

Splitting a stock line

The Split feature of mSupply provides us with the ability to break down stock into smaller pack sizes, consolidate it into larger pack sizes or move part or all of a stock line to a new location. Here's how to use it:

- From the **Item** menu choose **Show items** to find the item to be split
- Enter the start of the item name and click **Find**
- Once the **Item details** window is displayed, choose **Stock** from the side bar list and you will see this window:

Item details...
Item name: Amoxicillin 250mg cap
Store: General

Line	Available	Total	Pack	Hold	Batch	Manufacturer	Expdate	Supplier	Location	Cost Price	Sell Price	Status	Total Volume
1	0	200	1	<input type="checkbox"/>	1005108		29/5/13	bouchm	TAB	0.02	0.02		0
2	27750	27950	1	<input type="checkbox"/>	1005108		29/5/13	bouchm	TAB	0.02	0.02		0
3	0	1001	1	<input type="checkbox"/>	1005108		30/5/13	bouchm	TAB	0.02	0.02		0
4	1490.669	15.869	1000	<input type="checkbox"/>	1005108	YXKP	30/5/13	bouchm	AAA	16.29	16.29		0

Stock summary:
 Minimum stock: 0
 Stock on hand: 1,545,020
 Stock on order: 0
 Total stock value: 25,276.52
 Average unit cost: 0.01
 Total Volume: 0.00

Days Cover:
 Based on: 12 months usage:
 For stock on hand: 929
 Including stock on order: 929
 Generating an order for: 0 days stock
 will order a quantity of: 0

- Click on the line you want to split, then click **Split**:

Repack stock...
 Quantity to split: 1 of 2566
 New shelf location: L.03.B2
 New pack size: 1

When you click OK a new repack transaction that reflects the change in stock will be created automatically

Print location movement report

Cancel OK

- In the **Quantity to split** field enter the number of packs you want to move/split (if you're

repacking the whole lot, then enter the total quantity - the number to the right of the word 'of!')

- In **New location** enter the new location for the packs that are being split (leave it alone if you're not changing the location)
- In the **New pack size** field enter the The new pack size for the split items (leave this as it is if you're not changing the pack size!).
- Click **OK** and you're done - the changes will be immediately visible in the item stock details window.

So, to summarise, you can use the split command to perform these actions:

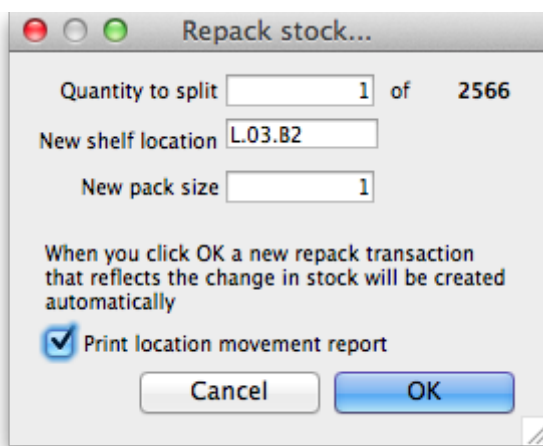

- Change the location of some or all of a stock line
- Repack some of a stock line into a different pack size
- Both of the above at the same time!

Produce a Movement report

mSupply provides a feature to produce a 'Movement report' for stock that you have moved to a different location using the split function. It's useful for printing off and giving to the person who is going to physically move the stock in the store.

Here's how to create one:

- Once you have entered the details of your split/new stock location, click on the checkbox labelled **Print Location Movement report** and click **OK**:

- The following report is displayed:

- Note that the original and new locations are clearly identified so a printed version of this report can be easily referred to when physically carrying out the move in the warehouse.
