

# ARCHIVED Setting up mSupply mobile

 Note - we will complete these steps for you. The following instructions are for your information only.

## Requirements

- A server running mSupply with a web server license registered
- Sync server has a static IP and any network permissions required configured
- A mobile tablet fitting the recommended specifications [here](#)

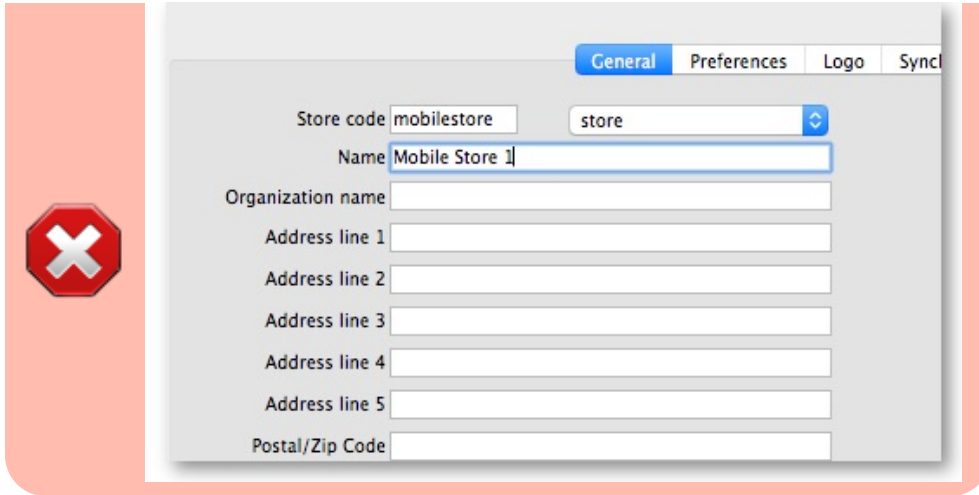

## Adding a store

On mSupply desktop go to Special > Stores > New Store

Enter the Store Code and Store Name

Click on the Master List tab and select a Master List

Click OK

Click OK again

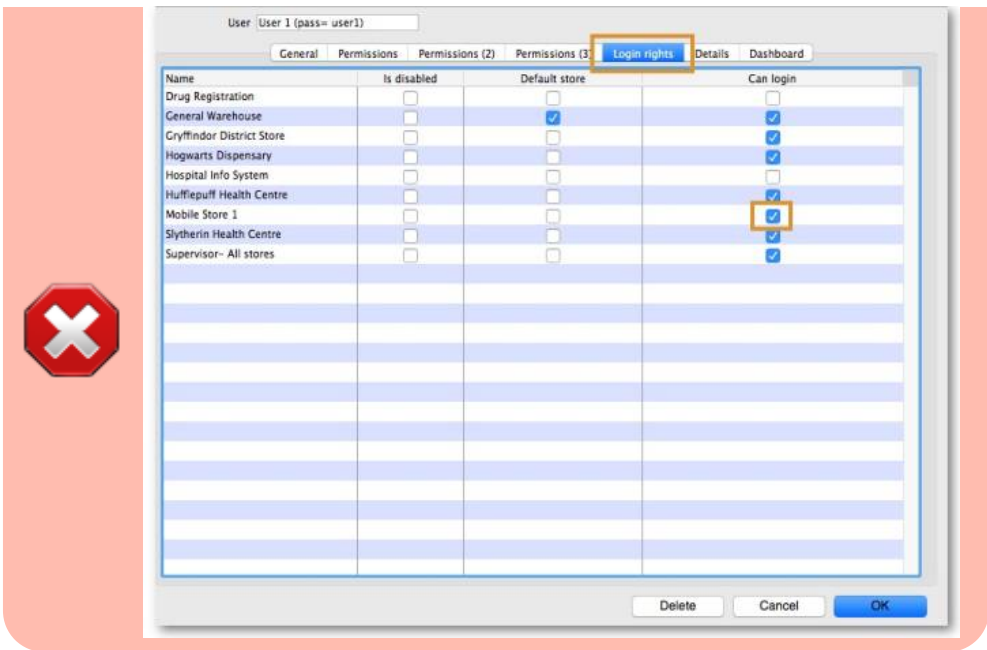

### User Access

Next you need to make the current user have access to the store you have just set up.

Go to Admin > Edit Users

Select the user and go to Login Rights.

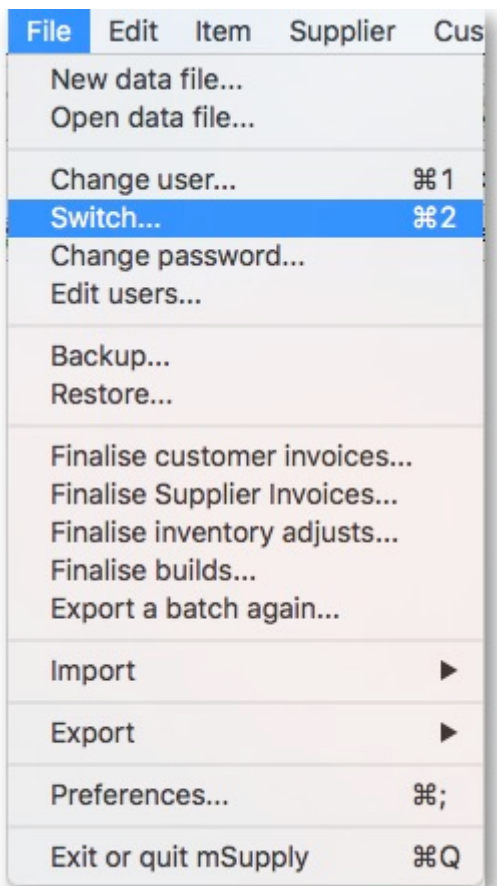

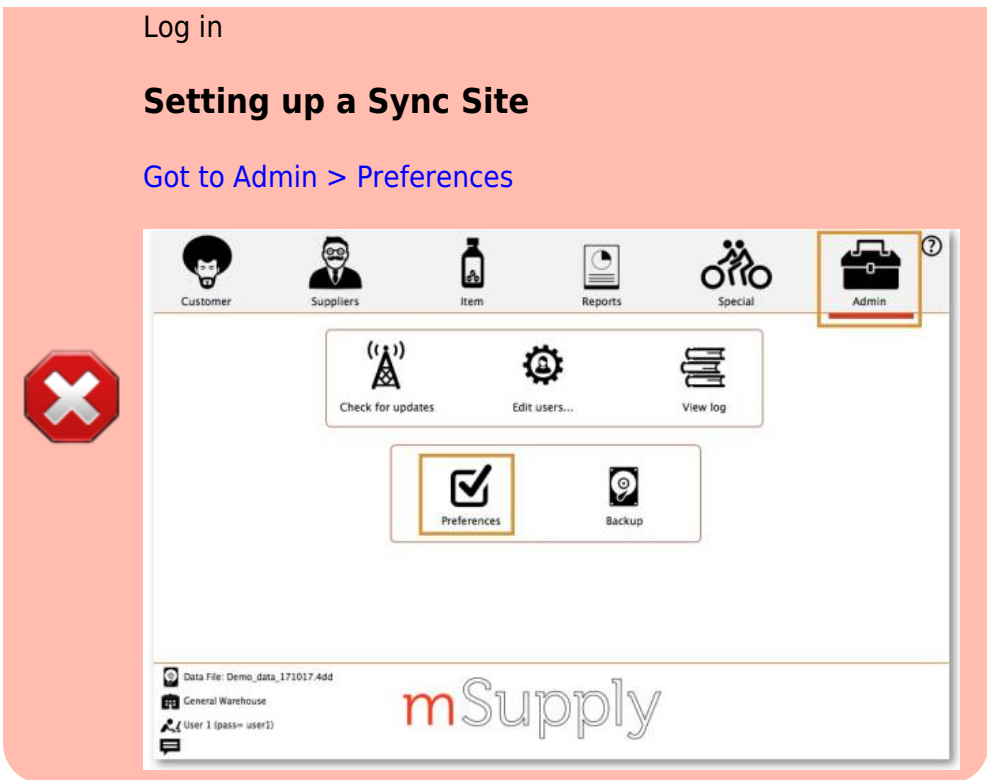

Select the new Store

### Logging in to the Store

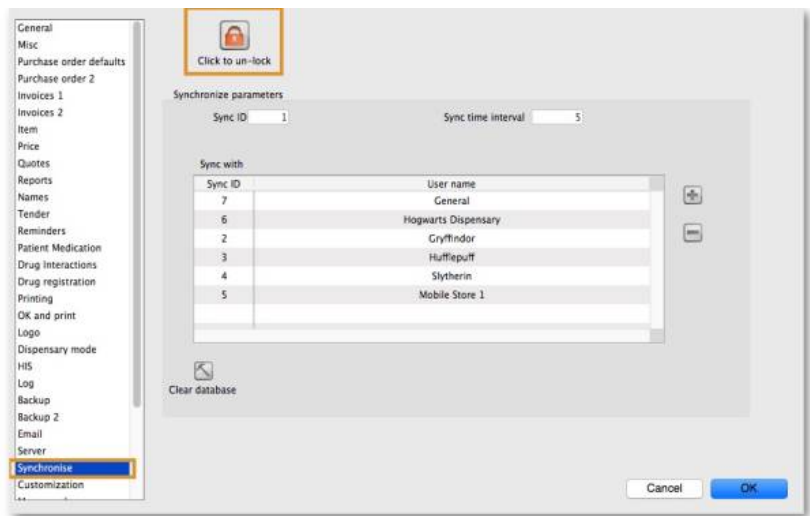

Now, you need to log in to the new Store

Go to File > Switch (or 'cmd 2' (apple) or 'ctrl 2' (windows))

On the Synchronise tab on the left-hand side and click on the unlock button and enter the password

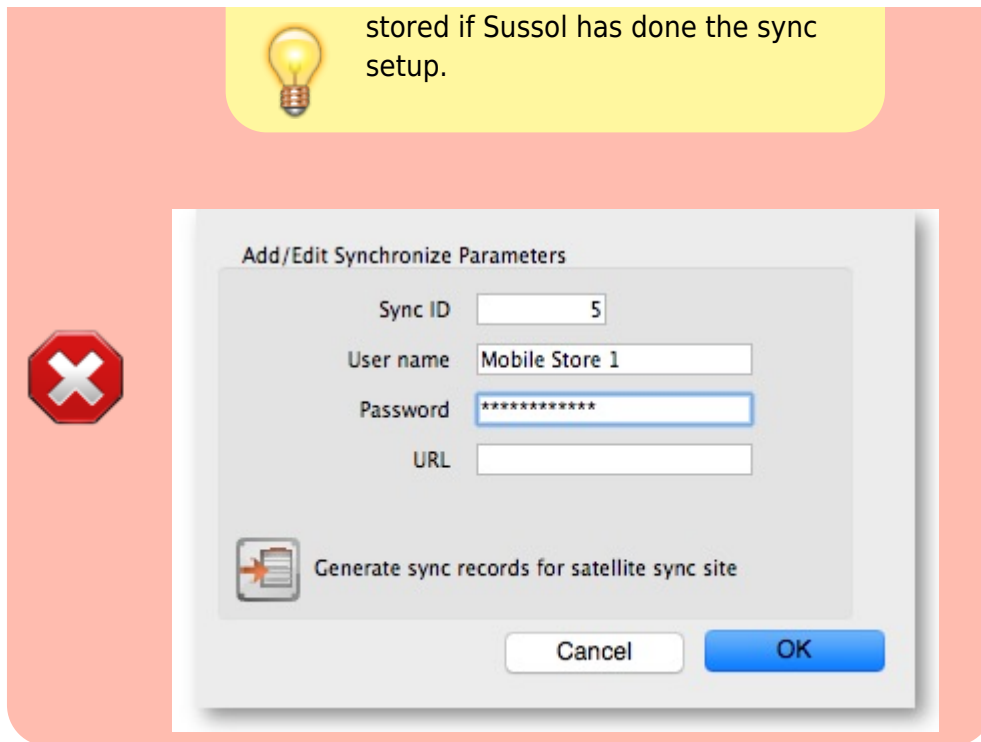

Add new Sync Site

Enter ID, Username and Password and click OK

 Note - Keep track of these details, if they are lost you'll have to resynchronise from scratch! Sussol will typically have them securely

Log in to the Store

Go to Special > Stores

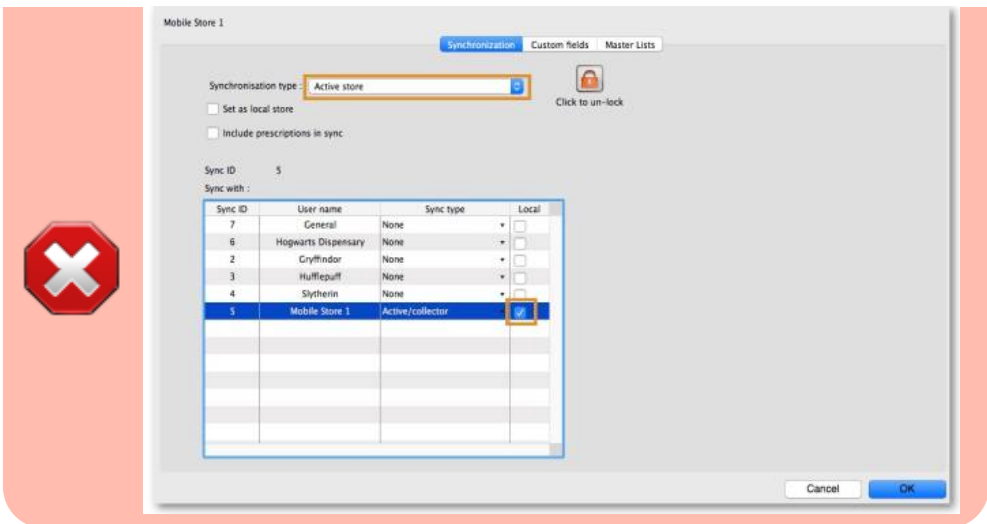

Double-click the Store

Click the unlock button and enter password

Set Synchronisation type to active store

Select store (as local)

Click OK

Click the unlock button and enter password again

Set Sync type to Collector and sync type to Active/Collector

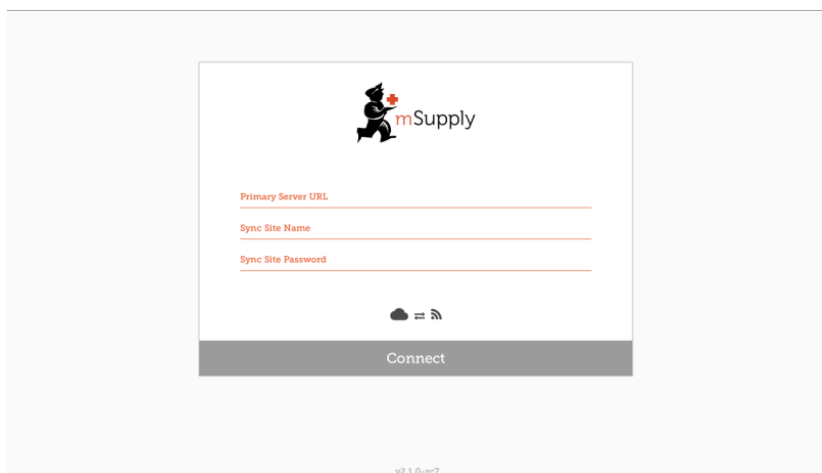

Click OK

Click OK again

Start the web server

### Initialising mSupply Mobile on Device

After installing the app, you must do an initialisation of the data for the store the tablet is going to be used in. All above steps must be complete for this to work. The first screen upon opening the app looks as follows:

You must enter:

1. The correct URL for your mSupply server, usually using SSL/HTTPS protocol for security.
2. Sync site name as defined above in this guide.
3. Password for the sync site name

`https://my.server.org:(mySSLportNumber)`

---

My clinic's sync site name

---

.....

---

**Connect**

Once you have entered the information, click "Connect" to start sync:

`http://192.168.4.16:8088`

---

demo\_clinic

---

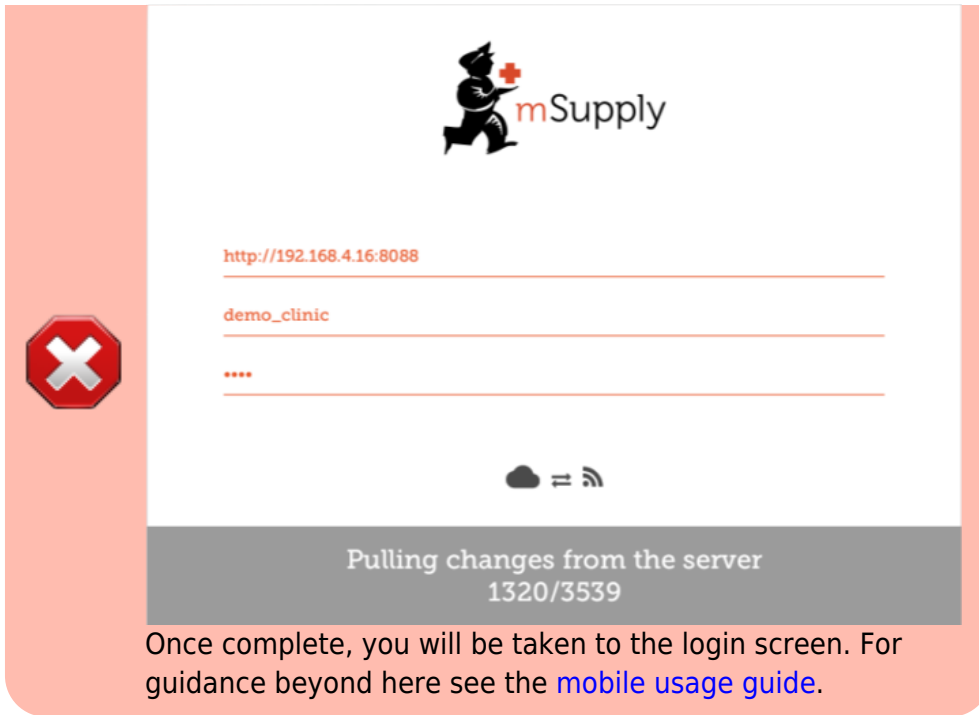

....

---

**Initialising...**

Initialisation can take between 1 and 15 minutes, depending on the number of records on the server related to the site being synced. Once the server has found all the records to sync, mSupply Mobile will start pulling them adaptively between 20 and 500 records at a time depending on the connection speed. If connection is lost or you closed the app, you can resume sync where it stopped by entering the exact same details (will go back to square one if you get it wrong).

The screenshot shows the mSupply mobile application interface during a sync process. At the top, the mSupply logo is displayed. Below it, there are three input fields containing the following text: `http://192.168.4.16:8088`, `demo_clinic`, and `....`. A red octagonal icon with a white 'X' is positioned on the left side of the screen. At the bottom, a grey bar indicates the sync progress: "Pulling changes from the server 1320/3539".

Once complete, you will be taken to the login screen. For guidance beyond here see the [mobile usage guide](#).

Note that the login details here are for the **mSupply user** that can login into the synchronised store, not the store details that were entered for sync above.

The screenshot shows the mSupply login screen. It features the mSupply logo at the top. Below the logo, the text "demo\_clinic" is displayed. There are two input fields labeled "User Name" and "Password". At the bottom, there is a grey button labeled "Login". In the bottom left corner, there is a "LANGUAGE" option with a globe icon. In the bottom right corner, the version number "v2.1.1" is visible.

### Limiting Initial Sync Record Count

If the amount of records to sync are greater than around 50,000 it may take over an hour to sync on a *good* connection. Many hours on a slow connection. For this reason it is possible in mSupply to limit the amount of
