- 7.01. Supplier invoices
- 7.02. Goods receipts
- 7.03. Editing pack sizes
- 7.04. Managing outstanding purchase order lines (pipeline stock)
- 7.05. Custom stock fields
- 7.06. Managing donors

Previous topic: 6. Purchasing || Next topic: 8. Issuing Goods

7.05. Custom stock fields

Custom stock fields are a useful way of tracking your stock. You can think of them as providing stock tags or categories which can be seen wherever stock is viewed throughout the system and can be used for filtering reports.

There are 8 custom stock fields available. The first 4 are free text (the user can enter any text they like) and the final 4 allow the user to select values from preset lists defined by you.

Setting them up

You turn them on in the stock tab of File > Preferences. See here for details.

To define the lists the user can select from for custom stock fields 5 to 8, click on the *Item > Show custom stock field value lists...* menu item. This window is displayed:

7

Pre-defined custom stock fields
Show Programme
New Delete
Custom stock field values
ARV
Essential medicines
Malaria

In the *Show* drop down list, select the custom stock field you want to add/edit/delete values for. Note that the items in the list will be "Custom stock field 5" to "Custom stock field 8" but those fields which have been given a Display name in the preferences will be replaced by it. In our example, Custom stock field 5 has been given the display name "Programme":

Show	✓ Programme	
	Custom field 6	
	Custom field 7	
	Custom field 8	
New	Delete	

The custom stock field values table below the drop down list shows all the values currently in the list for the selected field.

New button Click on this to enter a new item for list for the custom stock field currently selected in the show drop down list. Note that the list of items will always be displayed in ascending alphabetical order for a user to choose from.

Delete button select an item in the list and click on this button to delete an item from the list

Double click on an item in the list to edit its name

Using them

Now that they have been set up, when you receive goods in on a supplier invoice the enabled custom fields will appear on the supplier invoice line detail window. Enter the values in there as you receive stock into mSupply. The values will then appear wherever you see stock in the system e.g. on the stock tab of an item's details window.

The fields will also be available for filtering on when you are running any of the stock based reports.

Previous: 7.04. Managing outstanding purchase order lines (pipeline stock) || Next: 7.06. Managing donors

7.06. Managing donors

What / who is a donor?

In mSupply, we have the idea of a '*name*'. A name can be a customer, a supplier, a patient, ... or a donor.

A donor is normally the name of the organisation that has paid for, or somehow managed, the supply of certain stocklines.

A donor *can* also be a supplier and / or a manufacturer or they can be just a donor. mSupply allows for any combination of that.

mSupply allows you to specify the donor for each incoming stock line independently of the supplier.

For example, GlobalFund might agree to supply certain malaria medicines, and then contract a supplier to deliver them to you. mSupply allows you to record this accurately, and to track and report on all the stock and transactions relating to those medicines donated by GlobalFund.

The Donor feature was designed for the purposes of tracking and reporting on stock that has been funded by a donor. However, the feature can be used for more than just tracking donors. For example, In many countries that use mSupply, most medical supplies are supplied free-of-charge to the health facility by a government agency. But if the government agency has not supplied stock, the facility might decide to procure the stock 'privately'. The facility management will often want to keep track and report on this privately procured stock. The donor feature can be used for this purpose. The 'donor' name for this purpose might be called Privately procured.

Using the donor module

To use the donor module, you must first turn it on:

- Click drop down menu File>Preferences...
- Click the Invoice 1 tab in the left-hand list
- Check the box Allow tracking of received stock by donor

0 0	Preferences	
General Invoices 1	All Invoices	Activate Ad hoc items
Invoices 2 Printing Misc Log Patient Medication E-mail Backup	 Allow editing tax rate & amount on invoices Allow entry of dates on invoices Export invoices to disk when finalizing After deleting lines, redo the numbering Activate budget module 	Round cost, sell price, cash payment and cash receipt 2 decimal places
Backup 2 Reminders	Supplier Invoices	
Web server Moneyworks Drug Interactions Customization Dispensary mode Item Purchase order defaults Purchase order 2 Price This Computer OK and print Logo Quotes	 Allow editing margins on supplier invoice lines Hide batch number and expiry date entry Confirm supplier invoices without asking Show comparative purchases for supplier invoices Item margin overrides supplier margin on supplier invoices Activate supplier payment module Warn if expiry less than 0 days Disallow remove hold status if zero sell price Sell price changes affect un-finalized customer invoices 	 Show inner and outer pack fields Hold invoice by default Allow tracking of received stock by donor
Reports HIS Tender Synchronize		Cancel

Once you have done this you can add donors and track stock by donor.

Adding or editing donors

To add or edit a donor you should first bring up the list of donors. Do this from the Navigator:

 Go to the Suppliers tab > Show Suppliers and check the box beside Donors so that the list shows donors rather than suppliers.

	Fuzzy
lame filter	
Name	✓ contains ✓
and \checkmark	District 🗸 is
and	✓ Customer group is Don't Care ✓
Search O All name: O Selection	Ă

- Click Find. This will bring up a new window showing any donors that have been added to mSupply in your system
- You can edit a donor by double-clicking on it.

1

• You can add donors using the **New** tool bar at the top of the window. This will bring up a window like this:

			New donor		
General	Arch Foundation Name Code arch Charge to arch Master ID Master r	0 🖘	Contact email web site Phone Fax Status Hold	Price Category	Store: General : Currency VUV : Supplier details Margin 0 Freight factor 1 Printing Print invoices alphabetically
	Category Customer Supplier Manufacturer Benchmark Donor	Other Category 2 none Category 3 none	Category + Category + Category + Fla	5 none + 6 none +	Custom 1 Custom 2 Custom 3 Comment
	Main/Billing Address Address 1 Address 2 Address 3 Address 4 Address 5 Post code Country		Postal address		Shipping address
Delete name				OK & N	lext Cancel OK

• Now add your donor details and click **OK**.

5/65

7

Track a donor in mSupply

Donors and the purchase order

- Create a Purchase Order in one of the usual ways refer Ordering Items From Suppliers.
- With donor tracking turned on, the Donor field will appear in the window see below. The value you enter here will be tracked from this point on through to receipt, stock transfers and dispatch.

1	,				Ne	w Pur	chase o	order							×

 Add your Item line(s), check your order is correct and click the **Confirm** button to make the order available for Goods Receipt in the normal way - see Ordering Items From Suppliers for more details.

Donors and the goods receipt function

Receive goods in the usual way - see Receiving goods (Goods Receipt function). The only difference is that the Donor's name is now present in the Donor field:

2025/07/15 00:18 9/65 00 New goods receipt... Store: General Supplier Central Medical Store + Tender reference : Goods received ID: 34 Received date 22/05/13 Created by : sussol Supplier reference Modified by : Entry date : 22/05/13 Default donor Arch Foundation Purchase order: 87 Supplier invoice : 0 Status : nw ÷ 4 * Add from purchase order Add an un-ordered item Delete line Check space Print goods receipt Exp date Line Location Batch Pack Size Quan Item name AMOXYCILLIN 250mg TAB/CAP ABC1234 OK & Next Delete OK Finalize

7

Donors and the supplier invoice

 Clicking Finalise on the Goods Receipt generates the Supplier Invoice in the usual way (see Receiving Goods - a Supplier Invoice). Note that you can see the donor identified in the Purchase Order in the Default donor field:

00			S	upplier	invoice			
Name Central Medical Their ref Comment goods received New line Delete line	CMS	_	efault	Confirm ategory N Donor: A	y date : 22/05 n date : 00/00 lone rch Foundation Summary by	¢/00	G	Colour : Black Invoice number : 2,229 Status : nw oods receive ID : 34 rchase Order ID : 87 Entered by : sussol Store : General

		Other charges Item(s): Amount:	0.00000					Subtotal: 0 % tax: Total:	0.00000 0.00 0.00000

Changing the donor for a particular supplier invoice line

• There may be circumstances when delivered stock may be from a mix of donated and nondonated, or from different donors. You can change the donor for any stock line on a supplier invoice when editing the details of the stock line (double-click on the stock line).

Item	Sensivity disc D	oxycyclin	ie			-
				77	/3310	New iten
Quantity	1					New Iten
Pack size	1	Cart/5				
Total quantity:	1				Location	- 5
Batch	1091060			Volume	per pack	0 m3 S
Expiry	30/9/14]	Adjusted local cost (USD)	% Margin	Sell price

			De	onor UNFPA		
				Cancel	ок	OK & Next

If you change the **Default donor**, you will be presented with the following options:

7

0 0	Donor update confirm
You have entered affect existing in	f or changed a donor. How do you want to voice line(s) ?
Choose one of th	e options below
💿 Do noth	ing
Update	existing donor lines with this donor
Assign t	his donor to the lines with no donor
🔵 Assign t	his donor to all lines
	Apply

- "Do nothing": The change will have no effect on existing invoice line(s).
- "Update existing donor lines with this donor": existing donor lines will be updated to match the newly selected donor.
- "Assign this donor to the lines with no donor": lines with no donor selected will be updated with the newly selected donor.
- "Assign this donor to all lines": all lines will be updated with the newly selected donor.

Donors and the customer invoice

Customer invoices, including stock transfers for donated goods are created in the usual way - refer Issuing Goods to a Customer (Customer Invoices).

• They key thing to note is that when selecting from the stock lines to add to the Customer Invoice, the donated stock lines can be distinguished from the other stock lines by the donor name in the **Donor** column - see below:

							edit line

don't want to issue it, you will need to manually **de**select it.

Reporting

Obviously, one of the points of entering all this donor information is to be able to report on it. When the donor tracking preference has been turned on, many of the stock based report filters in mSupply will have an additional donor filter added to them. Simply enter the donor filter settings you need, as appropriate, to filter the reports accordingly.

Previous: 7.05. Custom stock fields | | Next: 8. Issuing Goods

7.03. Editing pack sizes

New: mSupply version 3.03

Changing pack sizes for items already received

If you have received goods and the supplier invoice is taken off hold, these goods will go into stock and be available for issue.

You can still edit the pack size if.

- 1. No stock has been issued, or:
- 2. You have the user preference set that allows editing pack sizes even after issue.¹⁾

Allowing editing of pack sizes

	Edit user	
User sussol]

Changing a received pack size after items have been issued

Take as an example chloramphenicol eye ointment; a delivery has been received, comprising 500 tubes, packed in packs of 100 - i.e. 5 boxes, each containing 100 tubes. When the entry is made into mSupply the operator in error enters a quantity of 5 and a pack size of 1, instead of a quantity of 5 and a pack size of 100.

🚺 New goods rec	eipt				
Supplier	Anspec Pty Ltd		St	ore: General	-
Received date	30/05/11	Tender reference :			
supplier reference		Purchase order:	429 G	oods received ID	906
Period	01/01/11 - 31/12/11	Created by :	Sussol	Entry date	: 30/05/11
		Modified by:		Status	: nw
•	e	*	-		
Add from purchas	e order Add an un-ordered item	Delete line	Check space	e Print	goods receipt
Line Location	Item name	Batch	Exp date	Pack Size	Quan ^
1 LTE	Chloramphenicol 1% eye oint	ex123	31/01/13	1	5

Provided the user permission described above has been set, the error can be rectified, and the invoice altered to show the correct pack size of 100. From the **Supplier** menu, choose **Show invoices** to access the required invoice. Select the line *Chloramphenicol* 1% eye oint, and double click on it. If stock has already been issued, a window will appear to alert you, and allowing you immediate access to the customer invoices detailing the issues.

It should be noted that adjustments may be necessary on these invoices.

Click **OK** to display the **Add/edit supplier invoice line** where the correction can be made by changing the **Pack size** entry from 1 to 100.

Item	Chloramphenicol 1% eye oint	
Quantity	5 Units issued 2	
Pack size	100 each	
Total quantity	500	

How is this different to splitting a stock line?

Splitting a stock line is required when a store receives and manages an item whose pack size contains a number of units in the pack, but typically issues the item to the store's customers in smaller quantities. Taking the example above, the store *receives* and *manages* chloramphenicol eye ointment in a pack size of 100, but *issues* in single tubes.

- Editing the pack size in a supplier invoice, changes the total stock on hand (and / or issued)
- Splitting a stock line does not change the total stock on hand (and / or issued)

The **Item details** screen is displayed from the **Item > Show items** menu, by entering the first few characters of the item in the **Find item** window. From the list on the side bar, click **Stock**, and on the window which appears click on the appropriate line to select it; the window should now have this appearance:

General Misc		🕼 Ite	m name	e Chio	ramph	enicol 1%	eye oint				S	tore: Ger	ieral		Ŧ	
Usage		1		ي	[-	5			3						
tock	Sho	w zero lin	es P	rint	S	plit	Update se	II prices	Show rela	ted invoid	es Co	nsolidate				
edger	Line	Availa	Total	Pack	Hold	Batch	Expdate	Supplier	Manuf	Donor	Location	Cost Price	Sell Price	Status	Total Vol	
Juotes Jackorders	1	3	5	100		ed.23	31/01/13	Ansp			LTE			_		ĺ.
lotes econcile																
ill of materials																
urchase Orders																
irder options ispensing																
eporting																-

Click the **Split** button, and fill in the appropriate details on the form - in this example the 3 packs of 100 are to be changed to 300 packs of 1.

OK

Looking again at the Item details window, the stock is now displayed as 300 single units, and the store is now able to issue as little as a single tube, or any quantity up to the total available.

Cancel

When you click OK a new repack transaction that reflects the change in stock will be

Repack stock...

created automatically

Previous: 7.02 Goods receipt | | Next: 7.04. Managing outstanding purchase order lines (pipeline stock)

7.02. Goods receipts

Entering goods received

If the receiving store is receiving goods from another virtual store in your mSupply system, in response to an Internal Requisition (Purchase Order) from that store, the Goods Receipt will be created automatically - refer Receiving the goods (requesting store). Open this automatically created Goods Receipt. Do not create a new Goods **Receipt!**

Choose *Supplier* > *New goods received* and this window appears:

	Supplier	Search purchase	order			Store:	GHSC-PSM Haiti War
Rec	eived date	17/09/2024	Tender reference			Goods received:	807
Supplie	r reference					Created by:	mSupply Support
						Modified by:	
	Comment			1		Entry date:	17/09/2024
						Purchase order	-
	Donor					Supplier Invoice:	
			5	and Decuments	Los	Status:	nw
			Gen	eral Documents	Log		
	+		÷ –			S	
Add f	rom purcha	se order Add	an un-ordered item Delete line	Check space	Print goods receipt	Apply suggested remain quantity	ing
Line	Location	Item code	ltem name	Batch	Exp date	Pack Size	Quan

There is some read-only information at the top of the goods received note that cannot be edited:

- *Store*: The name of the store the goods received note belongs to.
- Goods received ID: This goods received note's number. The number is automatically
 incremented and assigned when the goods received note is first created and is unique within
 a store. Note that goods received notes in different stores could have the same number.
- Created by: The name of the user who created the goods received note.
- *Modified by*: The name of the user who last modified the goods received note.
- Entry date: The date the goods received note was created.
- *Purchase order*: The number of the purchase order the goods on this goods received note were ordered on. It is a link and clicking on it will open the purchase order.
- *Supplier invoice*: The number of the supplier invoice produced from this goods received note. The number is filled in after the goods received note is finalised. Again, it is a link and clicking on it will open the supplier invoice.
- *Status*: The status of the goods received note:
 - \circ nw = new, the goods received note is not complete yet and is still editable
 - \circ fn = finalised, the goods received note is complete and is no longer editable

If you have goods receipt authorisation set up in Store Preferences there will be an extra *Authorised* column - see the Authorising items on goods received notes section below for more details.

Selecting the Purchase Order

In the **Supplier** field (which displays Search Purchase Order when it first opens), enter the first few

characters of the name of the supplier from whom the order has been received. To display all Purchase Orders awaited, enter @ in the Supplier field. (This has been done in the example shown below):

			Type here to search	
10 B (0		
PO Reference	Tender reference	Our PO ID	Comment	
0172572		4		
0172572		5		
0171054		6		
(0172572	0172572	0172572 4 0172572 5	0172572 4 0172572 5

- **Supplier** column: The name of the supplier the purchase order was sent to.
- **PO reference** column: The value entered in the **Reference** field on the purchase order.
- **Tender reference** column: The reference to the tender this purchase order came from. Will only have a value if this purchase order came from a tender.
- **Our PO ID** column: The number of the purchase order in mSupply.
- **Comment** column: The value entered in the **Comment** field on the purchase order.

If there are a lot of purchase orders in the list you can shorten it by typing something in the *Type here to search* field. The list will then only show purchase orders for suppliers that have a name which contains what you typed.

From this screen select the entry which matches the purchase order for which you have received stock, either by double clicking on the entry, or by highlighting the entry and clicking on the *Ok* button.

The New Goods Receipt window reappears with the supplier field and some other details completed.

Filling in general details

At this point you should fill in the:

• Supplier reference field with, for example, the delivery note number

7

• Comment field with any extra information you need to record about the delivery

Adding items from the purchase order

Next, you should click on the *Add from Purchase Order* button to add the items which have arrived to the goods received note. Clicking the button brings up the *Choose order lines...* window:

tem code	item name	Quantity	Pack size	Remaining q	Requested delivery date
EM0113	Amoxicillin, 500mg, tab	1000	1000	1000	01/06/2017
EM0112	Amoxicillin, 250mg, tab	2000	1000	2000	01/06/2017
EM0178	Co-trimoxazole, 480mg, tab	5000	100	5000	01/06/2017
TL0294	Sodium Chloride 0.9% solution (Saline) 1L	500	24	500	01/06/2017

This window displays the goods on the Purchase Order, and you may either select each item separately (click on a single item), the entire order (click on an item then press Ctrl+A on the keyboard, or Cmd+A on a Mac) or something in between (use Ctrl+click to select individual items and add/remove them to/from the selection and/or Shift+click to select a range of items) to enter the details of the items received!

If you're trying to find a particular item in a long list you can also type the start of the item's name or code into the search box at the top and the list will be filtered to show items which have a name or code starting with what you have typed.

mSupply does allow you to create a Goods Receipt for stock for which you have already received all of the ordered stock, that is, Remaining (outstanding) quantity = 0).

In any case, when you have selected the items to receive, click on the Use button.

Adding un-ordered items

Occasionally goods may be received which were not ordered; when this occurs, click on the *Add an un-ordered item* button and select the item before proceeding. There is a user permission that can be set to prevent users being able to use this button (see the 25.25. Managing users page for details)

Goods receipt line entry

The lines you have selected are added to the goods received note and you will see them in the table but with no batch, expiry date, location or quantities:

No information about the batches or number of packs that have been delivered has yet been entered. You can set the *Quan* column (number of packs) to the number remaining to be delivered by selecting the appropriate lines (Click with Shift and Control and Ctrl+a all work as usual) and clicking on the **Apply suggested remaining quantity** button.

To enter the batch and quantity information for each line, double-click on the first line in the table and the *Edit goods received line* window will open, populated with the first item:

						Edit item				
Item Amox	cicillin, 500mg,	tab			EM0113	I				
Add line De	elete line Dup	icate line	Remaining	quantity to	receive:	0	packs of: 1	000		
Quantity	Pack Size	Total quan	Batch	Expiry		Location		Comme	nt	
1000	1000	1000000								
1000	Total received	1000000								
Location De	tails									
Total cap	pacity	0		Volume per	r pack	0 m3				
Available :	space	0		Space rec	quired	0				
				Weight Pe	r Pack	0 kg				
				Total Line V	Veight	N/A kg				
Com	iment									
								Cancel	ОК	OK & Next

Let's have a look around the window and see what information is being displayed:

- *Item*: the name of the item we're entering the information about. At the end of the field is the item's code.
- *Remaining quantity to receive*: the number of packs we're still waiting to receive from the supplier on the purchase order this goods receipt note is for. This is 0 on the screenshot because, by default, mSupply creates a line in the table which contains all the outstanding stock.
- *packs of*: the pack size (number of items in the packs) we're waiting to receive. So, the total number of individual pieces of this item we're waiting to receive is *Remaining quantity to receive x packs of*.
- table: contains all the lines of the item that we're receiving from the supplier. Click on any of
 the cells to edit them (they are all editable except the *Total quan* column because this is a
 calculated column and equal to *Quantity* x *Pack Size*). There will be a separate line in this table
 for each batch or location (and manufacturer if the preference to record manufacturer is turned
 on entering a manufacturer is the same as entering a location i.e. enter the first few
 characters of the manufacturer's name and press the *Tab* key on the keyboard and select the
 manufacturer you want from the list displayed or click on the **New** button to create a new
 manufacturer). If there are any of the first 4 custom fields described on the 16.01. General
 preferences page turned on then columns for them will be displayed after the expiry date picker
 column and you can enter values for each one there.
- Expiry date picker: this is in the column just to the right of the *Expiry* column. Click on it to select the expiry date from a date picker:

0	1	Expiry	date			
ear						
2017	2	2018 2019			2020	
2021 2		022	022 202		2024	
lonth						
Jan		Fe	b		Mar	
Apr		Ma	ay		Jun	
Jul		Αι	ıg	Sep		
Oct		No	v		Dec	
	2017 2021 Jan Apr Jul	2017 2 2021 2 lonth Jan Apr Jul	ear 2017 2018 2021 2022 Ionth Jan Fe Apr Ma Jul Au	2017 2018 2019 2021 2022 202 Ionth Jan Feb Apr May Jul Aug	2017 2018 2019 2021 2022 2023 Ionth Feb Apr May Jul Aug	ear 2017 2018 2019 2020 2021 2022 2023 2024 Nonth Jan Feb Mar Apr May Jun Jul Aug Sep

Click on a month and year in either order and mSupply enters the last day of that month in the expiry date column. You can manually edit the date (or manually enter it without using the picker) if you don't want the last day of the month.

- *Volume per pack*: the volume per pack for the line currently selected in the table. Will be set to the item's default volume per pack if it has one, otherwise 0.
- *Weight per pack*: the weight per pack for the line currently selected in the table. Will be set to the item's default weight per pack if it has one, otherwise 0.
- *Total line weight*: the total weight of this line in the table (= *Weight per pack* x *Quantity* column figure for the line)
- *Total capacity*: the total volume the location for the selected line in the table has. 0 if the location is not set for the line or has no volume set.
- Available space: the available space in the location before putting this line in it.
- *Space required*: the volume this line requires (= *Volume per pack* x *Quantity* column figure for the line). So compare this with the *Available space* figure to see whether the line will fit in the location selected.
- *Comment*: Anything you want recorded for this line. Anything typed in here will appear in the *Comment* column in the table.

If you have set a note for this item on the purchase order (see *Notes* section in Editing Purchase Order Lines) then an extra Note section will appear at the bottom of the window:

						Edit item		
•	xicillin, 500mg.	tab	Remaini	ing quantity to re	EM011	-		packs of: 1000

				Total Line We	ight	1000	kg	
Con	nment							
Notes								
Urgent – pro	ocess quickly							□ Note has been actioned
								Cancel OK OK & Next

Until the *Note has been actioned* checkbox is checked, lines for this item will appear in red on the overall goods receipt window (see below).

To add lines for new batches or locations, click on the *Add line* or *Duplicate line* line button - they both add a line, *Add line* adds a blank one, *Duplicate* copies the line currently selected in the table. No surprises but, to delete a selected line, you click on the *Delete line* button!

You can edit a row in the table by clicking on the various cells. It is best to click on the left-hand **Quantity** cell and adjust that one first. Then you can use the tab key to advance to the next cell in the row.

Let's take the following example for amoxycillin 500mg caps.

quantity	pack	batch	expiry
648	1000	b1234	30/06/18
324	1000	b1235	30/11/18

Let's say there are 12 packs in a box, and 27 boxes on a pallet, so you have 2 pallets of the first batch and one pallet of the second batch. You can only put one pallet in each location, so the first row will be split into two.

Enter the details into the first row as above.

1. If you are entering details for an item which has its "Expiry date required on receive" preference set (see here for details) and you do not enter an expiry date for any of the item's batches then, when you click on the *OK* or *OK* & *Next* buttons, you will be shown a warning message and you will not be able to close the window without entering an expiry date for each batch or deleting all the item's batches.

2. If you receive more than was ordered on the purchase order, when you click on the **OK** or **OK & Next** buttons an alert message will appear asking you to confirm the receipt.

Location management when receiving goods

If the items you are receiving have had a location and volume entered when the Purchase Order was created, these will be transferred to the goods receipt. If you want to edit these details you can do so by double-clicking a line and either changing the volume or the location.

You can then choose a different location by entering it in the location field, or enter the start of a location code and press **tab** to get a list of matching locations.

When you get to the location column, we type m then press tab. you are shown the location choosing window with locations that match "m"

(Q, m			empty available all	٩	lew location
Code.		Description	Location type	Vol Used	Vol Avail v
Main-8-8-1	Main 8-8-1			0	0.8
Main-4-3-1	Main-4-3-1			0	0.8
Main-4-4-1	Main-4-4-1			0	0.8
Main -5-1-3	м			0	0
main-12-4-3	main			0	0
Main-13-4-4	main			0	0
Main-11-4-1	main			0	0
Main-14-1-2	main			0	0
Mian-3-8-3	main			0	0
Main-3-9-4	main			0	0
Main-4-11-2	main			0	0
Main-5-3-2	main			0	0
Main-5-5-3	main			0	0
Main-6-10-3	main			0	0
Main 0 2 0	main			0	0
	ltem A	sym Probe			

Note we have then clicked the **Show empty** radio button, as we are putting away a whole pallet, and pallets only go in empty locations. The **Show available** radio button shows locations that have enough spare capacity to take the volume of the line we are receiving. We then double-click on the location to choose.

If the item you are receiving has a default location set for it, this will have already been filled in when the line was added to the purchase order. Default locations should be set if the same item is always put in the same place, otherwise leave it blank. In the current

7

example we've assumed it has **not** been set for each item.

Now we have entered all details for the line, we can click on the row to highlight it, then click the **Duplicate line** button to create another row the same without entering all the details again - you then only need to click on the location column on the newly duplicated row, and you can edit the location to find another empty location for the second pallet.

Once done, you can duplicate the row again, and this time you have to change the batch (to b1235), expiry (to 30/11/18) and location.

Then your window should look like this:

Item Amox	cillin, 500mg,	tab		c.	M01	Edit item				
	—	1								
	lete line Dup	plicate line	Remain	ing quantity to re	ceiv	e: 28	packs of:	1000

2		Procaine Benzylpenicillin 1MU vial			50	0
						_
						-
E Fi	nalize			OK & Next	Delete	ОК

All the items you've selected have been added to the goods receipt. The quantity is set to the total remaining to be received for that item.

Double click on each item in turn and the window allowing you to enter quantities, pack, batch numbers, expiry dates.

Red line in the Goods Receipt?

If you see lines show up in red on the Goods Receipt that means that you have set a note that must be actioned for that line on the Purchase Order (see Notes section of Editing Purchase Order lines for details).

Once you have actioned the note, the lines will return to their 'normal' black colour.

The right hand side of the window shows you the shelf location, total capacity and available space for a particular item in a particular shelf location. You are also shown the volume or space required for a particular item. The small "refresh" icon the right inserts the default location for the items.

tem Axsym Probe							
•	\$						
dd line Delete line Du	plicate line	Remaini	ng quantity to re	ceive: 1	packs of	of: 1	
Quantity Pack size	Total quan	Batch	Expiry	Manufacturer		Location	
1 1	1	ABC123	31/05/2018		Main-8-8-1		
1 Total received	1						
Location details							
Total capacity	800 1		Volume per p	vack 0.	003 m3		
Available space	797 1		Space requi	ired	31		

The volume of the shelf location is now reduced to reflect the space consumed by our newly added stock item.

After entering the details for each item, you can click on *OK* & *next* to proceed to editing the next item.

Finalising goods received

The next step in receiving your goods into mSupply is to create a supplier invoice (that is where you will enter pricing information if you need to). This is done automatically for you when you finalise the goods receipt.

When you have entered all the goods you have received onto the Goods Receipt note, you finalise it by checking the *Finalise* box in the bottom left hand corner of the window and clicking on the *OK* button. Only do this when you are sure the Goods receipt note is an accurate record of what you have received and contains all the information you want in it because finalised means finalised and you won't be able to change it afterwards (just like everywhere else in mSupply!).

Finalising a Goods Receipt will update the received (and outstanding) quantities in the Purchase Order for any goods receipt lines which came from a Purchase Order.

Your goods are not yet entered into stock in mSupply - that only happens when the supplier invoice is **confirmed**. The initial status of this automatically created supplier invoice is controlled by the "When finalising a Goods Receipt" store preference - see here for details.

If you have the store preferences set to force **supplier invoice** authorisation, you will not be able to confirm supplier invoices (and therefore bring items into stock) until they have been authorised. See here for details.

If the Items received on a purchase order must be within a minimum expiry date

preference is turned on (see the 6.01. Ordering stock from suppliers page for details) then, when finalising a goods received note, a check is made to see whether any of the lines have an expiry date that is before the date set on the purchase order. If they do then you will be shown a message telling you which lines have too short an expiry date and you will not be able to finalise the goods received note until the expiry date is changed or the line is removed from the goods received note.

Authorising items on goods received notes

When you have goods received note authorisation turned on in Store Preferences you will see an extra "Authorised" column on your goods received note:

	Supplier	Search pur	chase order		1				Store:	Da	awei NAP sub-de.	
R	Received date	09/02/16	Tender reference						Goods r	ecelv	ved ID: 1	
Supp	lier reference								c	reat	ted by : Sussol	
oupp		·									ied by :	
											y date : 09/02/16	
	Donor										order: 0	
									Suppi		tvoice: 0 Status: nw	
	+		•		-	-		=				
dd fro	om purchase o	rder Ad	ld an un-ordered item	Dele	ate line Che	ck space	Print goo	ds receipt		r		
ine	Location		Item name		Batch	Exp da	ite	Pack Size	Quan	F	Authorised	1
				_						L		
										E		
										L		
				_						L		
										E		
										L		
				_						L		
										E		
										L		
	Authorizotta											
	Authorisation	comment										

The column will contain a checkbox for each batch you add to the goods received note. If a batch is authorised then check its box in the *Authorised column* (only users with the *Can authorise goods received* permission can check these boxes). You can enter any notes on batches which fail authorisation in the *Authorisation comment box* at the bottom. When you finalise your goods received note **only the batches which have been authorised** will be put on the automatically created supplier invoice. In this way you have a complete record of what was received, what was satisfactory and what was sub-standard.

Viewing existing goods receipts

Choose Supplier > Show goods received...

A standard mSupply find window is shown:

Find received goods.	**	×
Find Show	most recent goods received, or:	
Received ID 🗸 🗸	equals \checkmark	
Complex Find	Cancel OK	_

Click the *OK* button to view the last 15 goods receipts, or enter a value to find in the lower field, and choose the field you are searching for in the left-hand drop-down list (if you enter something in the lower text box this filter only will be used and the top one - number of recent goods received notes - will be ignored). This window then opens to show the goods received notes that match your filter selections:

If you have turned on any of the custom stock fields in store preferences they will be displayed as columns (between the Batch and Expiry columns) in the list of items and the information you entered for these fields when the stock was received will be shown in the appropriate cells. If you double-click on one of the supplier invoice lines to edit it (assuming they are editable!), you will see the custom fields and be able to enter information into them.

Outstanding purchase order lines

Outstanding PO lines are those which you are still waiting to be delivered from the supplier (also known as your pipeline stock). These will only be updated when a Goods Receipt is finalised. You can view them by either:

- Clicking on Show outstanding PO lines on the Navigator's Supplier tab or
- From the Supplier > Show outstanding PO lines menu item

Other tabs on a goods received note

All the functionality described above has been on the *General* tab. There are others!

Documents tab

The Documents tab on a requisition enables you to save documents and other files relating to the goods received note. The tab looks like this:

	Search purchase ord	er			Store:	Main warehouse	
Received date	19/01/2023	Tender reference			Goods received:	10	
supplier reference					Created by:	mSupply Support	
Comment					Modified by:		
comment			Ļ			19/01/2023	
					Purchase order:	-	
Donor					Supplier Invoice:		
			Court D		Status:	nw	
		_	General Docum	hents Log			
	-						
pload document	Delete document	Download document			Show	Show all	0
-	File name		Created by	Created on	Saved on	Version no	-
	File hame		created by	Created on	Saved on	Version no	

The table shows you all the files currently uploaded to this goods received note.

- **Upload document button:** Click this to upload a document to the goods received note. This will open a window enabling you to search for and select the file on your computer. After you've selected it, click on the **Open** button to upload it. If you upload a file with the same name as one already uploaded, mSupply will upload it as a new version of the already uploaded file.
- **Delete document button:** Select a file in the table by clicking on it and click this button to remove it from the goods received note.
- **Download document button:** When you click on this button you are presented with two options:
 - **Download:** this will download the file to a location you select on your computer.
 - Download and open: this will download the file to a location you select on your computer and then attempt to open it using the default application on your computer for that file type. If there is no application associated with the file type on your computer then mSupply will tell you that the file could not be opened.

Log tab

The log tab displays all the log entries that have been made regarding this goods received note. All log entries are stored in the mSupply log (see the 25.19. The system log page for details) and this tab will display all the log entries in there which were made for this goods received note.

Viewing and editing supplier invoices created via goods receipts

A supplier invoice will be created automatically once the Goods Received note is finalised.

	rency rency rate	AUD	1		oreign cu	olier subtot rrency charg ency charg	ge	1400 0 1400		Local charges	0

					0.0					Total:	- L	1.000

Supplier invoices created via goods receipts differ slightly from standard supplier invoices.

Price tab

Here, you can add in any extra currency related charges

- 1. in the supplier's currency in the Extra Foreign Currency charge field , and
- 2. in your local currency in the **Local charges** field and mSupply will automatically calculate the updated invoice price.

Here's an example of how mSupply will do this with a currency "YXB" whose rate is YXB 7 = USD 1

Item	Foreign Price	Quantity	Foreign Currency Price Extension	Local Price	Local price Extension	
Amoxycillin 250mg tabs	50	10	500	350	3,500	
Paracetamol 500mg tabs	300	5	1,500	2,100	10,500	

Now we add USD300 of freight charges and YXB1400 of import duties:

- The total USD value of the order is USD2000, so 15% must be added to each line to account for this
- The YXB1400 is equivalent to USD200 in local charges, so 10% must be added.
- Therefore a total of 25% is added.

ltem	Foreign Price	Quantity	Foreign Currency Price Extension	Local Price	Local price Extension	
Amoxycillin 250mg tabs	50	10	500	437.5	4,375	
Paracetamol 500mg tabs	300	5	1500	2,625	13,125	

35/65

7

Currency and currency rate

Select the supplier currency from this drop-down box, and enter the current exchange rate in the *Currency rate* field . Note that currencies must first be entered using the menu item *Special>Currencies*. See Currencies...

Extra foreign currency charges

In the supplier's currency, enter any extra charges from the supplier.

Local charges

Enter any local charges, in your local currency.

Application of charges

mSupply distributes any extra charges proportionally according to the invoice value of each item on the invoice; this is done automatically

MoneyWorks tab

If you are using the MoneyWorks accounting software (which is highly recommended), clicking on this tab allows you to export the invoice details to MoneyWorks. Elsewhere in this guide instructions on setting up mSupply to work with Moneyworks are to be found. See Moneyworks.

Previous: 7.01. Receiving goods (supplier invoices) || Next: 7.03. Editing pack sizes

7.04. Managing outstanding purchase order lines (pipeline stock)

Stock that you have ordered and waiting to be delivered is called your pipeline stock. Sometimes it's helpful and important to monitor this stock so mSupply has functions to help you do that.

Pipeline stock is represented by all the outstanding purchase order lines i.e. purchase order lines on **confirmed purchase orders** which haven't been fully received into mSupply yet.

To see all your pipeline stock simply choose **Supplier > Show outstanding PO lines...** from the menus or click on the *Outstanding* icon in the Purchase orders section of the Suppliers tab on the navigator. This window will open:

			Outstanding purchase order lines								
▼ Sear	ch by suppli	er or code	Print Upo	date EDD							
PO #	Supplier'	Supplier Name	ltem	name	Order Confir	Requested	Expected	Days to E	Adjusted Qua	Qty Received	Qty Outstanding
59	UNPF	United Nations Population Fund	Male Latex Condoms	- Social Marketing	04/03/2015	04/02015		0	2502144	0	250214
53	CIPL	Cipla Limited	Ciprofloxacin 500mg	Tablets	13/02/2015	13/02015		0	7690	0	769
121	BMPC	BMS Pharmaceutical Company	Ciprofloxacin 250mg	Tablets	28/07/2017	28/02017	28/02017	62	100000	0	10000
121	BMPC	BMS Pharmaceutical Company	Amoxicillin 500mg C	apsules	28/07/2017	28/02017	28/02017	62	200000	0	20000
59	UNPF	United Nations Population Fund	Male Latex Condoms	- Social Marketing	04/03/2015	04/02015		0	4499712	0	449971
59	UNPF	United Nations Population Fund	Male Latex Condoms	- Social Marketing	04/03/2015	04/02015		0	1499904	0	149990

All lines in black are those where the expected delivery date (EDD) is after the current date i.e. where the *Days to EDD* column (which contains the difference between the EDD for a line and the current date) has a number greater than 0. These are items which are not yet overdue but, if the Days to EDD column contains a small number, you might want to call the supplier to check on the delivery.

All lines in red are those where the expected delivery date is on or before the current date i.e. where the *Days to EDD* column contains 0. These items are overdue and it probably means that the supplier could do with a call to find out what's happening with your delivery.

The *Adjusted quantity* column shows the actual number of items you ordered (number of packs x the packsize).

The *Qty received* column shows the number of items (number of packs x the packsize) yo have already received into mSupply.

The *Qty Outstanding* column shows the remaining number of items on the order waiting to be received (*Adjusted quantity - Qty received*).

Double clicking on any line will open the Purchase Order with that line highlighted.

You can print the list of purchase order lines currently displayed in this window at any time by clicking on the **Print** button - as usual, you will be given the option of printing or exporting to Excel.

Update EDD button

If you speak with the supplier about a delivery or receive information from elsewhere about when goods are going to be delivered you can update the expected delivery date for those lines.

To do this, simply select the lines in the table that are affected then click on the **Update EDD** button. In the window that opens, enter the new EDD for the lines and click on the **Update** button. The EDD is immediately updated for the chosen lines and, if the lines were red, they will turn black.
You can select multiple lines to update using the usual Shift+click to select/deselect a range of lines and Ctrl+click (Cmd+click on Mac) to add/remove a line to/from what is currently selected.

Filtering the list

Sometimes the list of outstanding purchase order lines can be very long (just after running your annual tender for example, or when you have placed several large orders) and it can be hard to find a specific item or items expected from a particular supplier. To help in this situation, mSupply allows you to filter the displayed list.

To do this, select the type of filter you would like to apply by clicking on the filter icon (\mathbf{T}) just to the left of the textbox and select one of:

- Search by supplier or code will show only those outstanding purchase order lines on purchase orders whose supplier name or code begins with what you type in the textbox
- *Item name or code* will show only those outstanding purchase order lines whose item name or code begins with what you type in the textbox
- Days to expected delivery is less than... will show only those outstanding purchase order lines with an expected delivery date less than the number of days you enter in the text box from the current date.

Then enter the value you wish to filter by in the textbox and click on the **Find** button. The list will then be changed to show only those purchase order lines matching the filter you have selected.

Finalising purchase orders

Any outstanding goods on **finalised** purchase orders will **NOT** be included in this window. So, if there are goods that you have ordered but will never receive from a supplier (maybe a substitute item has been shipped or you cancelled part of an order because a supplier said they couldn't deliver it), when everything else on the purchase order has been received you should finalise it. The goods on the purchase order that you have not received will then no longer be shown as outstanding in this window.

It is good practice to finalise purchase orders for which you have received everything because it also removes the purchase order from the list you can create a goods received note from (see Receiving goods (goods receipt function)), making it easier to find a purchase order you're wanting to create a goods received note for, and means that no changes can be made to the purchase order in the future.

But beware: don't finalise a purchase order **before** you have received everything the supplier is going to send because you won't be able to make any changes to it or receive goods against it using the Receiving goods (goods receipt function).

Why can't we just un-finalise this PO ourselves?

Purchase orders are a legal contract between you and your supplier, and are often the subject of particular attention by auditors. As such they must be protected from misuse.

When a PO is finalised, somebody with authority is saying "we are not receiving anything more on this PO". This will be because either:

- all ordered stock has been delivered
- the supplier has failed to supply in accordance with the PO contract and so is in breach of the contract. The decision to finalise the PO is then a decision to terminate the supply contract. It is **most irregular** for an organisation to turn around and say, "wait, we'll continue to deal with the supplier on this order even though the contract is in breach". Auditors will likely want to see good documented evidence to support why this was done. A new purchase order, needing new approval by management is normally the more appropriate way to proceed.

For this reason, mSupply does not have the facility for users to unfinalise a PO. However, mistakes can happen...

Previous: 7.03. Editing pack sizes | | Next: 7.05. Custom stock fields

7.01. Supplier invoices

Introduction

All received goods should be recorded in mSupply either by:

- Manually creating a supplier invoice
- Working with a supplier invoice that has been created automatically as a result of a stock

transfer from another store in your mSupply system.

• Using the purchase order system, which leads to the automatic creation of a supplier invoice when you finalise a **goods receipt** associated with that purchase order (PO).

In some countries a supplier invoice is called a "bill", a "creditor invoice" or a "purchase invoice"

Confirming the supplier invoice also calculates the selling price based on the margin you have chosen for that supplier or for that item, depending on how you have set your mSupply preferences.

You will notice there is a **Prices** tab in the supplier invoice window - this is for use with invoices received in foreign currencies, which will usually be done via the **goods receipt system**.

Each line received on a supplier invoice will be treated as a separate line in your stock. You can manually **consolidate** these later, or set a preference to **automatically consolidate** items with the same batch, expiry date, pack size, location, donor, cost and sell price.

Creating a new supplier invoice

STOP! Don't proceed with creation of a new supplier invoice if the stock came as a result of:

• Your store created a Purchase order to a supplier, in which case you should be following the procedures described under Ordering items from suppliers

- Your store created an internal order to an 'internal' supplier (a virtual store in mSupply), in which case they should have followed the procedure for handling Response requisitions. Provided that they have finalised their customer invoice, a new supplier invoice will be created automatically in your store, populated with the stock lines that they are sending to you.
- A stock transfer to your store from another store in mSupply (and they are **not** responding to a purchase order or internal order from your store), in which case they should have followed the procedure for transferring goods to another store. Provided that they have finalised their customer invoice, a new supplier invoice will be created automatically in your store, populated with the stock lines that they are sending to you.

In these cases, you should **NOT** create a new Supplier invoice, and can skip most of the

following section.

Search for these automatically created invoice using Suppliers>Show invoices...

Depending on the store preferences, the supplier invoice may be finalised. If not, you will be able to add, edit or delete lines on the supplier invoice if what you actually received is different to what the supplier invoice states...

To create a new supplier invoice, navigate to the **Suppliers** tab and click the **New Supplier Invoice** button.

The supplier invoice entry window will open:

	Name		1		Conf	firm da	te: 00/00/0	10		0	Glour Black	
	Their ref									Invoice nu		
	Comment			(Category	None		0			r date: 19/01/2023 itatus: nw

		Amount: 0.00									0 % tax:	0.00
											Total:	0.00
Hold	Export	batch: 0										
Finalise		Aargin: 0.00										

If you have turned on any of the custom stock fields in store preferences they will be displayed as columns (between the Batch and Expiry columns) in the list of invoice lines and the information you entered for these fields will be shown in the appropriate cells.

Information to enter in the main window

Name: The first thing to do is enter the Supplier's name in the **Name** field. Type the first few characters of the supplier's name or code, and then press the *Tab* key. If only one supplier name matches the entry, the supplier's name will be filled in. Otherwise, a list will be displayed:

•	Choose nan	ne – L	×
+			
New			
Name		Code	
ABA CORPORATION L	.TD	200001	^

AK CONSTRUCTION		200006	
AKORN		akom	
ALBERT KONARE		200100	~
<			>
Double-click a name t	o choose it		
	Can	cel Us	e

Double-click the appropriate entry, or click *Cancel* to try again. You can also use the *up* and *down* arrow keys or the "u" and "d" keys on the keyboard to move the highlighted item up or down, then click the **Use** button or use the *Enter* key to choose the highlighted item.

At this point the supplier's name will normally just appear in the **Name** field (and their code will appear at the end of the **Their ref** field) and you can continue as below. However, if the **Can manually link requisition to supplier invoice** preference is turned on for this store (see Store preferences), a list of requisitions the store previously made to that supplier will appear. Select a requisition to associate with this supplier invoice, then click OK:

ID	Entered date	Entered by	Reference	Comment
42	8/11/19	Admin		
41	8/11/19	Admin		
32	8/11/19	Admin		
24	31/10/19	userl		

The supplier invoice window will appear with the name of the supplier you have chosen in the **Name** field:

Name Central Medical Sto	re 👃				Confir	m date : 00/	00/00		er 📕 Bla	ick
Their ref Comment	US				Category	None	•	Invoice number Entry date Status	: 13/11/2019	,

2 💽 🐔	Item(s):								ubtotal: 0 % tax:	0.00
	Amount: 0.00								Total:	0.00
										0.00
fold Export bat	ich: 0									
inalise Marg	pin: 0.00							& Next Delete	OK	

The arrow next to the **Name** field takes you directly to the *Edit Customer/Supplier* window, giving access to all the information relating to the supplier entered.

Their ref: Enter the serial number or delivery note number on the bill the supplier gave you.

Comment: Enter anything that needs to be remembered about this invoice. If you need more room, click on the arrow next to the **Comment** field to give a large area for entering the comment.

Category: Categories created for supplier invoices in *File > Preferences > Invoices 1* are listed here.

Colour: Clicking the colour box presents you with a selection of eight colours. When the list of supplier invoices is displayed, the text of this particular supplier invoice will appear in your chosen colour. The colour does not appear on the supplier invoice itself.

Confirm date: This is normally read only but will be editable if the **Allow entry of dates on invoices** preference is turned on (see the Invoice preferences page for details).

Read-only information at the top of the invoice

There is some information at the top of the invoice that is read-only and cannot be edited:

lier Invoice	
Confirm date : 00/00/00	Colour Black
	Invoice number: 0
Category None	Entry date : 13/11/2019
	Status : nw
	Goods received ID : 0
	Purchase Order ID : 0
	Requisition ID : 32
	Entered by : Admin
	Store: General Warehouse

Invoice number: This is the invoice number. The number is automatically incremented and assigned when the invoice is first saved (which actually occurs when the first line is added to it) and is unique within a store. Note that supplier invoices in different stores could have the same invoice number.

Entry date: The date the invoice was created.

Confirm date: The date the invoice was confirmed. Will be "00/00/00" if the invoice has not been confirmed.

Status: The current status of the supplier invoice:

- nw = new (just created, can still be edited, stock not yet added to mSupply)
- cn = confirmed (stock has been added to mSupply but invoice is still editable)
- fn = finalised (stock has been added to mSupply and the invoice is no longer editable)

Goods received ID: If the supplier invoice was created automatically when a goods received note was finalised then the goods received note's ID will appear here in blue, indicating that it is a link and, if clicked, will open the goods received note. A 0 here indicates there is no linked goods received note.

Purchase order ID: Again, if the supplier invoice was created automatically when a goods received note was finalised then the ID of the purchase order which the goods were ordered on will appear here in blue, indicating that it is a link and, if clicked, will open the purchase order. A 0 here indicates there is no linked purchase order.

Requisition ID: If the supplier invoice was linked to a requisition, the requisition number appears here. You can click on it to be taken directly to the requisition. A 0 here indicates there is no linked requisition.

Entered by: The user name of the user who created the invoice.

Store: The name of the store the invoice belongs to.

Buttons in the supplier invoice window

iew line	Name (Class Ph Their ref Comment Comment Add Items from De requisition	lete line	BD61		Catego Do	None	: 00/00/00		Good	Colour Bla reice number : 0 Entry date : 08/02/2022 Status : nw is received ID : 0 tequisition ID : 0 Entered by : Admin Store : Central Medi	
	Item code	item Name	Denor	Qty	Pack	Batch	Expiry	Cost Price	Sell Price	Price extension	
Ga 💽 Hold finalise	Export bat	er charges Itemià: 0.00 ch: 0 in: 0.00						ОК	& Next	Subtotal: 0 % tax: Total: Delete OK	0.00 0.00 0.00

New line: Add an item to the invoice. See *Adding lines to an invoice* below for more details. To edit a line, double-click on it.

Add items from requisition: Only visible if the supplier invoice is linked to a requisition. Displays a list of items from the linked requisition, which you can add to the supplier invoice. You can add one or more items by highlighting them and clicking OK. To edit a line, double-click on it.

Delete line: Delete item(s) from an invoice. Highlight the line(s), then click this button. Multiple lines can be deleted simultaneously.

Duplicate lines: Select one or more lines on the invoice and click this button to add duplicates of those lines. Great time saver when receiving large quantities of the same item with similar batches into different shelf locations, for example.

Hold checkbox: If checked, the invoice status cannot be changed.

Items on a supplier invoice with new (nw) status have not been entered into the system yet. Putting a new invoice on hold allows you to enter the supplier invoice, but not allow the stock to be available for issuing until all the details have been checked.

Finalise check box: If checked, clicking the OK button will finalise the supplier invoice. Once finalised, the invoice can no longer be edited so be sure first that all the details are correct. Only users with the *Can finalise individual invoices* permission can check this box. Other users will be warned if they try to turn it on, and the check box will automatically uncheck.

When the OK button is clicked, you will be asked to Confirm invoice and enter into stock now?

- If you click **Later** the invoice will still have a new (nw) status
- If you click **Confirm** and the **Finalise box was** not checked, the invoice will be confirmed (cn)
- If you click **Confirm** and the **Finalise box** *was* **checked**, the invoice will be confirmed (cn)
- and finalised (fn)

Should a finalised invoice need to be changed, the entire invoice may be cancelled, and the correct data may be entered as a replacement.

In order to maintain the accuracy of any subsequent audit trail, mSupply creates a transaction which reverses all the stock movements on the invoice being cancelled, having due regard to all appropriate details, such as batch numbers, etc. See Cancelling finalised invoices

If *Confirm supplier invoices without asking* is checked in the "Invoices 1" tab of the Preferences window, then all invoices will be finalised automatically.

If you have the store preferences set to force supplier invoice authorisation, you will not be able to confirm supplier invoices until they have been authorised. See here for details.

Copy: Copies the invoice details to the clipboard, allowing you to paste them into a spreadsheet or email message.

Delete: Deletes the entire invoice. When deleted, there will be no trace of your entry and the invoice number assigned will be reused.

Unless the invoice has a new (nw) status, if you have added lines to an invoice, you must manually delete each line using the **Delete line** button before deleting the invoice. This is intentional, to save the "Oops, I just deleted my invoice with 100 lines on it" feeling.

Invoice status	Description
nw	The invoice has just been created - clicking Delete will automatically delete each line and the entire invoice
sg	The Delete button will only delete the invoice if you have first deleted all lines using the Delete line button
cn	Same as for suggested (sg) status

Invoice status	Description
fn	No changes or deletions can be made and the Delete button will be disabled

Print checkbox: If checked, the supplier invoice or packing slip will be printed when the OK button is clicked. If the supplier invoice has a suggested (sg) status, a packing slip will be printed; otherwise an invoice will be printed.

OK: Saves the changes you have made and exits the window.

OK and Next: Saves the changes you have made and opens a new supplier invoice.

Tabs in the supplier invoice window

General tab

This shows a detailed view of each line on the invoice. This is the tab you see when you first open or create a supplier invoice.

Summary by item tab

Displays a summary of each item's requested quantity, sent quantity and received quantity. Different batch numbers of the same item are consolidated into a single line.

		General	Summary by Item	Summary by Bate	h Price Log	Custom data	
Line	Item Name		Requested Qt	y Sent Qty	Received Qty	Cost Price	Price extension
1	Allopurinol 100mg tab		10	0 100	100	5.30	530.00
;	2 Erythromycin ethylsuccinate 250mg tab/cap		20	0 200	200	2.80	560.00
1	3 Albendazole tab 400mg		40	0 400	300	1.50	450.00

Summary by batch tab

This tab shows each batch but grouped by item and showing summary price information for each batch.

		General Sum	mary by Item Summary	by Batch Price	Log Cu	stom data	
Line	Location	Item Name	Batch	Quantity	Pack Size	Cost Price	Price extension
1		Allopurinol 100mg tab	JJR667	100	1	5.30	530.00
2		Erythromycin ethylsuccinate 250mg tab/cap	QOP876	200	1	2.80	560.00
3		Albendazole tab 400mg	LMN667	200	1	1.50	300.00
4	ŀ	Albendazole tab 400mg	YRN779	100	1	1.50	150.00

Price tab

There can be a lot of information on this tab! It is all detailed in the Price tab section below.

Unsupplied items tab

This tab is only shown if this supplier invoice is the result of a stock transfer from another mSupply store and the supplying store has the *Use EDD placeholder lines in supplier invoices from this store* store preference turned on (see the 26.08. Virtual stores page for details).

				Supplier Invo	ice			
	Name Central Medical Store			Con	firm date : 00/00/00		Colour	Black
	Their ref From invoice number: 33 Comment Stock transfer	Tamaki		Category	None		Invoice number : Entry date :	1 07/02/2022
				Donor		as the customer	Status : Goods received ID :	0
				invoice which gener	ated this invoice in the send Medical Store.	ling store Central	Purchase Order ID : Regulation ID : Entered by :	0
								Hufflepuff Health Centre
		General Summary	by Item	Summary by Batch	Price Unsupplied iter	ns Log

89893	Salbutamol Inhaler	3	10	1 EDD: 30/06/20	22 PO: 19			
 Hold Finalise 	Export batch: 0 Margin: 0.00					OK & Next	Delete	ok 🛛 🖨

The table on this tab shows all placeholder lines that were present on the customer invoice in the supplying store (they represent the quantities of items that could not be supplied). If the item is also present on a purchase order in the supplying store then the *Notes* column contains the Expected Delivery Date of the item and the purchase order this date is taken from. **Note:** this is the expected date the item will be delivered to the supplying store, not your store.

Documents tab

The *Documents* tab on a supplier invoice enables you to save documents and other files relating to the invoice. The tab looks like this:

Name		T.	Confirm date: 00/4	00/00	Colour	Black
Their ref			Category None	8	Invoice number:	0 19/01/2023 nw 0
						mSupply Support Main warehouse
		General Summary by	Item Summary by Batch Price	cuments Log	20010	
pload document Delete doc	ument Download docum	ent			Show	Show all
File n	ine	Created by	Created on	Saved on	Vers	ion no
File n	me	Created by	Created on	Saved on	Vers	ion no
File n	erre	Created by	Created on	Saved on	Vers	ion no
File n	me	Created by	Created on	Saved on	Ves	ion no
File n	me	Created by	Created on	Saved on	Ves	ion no
File e	inte internet in	Created by	Created on	Saved on	Ves	

The table shows you all the files currently uploaded to this invoice.

- **Upload document button:** Click this to upload a document to the invoice. This will open a window enabling you to search for and select the file on your computer. After you've selected it, click on the **Open** button to upload it. If you upload a file with the same name as one already uploaded, mSupply will upload it as a new version of the already uploaded file.
- **Delete document button:** Select a file in the table by clicking on it and click this button to remove it from the invoice.
- **Download document button:** When you click on this button you are presented with two options:
 - **Download:** this will download the file to a location you select on your computer.
 - Download and open: this will download the file to a location you select on your computer and then attempt to open it using the default application on your computer for that file type. If there is no application associated with the file type on your computer then mSupply will tell you that the file could not be opened.

Log tab

The log tab displays all the log entries that have been made regarding this invoice. All log entries are stored in the mSupply log and this tab will display all the log entries in there which were made for this invoice.

Custom data tab

This tab shows the custom fields that have been set up for supplier invoices.

All custom data will be saved with the invoice (i.e. when you click the OK or OK & Next button).

Adding new lines to a supplier invoice

Click the New line button to add a line to the invoice. This window appears:

Item			1			-
Received quantity	0	Invoi	ce quantity		0	New
Pack size	1	Invoid	e pack size		0	
Total quantity:	0.00	Invoice to	tal quantity	0.00		_
Batch			Location			S
Expiry	00-00-00	Volume	e per pack		m3	S
		Weigh	t per pack		0 kg	S
Invoice lin	e unit cost (PGK) 0.000	Adjusted local cost 0.00	% Ma	gin 0.00	Sell pri	ce .000
Price	extension (PGK) 0.00	Donor				
		Cancel	OK		OK & N	lext

The cursor will be in the field ready for you to enter the item name.

Item: Enter as much of the item name (or code) as you know, then press the *Tab* key. As usual, if only one entry matches, it will be filled in. More than one matching entry will present you with a list from you should double-clicking on the required item. The text you type will be matched against both the item name and the code. A match for either will display the item.

To query for an item name or code that *contains*, rather than *starts with*, a string of text, use the asperand (@) wild character. So, for example, to search for "250mg" within an item, enter @250mg in the search field.

Hint: you can use the "up" and "down" arrow keys to change the highlighted item (You can also press *u* to move up and *d* to move down!). Pressing the enter key will choose the highlighted item.

Item name	Item code	Stock on Hand	
cetazolamide 250mg tab	ace250t	0	-
cetylsalicylic acid 100mg tab	ace100t	0	
cetylsalicylic acid 300mg tab	ace300t	0	
ciclovir 200mg tab	aci200t	5000	
ciclovir sodium 250mg inj	aci250t	0

If you did wish to apply a different margin to the whole invoice, click the cancel button, and edit the margin for that supplier by choosing *Supplier* >*Edit supplier* and change the margin. If you wish to apply a different margin to just some lines, you can do this as you enter the lines, as long as *Editing margins* is enabled in the Preferences.

If the the item you are entering is not listed, you can click New item to add it.

Note: it is a good idea to agree upon a standard form for entering items. For example, will you enter an "infant feeding tube" as:

- "infant feeding tube"
- "feeding tube, infant"
- "tube, infant feeding"

Duplicated items can later be merged, but it is better to get it right first time!

If you need to see the full details of the item itself after selecting it, click on the down arrow icon () to the right of the item name field and you will be taken to the item's details window.

Now there are a series of fields to enter to fill in the basic information for the line

Received quantity: How many packs did you receive?

Pack size: How many units are in each pack? Once the item has been selected the item's unit will be displayed after this field. If you also want to enter the number of packs in a carton (the "inner" pack size) and the number of cartons on a pallet (the "outer" pack size) then you can turn on a preference, as described on the 16.03. Invoice preferences page.

Total quantity: mSupply will automatically calculate the total quantity of individual units (received quantity x pack size).

Say you receive 50 boxes of amoxycillin caps, each box containing 10 strips of 10 caps. You would normally enter 50 in the received quantity field and 100 in the pack size field. However, if you normally issue the capsules in strips of 10 to customers (e.g. you allow them to order 20 or 30 capsules), then it will be more convenient to enter a quantity of 500 and a pack size 10.

Pack to one: Clicking this button will automatically change the pack size to 1 and update the **Received quantity** to match. If the **Convert pack to one when receiving** option is turned on for this item (see the 4.01.01. Items - General tab page for details) then this button will not be present but will be replaced with a warning that the pack size will automatically be changed to 1 (and the **Received quantity** updated accordingly) when the **OK** button is clicked or a cost price is entered. If you are using barcoding then the barcode for this batch will automatically be updated to a barcode matching the pack size (1) and manufacturer (if selected). If there is no matching barcode then the barcode selection will be changed to *Remove barcode* and, when the **OK** button is clicked, the barcode will be removed from the batch (you can of course use the *Add one* option to add an appropriate barcode before clicking on the **OK** button).

Invoice quantity: How many packs did the supplier claim to have sent? (Sometimes this is different to the quantity received!)

Invoice pack size: What is the pack size stated on the supplier invoice? It *should* match the received pack size, but if **Pack-to-one** has been applied to the received quantity (see above), this value will show the original pack size on the supplier invoice.

Invoice total quantity: mSupply will automatically calculate the total quantity of individual units stated on the supplier invoice (Invoice quantity x Invoice pack size).

Batch: The batch number or other identifying information. The batch appears on the invoice, so you can use this field to differentiate between brands if you need to (eg you operate using generic names, but occasionally want to give a specific brand- you can put an abbreviation for the brand name here as well as the batch).

Expiry: You can use "/" or "." to separate the day/month/year.

Use whichever date format you have set in your computer (dd/mm/yy or mm/dd/yy or yy/mm/dd). You can enter the year as 2 digits, which will be understood as a date between 1961 and 2060. This should cover the expiry date on most

Location: The location of the item should be entered in this field. Type the first few characters of the location's code and press the *Tab* key on the keyboard to select the correct location. If there is only one location that matches what you typed mSupply will select it for you, otherwise this window will open to allow you to select the right location:

	 Show et al. 	empty	Sea	rch location	
+		available	a1		
New location	🔾 Show a	all			
Code	Description	Location type	Replenishment type	Vol used	Vol. Available
A10A1	A10A1			0	3.224
A10A2	A10A2		Pickface	0	2.184
A10A3	A10A3			0	2.288
A1081	A1081			0	3.224
A1082	A1082			0	2.184
A1083	A1083			0	2.288
A10C1	A10C1			0	3.224
A10C2	A10C2			0	2.184
A10C3	A10C3			0	2.288
A11A1	A11A1			0	3.224
A11A2	A11A2			0	2.184
A11A3	A11A3			0	2.288
A1181	A1181			0	3.224
A1182	A1182			0	2.184
6/901	tem Name: Amoxicillin 250mg Tab	plet			
	Volume: 0 estricted to No Restriction			Cancel	OK

Double-click on the location in the table to select it. You can refine the list by selecting the **Show available** or **Show empty** radio buttons:

- **Show available:** If this is selected the list will only show those locations that have enough volume left in them to accepot the volume in this line. For this to be useful, the locations must have a volume entered and the stock you are receiving must have a volume per pack value.
- **Show empty:** If this is selected the list will only show those locations that have nothing in them at all (this does not use volume, it uses the presence of stock in that location).

Volume per pack: How much space the pack occupies in metres cubed (m3).

Weight per pack: The weight of the pack in kilograms (kg).

Invoice line unit cost: Enter your **cost price** for one pack of the pack size you entered above. If your supplier's currency is different to that of mSupply the cost price will appears in the supplier's currency.

If you have set a default selling price for this item, if you set the **Invoice line unit cost** to zero after setting it to some value, you will be asked to confirm whether you want to zero the cost price. If you confirm the change, the **Sell price** and **Price extension** will be set to zero.

Adjusted local cost: Displays the cost of a single unit of the item in local currency.

% Margin and sell price: If you have allowed editing of these fields in Preferences, you can adjust the margin (and the sell price will adjust automatically), or you can adjust the sell price (and the margin will adjust automatically).

If you do not set it to something else, the sell price will be set to the item's default sell price.

Manufacturer: This field displays the name of the manufacturer of the item. It will only be shown if you have turned the *Able to specify manufacturer when receiving, ordering or quoting for items* preference on in the store preferences.

Entering a manufacturer follows the same pattern as entering an item or supplier - type the first few letters of the manufacturer's name or code, and press the *Tab* key. Choose the required manufacturer from the list if more than one is displayed.

You can add a new manufacturer by clicking on the New button.

Donor: The donor of the item can be entered to this field. A valid donor should be entered, type the wildcard character '@' and press the TAB button to view your list of donors.

Price extension: This information field provides the cost price in local currency for the total quantity of the item you have entered.

Custom fields 1-8: The appearance of these fields is controlled by the Custom stock field preferences. Any information you enter in these fields will be displayed wherever stock information is displayed (e.g. when issuing stock on a customer invoice or when viewing the stock of an item on the stock tab of the item details window). The fields can also be reported on so they are an important and powerful way of tracking different categories of stock. For full details please see Custom stock fields.

Click *OK* if you are finished, or *OK* & *next* to add another line. (The invoice lines added will be displayed in Items Display Field.)Click *Cancel* to exit to the main screen without saving any of the details.

mSupply provides the feature of receiving service items into stock. Service items are items that are not normally held in stock and are called non-stock items in mSupply. See here for more information on those. You might be tempted to use service items to manage assets - if you are you might find the mSupply asset management functionality better. See the 21.02. Asset management page for details.

If the *Convert pack to 1 when receiving* preference is turned on for the item (see the **4.01.01**. Items - General tab page for details), the **Pack size** field will be changed to 1 and the **Cost price**, **Volume per pack** and **Weight per pack** field values will all be re-

calculated when you enter the **Cost price** field value or click on the **OK** button. A warning in red text will be displayed on the window if the preference is turned on so that you don't get any nasty surprises when the values suddenly change!

PLEASE NOTE: There is a preference to prevent the adding of expired stock to supplier invoices. See the 26.07. Virtual stores page for details.

Editing lines on a supplier invoice

Supplier invoice lines can be edited at any time until the invoice is finalised.

If the SI has been finalised, it needs to be un-finalised in order to edit lines. Contact support on support@msupply.org.nz

To edit a line, simply double-click on the line you wish to edit.

Editing lines if stock has been issued

If you have already issued stock of this line to a customer, you will be warned with a window like this:

Clicking **View issued invoices** will show you a list of customer invoices containing stock entered on this particular line:

Name	Invoice #	Status	Туре	Quantity	1
ARARA CLINIC	3722	sg	ci	100	
					1
		Total	quantity:	100	

Clicking **OK** will take you to the item issue window:

	Add/ed	it supplier invoice line
Item	Amoxycillin 500mg Tablet	amo 500t
Received quantity	250 Units issued: 10	Invoice quantity 0
Pack size	1000 Tablet	Invoice pack size 0
Total quantity:	250,000.00	Invoice total quantity 0.00
Batch	LOT2356/45	Location C1
Expiry	30/06/2026	Volume per pack 0 m3 🕥
		Weight per pack 0 kg 😒
Invoice li	ne unit cost (USD) 1.74	Adjusted local cost % Margin Sell price 1.74 0.00 1.74
Pric	e extension (USD) 435.00	
		Cancel OK OK & Next

The item and pack size fields will not be editable and you may not reduce the received quantity to a figure lower than the quantity already issued. However, if you have the *Update pack size, cost and sell price* preference turned on (see the 24.15 Managing users page for details) you will also be able to edit the pack size field. There is a caveat; if the stock has been involved in a repack or a split, the pack size field will always remain uneditable.

In the screenshot above you will notice the "units issued: 10" text in blue to the right of the *Quantity* field. This will only be present if stock has already be issued to customers. You can click on that text to display a list of issued invoices as described above with the **View issued invoices** button.

Note that the **OK & Next** button is very useful for editing a whole invoice. Simply double-click the first line of the invoice, then use the **OK & Next** button to go from line to line.

Vaccines

There is extra functionality for vaccines to enable you to record the VVM status. To turn it on, you must turn on the *Able to specify VVM status when receiving items* store preference; see the 26.07. Virtual stores page for details.

When this preference is turned on, the field appears on the supplier invoice line entry/edit window here:

		Add/edit :	supplier invoice li	ne	
Item					•
Received quantity	0			Invoice quantity	0 New item
Pack size	1			Invoice pack size	0
Total quantity	0.00			Invoice total quantity	0.00
Batch				Location	<u></u>
Expiry	00/00/00	VVM status	Please select	Volume per pack	m3 🕵
				Weight per pack	0 kg 🕵
			Adjusted local cost	% Margin	Sell price
Pri	ce per pack (USD) 0.00)	0.00	0.00	0.00
Price	e extension (USD) 0.00)			
			Cance	н ок	OK & Next

The **VVM status field** is populated with the statuses set up in the system. See the 20.01. Vaccine Vial Monitoring (VVM) page for details on how to do that.

If you are editing an existing line on the supplier invoice then the **VVM status** field will display the status selected for the invoice line or *Please select...* if it doesn't have one set already.

Working with the list of invoice lines

Resizing columns: These columns are resizable. If any of the column data is cut-off or remains hidden, the column width can be increased or decreased by positioning the mouse at the borders of the column. The cursor changes to a cross with arrowheads on the horizontal bar. Click and drag the cursor to the left or right.

7

Line	Item Name 🔶	 Qty 	Pack	Batch	Expiry	Price	Price exten
1	BOTTLE, TABLET, PLASTIC, W/SCRE	1000	1			0.54	545.90
2	BOTTLE, TABLET, PLASTIC, W/SCRE	42678	1			0.45	19,475.25
3	BOTTLE, TABLET, PLASTIC, W/SCRE	94810	1			0.69	66,077.83
4	BOTTLE, TABLET, PLASTIC, W/SCRE	15408	1			1.05	16,291.65
5	BOTTLE, LIQUID, PLASTIC, W/SCREW	14800	1			1.69	25,100.80
6	BOTTLE, LIQUID, PLASTIC, W/SCREW	7812	1			2.85	22,275.14
7	BOTTLE, LIQUID, PLASTIC, W/SCREW	864	1			8.42	7,280.93

Sorting columns: Columns may be sorted either in ascending or descending order by clicking on the header.

ine	Item Name	Qty
5	BOTTLE, LIQUID, PLASTIC, W/SCREW	148(

ine	Item Name 🛛 🔻	Qty
3	BOTTLE, TABLET, PLASTIC, W/SCRE	9481

The order of the columns can be re-arranged by clicking on the header and dragging it to the new position.

Deleting a line on a supplier invoice

To delete a line, do one of the following:

- Click on the line you wish to delete, then click on the **Delete line** 🔤 button
- Double-click the line to edit it (see above) and set its quantity to zero.

Click the **OK** button. You will be asked for confirmation. Click **OK** to proceed.

You cannot delete a line from a supplier invoice that has been finalised.

Selling price calculations in mSupply

mSupply uses a number of items of information to calculate the selling price of an item. This enables you to have the price calculated just the way you like it.

Here's the logic mSupply uses:

- Does the item have a selling price specified? If it does, this price will be used regardless of any other information. Note that the price entered for the item is for one unit. The price will be multiplied by the pack size to get the selling price for the line.
- If either the supplier margin or the item margin is specified as zero, then the other (non-zero) value will be used?
- If a margin is specified for both the supplier and the item, the Preference *Item margin overrides supplier margin* will be examined to see if it is on or off. If it is set, the item margin will be used, if not the supplier margin will be used.

For example: <HTML>

Cost price	Pack size	Supplier margin	ltem margin	Preference set for Item margin overriding Supplier margin	ltem price	Price used
100	100	6	10	yes	1.15	115
100	100	6	10	no	1.15	115
100	100	6	10	yes	0	110
100	100	6	10	no	0	106
100	100	0	10	no	0	110
100	100	6	0	yes	0	106

</HTML>

<html>

</HTML>

Note that if you have turned on "allow editing margins and sell prices on supplier invoices" in the Preferences you will be able to over-ride the prices mSupply calculates.

Price tab

This tab provides functions for applying discounts and apportioning different charges to items.

Applying a discount to the whole invoice

If a supplier gives a discount at the bottom of the invoice rather than adjusting the price of each invoice line, you can use the discount button.

1		Su	oplier invoic	e						×

This window will be shown:

\$ •	Apply discount				
Apply discount on Discount %	Cost Price	Recalculate	sell price		
What will happen?					
Enter a positve num invoice by the percer Enter a negative nur Check the "Recalcula the basis of the new	ntage you have er nber to increase p te sell price" butt	ntered. prices.			

If you enter "5" the cost price of each line will be reduced by 5%, and the invoice total will be recalculated. It should then match the amount the supplier is actually charging you.

If you want the sell price calculated based on the new cost price, check the "Recalculate sell price" checkbox. The selling price rules as described above will still apply.

Applying local charges

Local charges are any charges you want to add to the cost of individual items on this invoice in your data file's local currency (i.e. the default currency used in your data file - this might not be the same as the currency you use when you visit a local shop!). These could be administration charges, local freight charges, handling charges etc.

You can either enter the amount of local charge to apply to each invoice line or the total amount of charges to apply to the invoice.

Entering local charge amounts on each invoice line

You do this by directly entering the amounts to apply to each line in the cells of the *Local charge* column in the table. As you do this, mSupply will automatically increase the sell price per pack by the amount you have entered divided by the number of packs for the line and will add the amount you entered to the current value in the **Local charges** field above the table.

Entering the total amount to apply to the whole invoice

To do this, you simply enter the total amount in the **Local charges** field above the table. When you do that, mSupply will automatically apply a portion of the local charges to each invoice line's sell price, according to the ratio of that line's *Price extension* to the sum of all the Price extensions of all lines on the invoice. You can see how much mSupply added to each line in the *Local charge* column. If you wish, you can edit the local charges applied to each line after this by simply clicking on the appropriate *Local charge* cell in the table and typing in the cost to apply. As you do that, mSupply will keep track of the total local charges applied to all lines in the **Local charges** field.

Applying foreign currency charges

These charges are applied in the currency selected in the currency selected in the **Currency** drop down list, following the rate displayed in the **Currency rate** field (which you can manually adjust if the default shown by mSupply is not what you require). The charges could be, for example, international freight charges or administration charges.

Simply type the amount of foreign currency charges to apply to the whole invoice in the **Extra foreign currency charges** field and mSupply will apply a portion of the whole amount to each line, according to the ratio of the line's *Price extension* to the sum of the Price extensions of all lines. mSupply will automatically update the sell price value for each item.

Applying other charges

These charges will NOT be added to the sell or cost prices of the items on the invoice. You enter them in the *Other charges* section below the table of items:

• Item(s) field: Enter what the charges are for in this field.

• **Amount** field: Enter the total amount of the other charges in here. When you do this, you will see the amount added directly to the *Subtotal* and *Total* amounts and none of it will be added to the sell or cost prices of the individual items in the table.

Applying tax to the invoice

Tax, like other charges, will not be added to the sell or cost prices of the individual items. To add tax, click on the % *tax* rate below the *Subtotal* field on the right hand side below the table of items and enter the rate you wish to use. mSupply will calculate the amount of tax (the % you entered of the *Subtotal* value) and automatically add it to the *Subtotal* value to give you the new *Total*.

If you have set a default tax rate in the preferences (see General preferences) you will see it applied as soon as you open the invoice. Also, you will only be able to edit the tax rate if the *Allow editing tax rate and amount on invoices* preference is turned on (see Invoices preferences).

Viewing supplier invoices

To view or edit any supplier invoice, choose *Supplier>Show invoices*. The details of how this works is virtually identical to that of viewing customer invoices.

Rapid access to Goods Received note from Supplier invoice, and vice versa

If the Supplier Invoice came from a Goods Receipt, (which in turn came from a Purchase Order), Supplier invoices show the *Goods Received* transaction number in the upper right area of the window. By clicking on that, the *Goods received* transaction will be displayed. Similarly, the *Edit goods received* list has a link *Click here to open Supplier inv* which will display the required invoice.

Processing supplier invoices

In order to bring the stock on a supplier invoice in to your store, you will need to confirm it.

If the supplier invoice was created by mSupply, then depending on the store preferences, the supplier invoice may or may not be on Hold or Finalised:

- If the supplier invoice is **On hold**, then the supplier invoice can not be processed (moved from one status to another). You will need to take the supplier invoice off Hold in order to process it.
- To toggle the supplier invoice between on and off Hold, click on the Hold checkbox.
- You can print the supplier invoice even if it is on Hold.
- If the supplier invoice was finalised when you first opened it, then the stock has *already* been (logically) brought in to your store, and you don't need to do any processing! (In fact, you can't do any processing of it, even if you wanted to.)
- If the supplier invoice status is nw, then the stock as described on the supplier invoice has *not* been brought in to your store yet.
- To close the supplier invoice, click on the **OK** button. If the supplier invoice is not on *Hold*, then you should be prompted with the pop-up message below.

- If you click **Later**, the supplier invoice will close, the supplier invoice status will stay at nw, and the stock will *not* be brought in to your store.
- :Once you are happy with the details of the stock as described on the supplier invoice (taking special notice of the Cost Prices), and you are ready to bring the stock in to your store, click on the OK button, and then click Confirm. The supplier invoice will close, the stock *will* be brought in to your store, and the supplier invoice status will change to cn.
- Depending on your user permissions, you may be able to edit details of the stock even after it has been brought in to your store provided that the status remains at cn
- If you click on the Finalise tick-box, then the status will change to fn and you will no longer be able to edit any details on the supplier invoice.

Printing supplier invoices

There are 2 ways to print a supplier invoice but both require it to be open. The first way is to check the print checkbox in the bottom right hand corner of the supplier invoice window:

1 -	Su	pplie	r invoice				-	
Name Their ref Comment New line Delete line General Summary by Item Summary by Batch Price	Entry date : 19/03/2015 Confirm date : 00/00/00 Period 1/01/2014 - 31/12/20 * Category None *				/00/00/12/20 ▼	Colour : Black Invoice number : 0 Status : nw Goods receive ID : 0 Purchase Order ID : 0 Entered by : SUSSOL Store : National Medical St		
L Item Name	Qty	Pack	Batch	Expiry	Cost Price	Sell Price	Price extension	<u>^</u>
								~
< Other charges								>
Item(s): Amount:	0.00						Subtotal: Total:	0.00 0.00 0.00
Hold Export batch: 0 Finalize Margin: 0.00					OK & Next	Delete	ОК	- 4

When the checkbox is checked and you click on the **OK** button, the printing options window is displayed. The invoice will be **closed** after printing.

The second way is to hold down the Shift key on the keyboard and click on the printer icon in the bottom right hand corner instead of checking it. This will also open the printing options window but the invoice will **stay open** after printing.

This is the printing options window:

• •	Printing optic	ons			
Form to use Message	Summary landscape no logo	 Remember this choice Print pallet labels Destination 			
		 Printer Preview PDF file on disk Email PDF Export to Excel 			
		Cancel OK			

- Form to use drop down list: Select the form you want to use to print the invoice. There may be several in the list. There is also a *None* option if you don't want to print the invoice but just want to print pallet labels.
- **Remember this choice** checkbox: The form you choose in the Form to use drop down list will be selected (and everyone else!) next time the supplier invoice printing options window is opened if this checkbox is checked.
- **Print pallet labels** checkbox: Check this if you want 100x150mm pallet labels in a specific format to be printed out from a label printer. A label will be printed for each line on the supplier invoice. Note: the label printer has to be installed and configured in mSupply before this option will work see Label printer installation and Printing preferences (setup) for details.
- **Destination** radio buttons:
 - **Printer**: the invoice will be printed out straight away.
 - **Preview**: a preview of what the invoice will look like when it is printed will be displayed in your installed PDF file reader. You might be able to print the invoice from the PDF reader, depending on its features.
 - $\circ\,$ PDF file on disk: the invoice will be saved to disk in PDF format.
 - Email PDF: the invoice will be created as a PDF file and attached to an email for you to send. You can double-click the email attachment to see a preview of the invoice. The email preferences in *File > Preferences* should be setup correctly before using this feature.
 - **Export to Excel**: the invoice will be exported as a spreadsheet file and opened for you (provided you have a spreadsheet application installed).

When you click on the OK button the invoice will be printed in the form you have chosen.

Previous: 7. Receiving Goods | | Next: 7.02. Goods receipt

If you don't want to allow this, then simply turn the user preference off
