mSupply documentation wiki - https://docs.msupply.org.nz/

4.13. Prices in mSupply

mSupply has many different mechanisms for altering the sell price of items in invoices depending on many things. Below in this article:

- Item Margins
- Per customer price lists

Elsewhere:

- Customer price categories
- Catalogue Price
- Program pricing 12 month average
- Patient list pricing

Customisations for certain clients (give us details of your situation, and we may be able to extend the functionality to your needs). Ask about:

- Unified selling price (built off Catalogue Price)
- Weighted Average Price (Built off Catalogue Price and similar to below two)
- Price averaging derived across supplied cost prices at each store
- Price averaging derived by the central warehouse applied to master list

Pricing With Default Settings

There are two key values associated with all stock and invoice lines:

- Cost price: this is simply the price that the store paid the supplier for the goods.
- Sell price: this is recorded price that is expected for the goods to be sold to customers at. There are many pricing strategies that modify or override this value throughout mSupply which we'll detail below.

1. Purchase Order (PO)

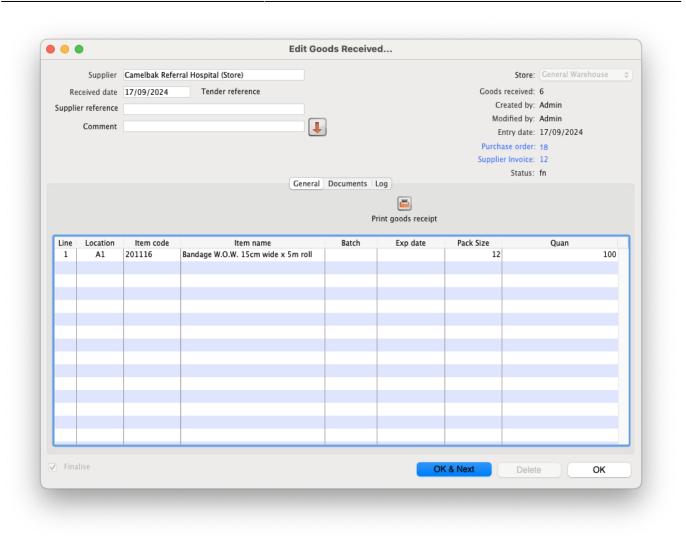

At the first instance, stock is often introduced into the supply chain via a purchase order. Each item ordered will have a price per pack which is carried through the next steps.

•					Edit	Purcha	se order	r						
	Order nun	n: 18 Name Cam	elbak Ref	erral Hos	spital (Store	2)						Colour	Black

		discount									Estima	ated subtotal	4	750.00
5	Percent	tage 0 Discount ar	nount		0.00					Estir	mated cost a	fter discount	4	750.00
	Locked	d 📃 Auto calc usage	2											
🗌 Fi	nalise orde	r 🗸 Authorise							OF	K & Next		Delete	0	к

Note in this instance, the supplier uses the currency AUD. Our system is using USD. This Forex (Foreign exchange) rate will be used later.

2. Goods Receipt (GR)

Next a user would create a Goods Receipt linked to this Purchase Order in order to accept the physical stock arriving. They'd add the lines from the original PO and enter the verified count of items into the GR. Finalising this GR will create a Supplier Invoice.

3. Supplier Invoice (SI)

A Supplier Invoice is automatically created by the GR of the previous step. This invoice, also known as a transaction, is used to record the ledger of the stock entering the mSupply stock system.

•					Sup	plier Invoi	ce					
	Name C	Camelbak Referral Hospital (Store)	Ļ			Confi	rm date: 17/09/2024	1		Co	olour	Black

Hold Finalise	Exp	port batch: 0 Margin: 0.00						014.0		Delete		
rmalise		Margin. 0.00						OK &	Next	Delete		ОК
-												

At this point the user has an opportunity to adjust cost and sell price.

	Add/edi	it supplier invoice lin	e	
Item Bandage	N.O.W. 15cm wide x 5m ro	bll	I	201116
Received quantity	100		Invoice quantity	0
Pack size	12 Roll		Invoice pack size	0
Total quantity 1,200.00			Invoice total quantity	0.00
Batch			Location	A1 5
Expiry 00/00/00			Volume per pack	0 m3 🛐
			Weight per pack	0 kg S
Price per pac	(AUD) 47.50	Adjusted local cost 36.96	% Margin	Sell price 40.67
Price extensio	n (USD) 3,696.92			
Manufacturer Aspen Me	dical Devices			
		Canaal	OK	OK & Next
		Cancel	ОК	OK & Next

Note:

- The currency exchange rate has been applied (and can be further edited).
- There is an opportunity to apply a margin. It has been set to 10%. (there are multiple places in mSupply to configure default margins)
- A sell price per pack is first recorded here. It is 10% higher than the cost price. It can be further edited manually.

Once finalised this will be available as stock in mSupply

4. Checking introduced stock

Under the Items menu, you can search for and view our item's stock. Note the other lines of stock which have different cost and sell price. This is because this stock was received or added at another time, with different prices applied at the time. All stock has it's own cost and sell price associated. Keep in mind that there are settings for centrally controlled sell prices for items, so that all customers pay the same amount regardless of the specific stock line they're receiving.

Editing our line of introduced stock, we can modify cost and sell price again.

0		Item	stock line	details		
tem code 2011	16 Item na	ame BandageV	V.O.W. 15cr	n wide x 5m rol	II	
		General Ledger	Status Ref	erence document	s Log

Custo	m stock fields					
					Cancel	OK

5. Customer Invoice (CI)

If we create a new customer invoice to a facility, when adding an item we'll see our stock line is available with the prices carried through from the supplier invoice that introduced the stock.

						Edit li	ne					
lte	m Band	age W.O.W	. 15cm wide	x 5m ro	11			I	201116			
Li	ne	2						_				
Qu	an	5 of 1	.00	Total	60							
	ck	12 Roll		r pack s		_						
ra	CK.	TT KOII				0						
	Add	Place hold	er			Re-lool	kup Sell Price					
Line	Issue	Available	Tot in st	Pack	Hold	Batch	Expdate	Supplier	Location	Cost Price	Sell price	Sta
1	0	3	15	12				LUPIN	A1	3.00	4.20	
2	5	100	100	12				camosp	A1	36.96	40.67	
3	0	334	346	12		D456486	30/04/2021	invad	A1	0.49	0.48	
		l quantity		60								
	i otal d	luantity av	allable	5244								
								Can	cel	ОК	OK &	Next

Now added, we can see in our Customer Invoice the stock we added and see that it's Price Extension (the total sell price for the line) is 5x the sell price, as we are providing 5 packs.

		Delete note	Amount	Total: t Outstanding:	203.35
Finalise Export batch:	0 Status: nw	0	OK & Next Del	ete OK	

The key difference here is that there are several patient specific pricing modifiers that can be configured in mSupply which we'll see later.

Sell Price Settings

At either introducing stock or at the point of distributing/selling/dispensing stock, there are settings that can modify the sell prices saved in the system or simply override the sell price when distributing. Hold on you your hats [].

Default Price List

This setting is managed through 4.04. Item master lists. A master list can be configured as a "Default Price List

Item Margins

The price you charge customers for your goods is, of course, very important. mSupply provides you with several different ways to set the selling price of your goods. Here they are:

- Each supplier has a margin field that determines how much to add on to the cost price when buying from that supplier
- Each item has a margin field that determines how much to add on to the cost price when buying that item
- There is a preference (**File > Preferences > Invoices 1**) which controls how these 2 margins relate:

Item margin overides supplier margin on supplier invoices

- If this preference is ticked then the item margin will be used instead of the supplier margin. If it is unchecked then the supplier margin will be used instead of the item margin.
- You can set custom margins for each customer group (File > Preferences > Invoices 2)
 - Allow editing selling price on customer invoice lines
- You can fix the item price under the **General** tab in the **Item details** window.

Default margin		10	
Default sell price of prefered packsize	0.	00	
Price editable when issuing		_	

- Note that setting an item price here will set the price of **new stock** as you receive. It will not affect the price of existing stock- you can change existing prices if you have permission to do so by viewing an item and going to the "Stock" tab.
- You can set item prices when setting up a data file by importing an item list. (see below)

Per customer pricing

Updated: version 3.12

Alternatively, individual prices can be set for each customer. This can be done in the **Edit Customer/Supplier** window which you can find by:

- going to the **Customer** tab of the Navigator
- click on the **Show Customers** button
- find the customer you wish to customise prices for
- double click the customer line
- choose the **Item Lists** tab (see below)

0 0			Edit custo	mer/supplier		
General nvoices Backorders	Tsingbwege			Store:	CMS Store	÷ (
Quotes Notes Contacts Group	Favourite List(s)	Copy from	Selete	Items	ault Order Days	0
Purchase orders Web log-in	list list Favourite List	master list	list			
Item lists Stock history	Health Centre Order List	Mas Impr Sto.	Web Price	Item Name ALBENDAZOLE 200MG TAB	Imprest quan	Price 4.5

				ARTEMETHER + LUMEFANTRINE 20/120MG 1		1.2
				ARTEMETHER + LUMEFANTRINE 20/120MG 2		2.4
				ARTEMETHER + LUMEFANTRINE 20/120MG 3		3.5
				ARTEMETHER + LUMEFANTRINE 20/120MG 4		4.5
				ASPIRIN 300MG TAB	0	2
				BISACODYL 5mg TABLET	0	3.2
	Style	Output to Printer Excel		rdering method Imprest Stock Take	<u> </u>	~
				OK & Next	Cancel	ОК

To customise the pricing, add a list to the **Favourite Lists** column (either by clicking **Add master list**, **Add local list** or **Copy from master list**) or edit an existing list by double-clicking on it. Check the **Price list** checkbox from the window that comes up and any other checkboxes that you require.

- You only need the Price list check box marked to customise prices
- Only one list per customer can be price customised

$\Theta \cap \Theta$	Add local list
Description	Health Centre Order List
 Imprest Ordering list 	☐ Customer Stock History for web ☑ Price list
	Cancel OK

Make sure the list is selected and then go to the **Items** section of the window. Enter the corresponding prices that you would like to assign to each item for that customer by clicking on the item and then clicking on the price ("0" by default). You can also add items to the list by clicking **Add item** and entering the item name and the price in the window that appears. The customer will now be charged the prices set in the list instead of any other price set.
