Adding or removing cash

All transactions involving cash movement will be *automatically* added to the cash register. For example, receiving payments for prescriptions or making payments of supplier invoices.

You can set permissions to allow users to manually add **cash in** or take **cash out** from the cash register. For example, this may be necessary for depositing cash in the bank.

Permissions for manual cash in/out transactions

1. Go to **Admin > Edit Users** > double click user name.
2. In the **Permissions (2)** tab, check the **Create cash transactions** box to allow the user to perform manual cash in/out transactions.
3. Click **OK** until you return to the navigator screen.

The screenshot shows the 'Edit user' dialog box for 'user 1 (pass= user1)'. The 'Permissions (2)' tab is active, displaying a list of permissions organized into several categories. The 'Create cash transactions' checkbox under the 'Invoices' section is highlighted with a red box.
