

4.01.14. Reporting tab

The screenshot shows a software window titled "Item details...". On the left is a vertical menu with options: General, Misc, Usage, Stock, Ledger, Quotes, Backorders, Notes, Reconcile, Bill of materials, Purchase Orders, Order options, Dispensing, Reporting (highlighted in blue), Log, and CST. The main area displays "Item name" as "Chlorpheniramine 4mg tab". Below this is a "Reporting..." section with four input fields: "ATC Category", "DDD value", "DDD factor" (which has the value "0" entered), and "ABC category".

ATC Category: This field is intended for the ATC code. The use of ATC codes and DDD values is discussed in detail [here](#).

DDD value: The DDD value is the defined daily dose of the item. For example, doxycycline's DDD value is 100mg., while that of Amoxycillin is 1g. DDDs are a means of quantifying the issue of medicines by doses rather than by the raw number of units dispensed.

DDD factor: Defined Daily Dose factor- this is the number of units of the item that make up the DDD value. In the case of amoxycillin 250mg capsules the DDD factor is 4, while amoxycillin 500mg capsules have a factor of 2. For Doxycycline 100mg tablets the DDD factor is 1

ABC category: This option allows you to mark items that are commonly used and then report on only those items. For Reports using this category, see [Items and Stock reports](#)
