

When you select a Preference, the Stores list shows the settings for each of the stores in the **Current** column.

Editing preferences

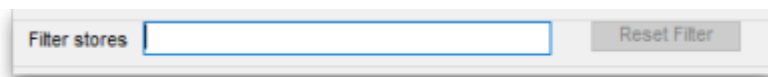

To change a selected preference, tick the checkbox in the **New** column to switch the preference on/off.

You can apply a setting to *all* displayed stores with the **All/None** checkbox on the far-right panel. Once you're done making changes for this preference, click the **Save Changes** button to write your preference settings to the database. The **Current** column will be updated with the new settings to reflect the saved changes.

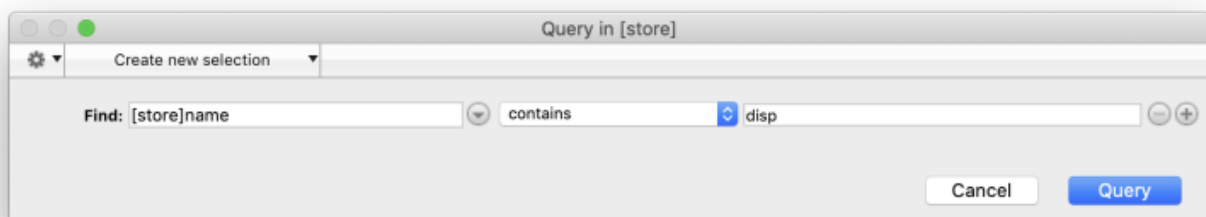

Please note: You *must* save changes before switching to another Preference, or your changes will be lost.

Filtering stores

If you only wish to make changes to a subset of stores, you can filter the Stores list with the Filter bar in the top panel:

In the current implementation, when you click the text entry field, you will be presented with a simple Query editor:

Submitting this query will update the list of Stores accordingly. Restore the full list of Stores with the **Reset Filter** button.
