Forecasting

When calculating future consumption:

- ☒ Use historical Average Monthly Consumption (AMC)
- ☐ Use historical AMC increased by a factor of: 0 %
- ☐ Use a fixed, estimated AMC of: 0 items/month
- ☐ Use projection: A

Projections

Show projection: A Add year

Copy values from column 2014 to column Projec...

Modify selected cell by 0 %

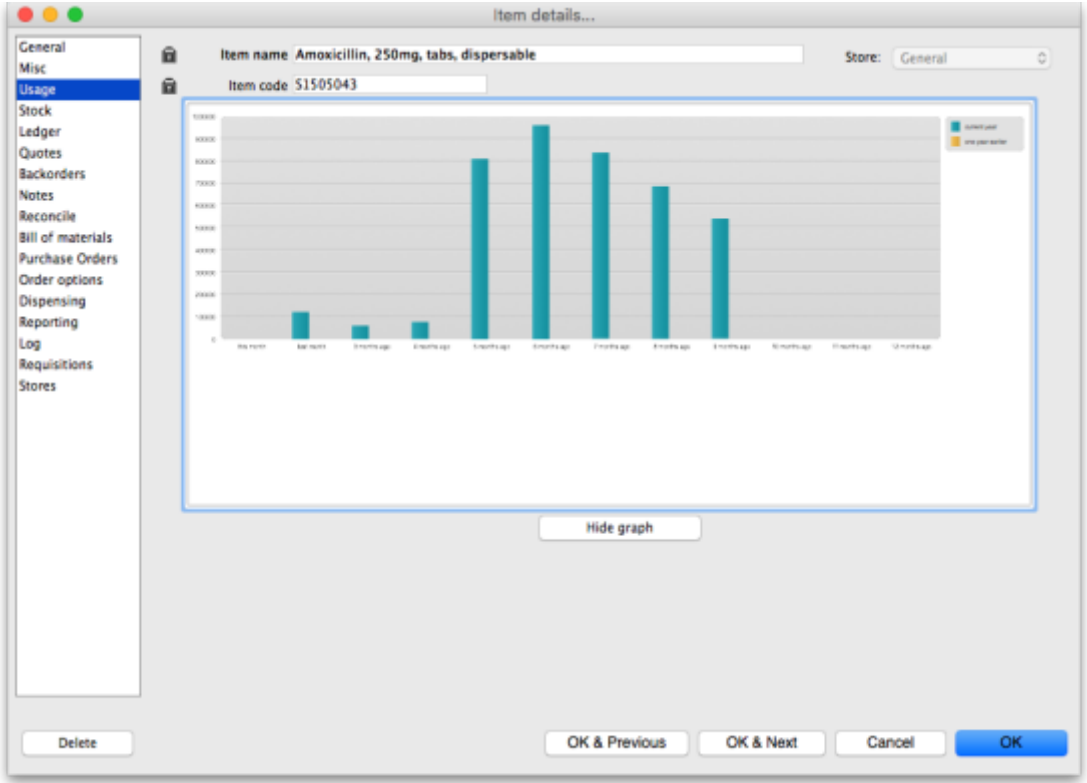

Delete OK & Previous OK & Next Cancel OK

The Usage tab allows you to view the item usage per month for the previous 24 months. This information is very useful for quickly spotting a trend in usage for a particular item.

Below the list of usage for each month there is a drop down list to choose from 1 to 24 months. After choosing a value, the **Mean** (average) **usage** and **Standard deviation** figures will be updated to give the figures for the period chosen (the period is from the selected number of months ago to the current day).

Refresh usage button: This button allows you to update the usage with transactions that were added since you opened the window (this applies to multi-user mode). It also allows you to show the usage with or without build transactions included in the totals, depending on whether or not the **Include builds** checkbox is checked.

Show Graph button: Clicking this button shows the same information in a graphical format:

One coloured set of bars shows the usage for the current year, another coloured set shows the usage for the previous year (if data is available).
