

Transaction Codes

*

Transaction type codes

mSupply uses a series of two letter codes to denote the different types of transactions it can handle.

Code	Meaning
ci	customer invoice (goods supplied to a customer)
cc	customer credit (goods returned by a customer)
si	supplier invoice (goods received from a supplier)
sc	supplier credit (goods returned by you to a supplier)
sr	repack (A stock line is broken down into smaller pack sizes)
bu	build- an internal transaction where you manufacture (build) items from raw materials in stock.
rc	receipt (cash receipt) from a customer (a customer pays for invoices issued)
ps	payment (cash payment) to a supplier

Transaction Status Codes

Transaction status

mSupply uses a set of two letter codes to keep track of the status of each transaction: on:

Code	Meaning
nw	new invoice
sg	Suggested
cn	Confirmed
fn	Finalised
wp	The order has been received over the internet (a "web" order), and it is currently being processed
wf	The order has been received over the internet (a "web" order), and it is finalised

For orders

Code	Meaning
sg	The order has been created, but the "stock on order" value for each item has not yet been updated. If another order for the same item is processed, mSupply will not take account of suggested orders. Suggested orders can be deleted.
cn	The "stock on order value" for each item has been updated. Confirmed orders can also be "unconfirmed" if you cancel an order. Items & quantities can still be edited.
fn	The order has been received, a price calculation done, and the order has been turned into a "supplier invoice". The order is now completed, and can be deleted.

For Supplier invoices

Code	Meaning
nw	The "new supplier invoice" menu item has been chosen, but the OK button on the invoice has not yet been pressed, or confirming the invoice has been postponed. (This option is only available if "confirm supplier invoices automatically" is unchecked in the Preferences). <i>Note: quitting mSupply by choosing the "quit" command from the file menu or click the application close box (Windows only) while you are entering a new supplier invoice will result in the invoice being saved with status "nw". To confirm the invoice, open it then click the OK button</i>
sg	This status is not used for supplier invoices- invoices of status "nw" become status "cn" when the OK button on the form is pressed
cn	The invoice has been entered, but can still be edited.
fn	The invoice has been finalised , and can no longer be edited.

For Customer invoices

Code	Meaning
nw	The "customer new invoice..." menu item has been chosen, but the OK or "confirm" button has not yet been pressed.
sg	The invoice has been created. An order from a customer has been received, and the items put against the invoice are still in your store, but are no longer "available" to issue to other customers. (i.e., the "available" amount for each item line has been reduced, but the "quantity" amount has not). Note that if "one step confirm" is checked in the Preferences, then customer invoices move straight from being status "nw" to status "cn"
cn	The invoice has been confirmed by clicking the "confirm" button, which is done when the stock leaves the store. Lines that couldn't be supplied are added to the "backorder" file. The invoice can still be edited.
fn	The invoice has been finalised, and can no longer be edited

For Builds

Code	Meaning
nw	The build is being entered for the first time.
sg	Suggested - the raw materials are taken out of stock, but the finished product (the item to build) is not yet entered into stock."
cn	Confirmed - the raw materials are taken out of stock and the finished product is entered into stock
fn	Finalised - the build can no longer be edited
