

## 4.18. Inventory adjustments

Inventory adjustments allow you to increase or decrease the stock of an item that is recorded in mSupply®. You will need to adjust the inventory if:

- Stock is discarded (due to damage or expiry)
- Stock has been stolen.
- You find some stock on the shelf that is not in mSupply and you don't know where it came from.

**DO NOT** use inventory adjustments for distributing stock to customers or patients or receiving stock from suppliers. Use customer invoices or prescriptions and supplier invoices for that. Otherwise, you will lose your audit trail and reporting on transactions will be difficult.

Inventory adjustments are used to deal with a problem or fix a mistake, not in the general process of entering stock transactions into mSupply. Ideally, you'll never have to use them but we know we don't live in an ideal world!

If you are doing a stocktake, it's better to use the stocktake module described [here](#) as it will create the needed inventory adjustments automatically.

## Viewing inventory adjustments

Choose **Items > Show inventory adjustments** or click on the Show inventory adjustment icon on the Item tab of the Navigator:

This will open the usual transaction filter window for you to choose which inventory adjustments you want to see. Make your filter selections (or leave them alone to see the 15 most recent inventory adjustments by default) and click on the **OK** button to see the list of matching inventory adjustments:

Name	Type	Sta...	Entered	Confirmed	Invnum	Total	Their ref	PS printed dt	Comment	Exp btch

You can double-click on any inventory adjustment in the list to view or edit it.

Note that *si* type inventory adjustments add stock and *sc* types reduce stock (*si* means “supplier invoice” and *sc* means “supplier credit”).

## Add stock

Choose **Item > Inventory adjust- add stock** to create an inventory adjustment to add some stock into mSupply or click on the Inventory adjustment (add stock) icon on the *Item* tab of the Navigator:

The Inventory adjustment (add stock) window will open:

The image shows the 'Inventory adjust- add stock' window. It contains fields for Name, Their ref, Comment, Confirm date, Period, Category, Colour, Invoice number, Entry date, Status, Goods received ID, Purchase Order ID, Requisition ID, Entered by, and Store. Below these fields are buttons for 'New line' and 'Delete line'. A table with columns L., Lo., Item code, Item Name, Qty, Pack, Batch, Expiry, Cost Price, Sell Price, Price extension, and Adjustment reason is displayed. The first row shows item code D09AAM035, item name AMOXYCILLIN, 500mg, blister, tab., qty 4, pack 100, batch query1..., expiry 31/07/2024, cost price 2.10, sell price 2.10, price extension 8.40, and adjustment reason. Below the table are fields for 'Other charges' (Item(s) and Amount) and a summary section with Subtotal, 0 % tax, and Total. At the bottom are checkboxes for 'Hold' and 'Finalise', 'Export batch: 0', 'Margin: 0.00', and buttons for 'OK & Next', 'Delete', and 'OK'.

L.	Lo.	Item code	Item Name	Qty	Pack	Batch	Expiry	Cost Price	Sell Price	Price extension	Adjustment reason
1		D09AAM035...	AMOXYCILLIN, 500mg, blister, tab.	4	100	query1...	31/07/2024	2.10	2.10	8.40	

This transaction is almost exactly the same as a supplier invoice and you enter data in exactly the same way (see [7.01. Supplier invoices](#) for details), except:

- The name (*Inventory adjust- add stock*) is filled in automatically for you and cannot be changed.
- There is an additional *Adjustment reason* column (see below for details).

Use the **New line** button to add a line to the transaction (and the **Delete line** button to remove them), just as you would on a supplier invoice.

When you have finished adding lines to the inventory adjustment, click on the **OK** button. You will be

asked to confirm what you want to do:

If you've finished with the inventory adjustment and want to enter the lines into stock now, click on the **Confirm** button. If you don't want to enter it into stock now (because you want to add more lines later, for example) then click on the **Later** button.

## Adjustment reasons

If you have added any active *Positive inventory adjustment* reasons on the *Options* tab of **File > Preferences** (see [16.10. Options \(standard reasons\)](#)) then, when adding a line to the inventory adjustment (by clicking on the **New line** button), an **Adjustment reason** drop down list is displayed and you **must** select one of the reasons in the list before you can save the line:

A dialog box titled "Add/edit inventory adjustment line". It contains various input fields: "Item" (AMOXICILLIN, 500mg. blister, tab.), "DORAAMO58TB" (with a dropdown arrow), "Received quantity" (with a spinner), "Units issued: 0", "Sent quantity" (0), "Pack size" (100), "Total quantity: 400", "Batch" (qwerty1234), "Expiry" (31/07/2024), "Location" (with a dropdown arrow), "Volume per pack" (0 m3), "Invoice line unit cost (USD)" (2.10), "Adjusted local cost" (2.10), "% Margin" (0.00), "Sell price" (2.10), and "Price extension (USD)" (8.40). The "Adjustment reason" dropdown is highlighted with a red box and shows "Please select a r...". At the bottom are "Cancel", "OK", and "OK & Next" buttons.

Note that existing lines that do not have a reason selected can be left with no reason selected if you click the **Cancel** button on this window.

## Reduce stock

Choose **Item > Inventory adjust- reduce stock** to create an inventory adjustment to remove some stock into mSupply or click on the Inventory adjustment (reduce stock) icon on the *Item* tab of the

Navigator:

The Inventory adjustment (reduce stock) window will open:

L.	Lo.	Item code	Item Name	Qty	Pack	Batch	Expiry	Cost Price	Sell Price	Price extension	Adjustment reason
1		00RA60D2...	ADICLOVIR, 200mg, dispersible, blister, tab	1	500	SE70	31/10/2021	16.21	16.20	-16.21	Damaged stock (reduce)

Other charges:

Item(s):

Amount:

Subtotal: -16.21

0 % tax: 0.00

Total: -16.21

Hold ☐ Finalise ☐ Expert batch: 0 Margin: -199.99

OK & Next Delete OK

This transaction is almost exactly the same as a customer invoice and you enter data in exactly the same way (see [8.01. Issuing goods to a customer \(customer invoices\)](#) for details), except:

- The name (*Inventory adjust- reduce stock*) is filled in automatically for you and cannot be changed.
- There is an additional *Adjustment reason* column (see below for details).

Use the **New line** button to add a line to the transaction (and the **Delete line** button to remove them), just as you would on a customer invoice.

When you have finished adding lines to the inventory adjustment, click on the **OK** button. You will not be asked to confirm what you want to do, the inventory adjustment will be confirmed and the lines will immediately be removed from stock.

## Adjustment reasons

If you have added any active *Negative inventory adjustment* reasons on the *Options* tab of **File > Preferences** (see [16.10. Options \(standard reasons\)](#)) then, when adding a line to the inventory adjustment (by clicking on the **New line** button), an **Adjustment reason** drop down list is displayed and you **must** select one of the reasons in the list before you can save the line:

Note that existing lines that do not have a reason selected can be left with no reason selected if you click the **Cancel** button on this window.
