to customers or patients or receiving stock from suppliers. Use customer invoices or prescriptions and supplier invoices for that. Otherwise, you will lose your audit trail and reporting on transactions will be difficult.

Inventory adjustments are used to deal with a problem or fix a mistake, not in the general process of entering stock transactions into mSupply. Ideally, you'll never have to use them but we know we don't live in an ideal world!

If you are doing a stocktake, it's better to use the stocktake module described [here](#) as it will create the needed inventory adjustments automatically.

Viewing inventory adjustments

Choose **Items > Show inventory adjustments** or click on the Show inventory adjustment icon on the Item tab of the Navigator:

This will open the usual transaction filter window for you to choose which inventory adjustments you want to see. Make your filter selections (or leave them alone to see the 15 most recent inventory adjustments by default) and click on the **OK** button to see the list of matching inventory adjustments:

Name	Type	Sta...	Entered	Confirmed	Invnum	Total	Their ref	PS printed	Comment	Exp btch

Inventory adjustments	oi	new	19/01/20...		0	0				0

You can double-click on any inventory adjustment in the list to view or edit it.

Note that *si* type inventory adjustments add stock and *sc* types reduce stock (*si* means “supplier invoice” and *sc* means “supplier credit”).

Add stock

Choose **Item > Inventory adjust- add stock** to create an inventory adjustment to add some stock into mSupply or click on the Inventory adjustment (add stock) icon on the *Item* tab of the Navigator:

The inventory adjustment (add stock) window will open:

The image shows the 'Inventory adjust- add stock' window. It has a form with various fields for entering transaction details. The 'Name' field is pre-filled with 'Inventory adjust- add stock'. The 'Confirm date' is set to '05/05/03'. The 'Period' is '30/11/2017 - 31/12/2017'. The 'Category' is 'None'. The 'Colour' is 'Black'. The 'Invoice number' is '190'. The 'Entry date' is '12/05/2020'. The 'Status' is 'inv'. The 'Goods received ID' is '0'. The 'Purchase Order ID' is '0'. The 'Requisition ID' is '0'. The 'Entered by' is 'sussol'. The 'Store' is 'General Warehouse'. There are buttons for 'New line' and 'Delete line'. Below the form is a table with columns: L., Lo., Item code, Item Name, Qty, Pack, Batch, Expiry, Cost Price, Sell Price, Price extension, and Adjustment reason. The table has one row with data: 1, D09AAM035, AMOPICLIN, 500mg, blister, tab., 4, 100, query1..., 31/07/2024, 2.10, 2.10, 8.40. Below the table is a section for 'Other charges' with fields for 'Item(s)' and 'Amount'. The 'Subtotal' is 8.40, '0 % tax' is 0.00, and 'Total' is 8.40. At the bottom, there are buttons for 'OK & Next', 'Delete', and 'OK'.

L.	Lo.	Item code	Item Name	Qty	Pack	Batch	Expiry	Cost Price	Sell Price	Price extension	Adjustment reason
1		D09AAM035	AMOPICLIN, 500mg, blister, tab.	4	100	query1...	31/07/2024	2.10	2.10	8.40	

This transaction is almost exactly the same as a supplier invoice and you enter data in exactly the same way (see [7.01. Supplier invoices](#) for details), except:

- The name (*Inventory adjust- add stock*) is filled in automatically for you and cannot be changed.
- There is an additional *Adjustment reason* column (see below for details).

Use the **New line** button to add a line to the transaction (and the **Delete line** button to remove them), just as you would on a supplier invoice.
