

A screenshot of a 'Find Item...' dialog box. It has a blue title bar with a close button. The main area contains several dropdown menus: 'Item name' (with a dropdown arrow), 'starts with' (with a dropdown arrow), a text input field, 'and' (with a dropdown arrow), 'category is' (with a dropdown arrow), 'and' (with a dropdown arrow), 'VEN category is' (with a dropdown arrow), 'and' (with a dropdown arrow), 'department is' (with a dropdown arrow), and 'Randomly' (with a dropdown arrow). Below these is a text input field with the number '0' and the text 'items from returned list.' There is a checkbox labeled 'Exclude hidden items' which is checked. At the bottom are three buttons: 'Complex Find', 'Cancel', and 'Find'.

The items list will now display any invisible items and you will be able to make them visible again in the store tab.

If your mSupply system is a Primary - Satellite synced system, you can only change visibility of items on the Primary server.
