11.04. Cash register

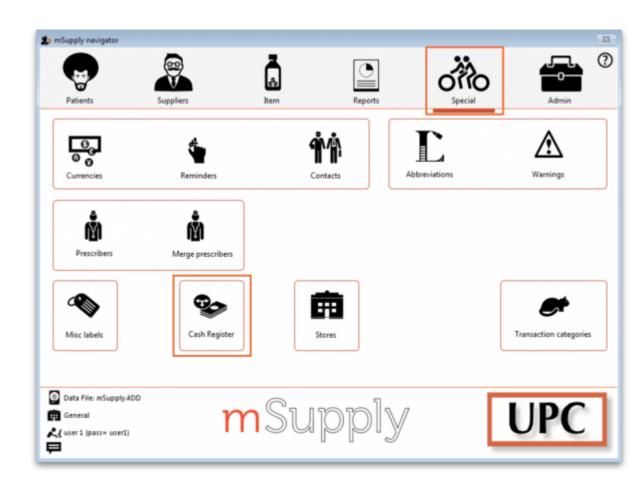

The **Cash Register** allows you to see and create in and out payments for the customers and patients in your store. It also shows you the current balance of the cash register and you can use it to manage cash reconciliation in a store if you are using a physical cash repository of some sort.

Any payments made in the customer receipts module, supplier payments module or made on a prescription will also be show here. Those payments differ to those made in this module in that they are attached to a transaction (customer invoice or prescription). Any payments made in this module are not attached to any other transactions.

Viewing the cash register

- 1. Click the **Special** tab in the navigator.
- 2. Click the Cash Register button:

From 26/04	2020 🎹 To 26/0	4/2021 🛄		Transaction type	All transactions	+	1
Patient/Facil	ity 🖸 Beard	ch by Name or code	Name or code			Add transact	ion Print
Number	Name	Type	Defined Reason		Comment	Amount	Confirm date

By default the window will show all of today's transactions when it opens but you can use the filters at the top in the *Filter by* section to see just the payments you want in the table.

The *Current register balance* shows you the current balance of all the in and out payments in the datafile - this is the amount of cash you should have in your physical cash repository if you're using one.

For each transaction in the table you can see:

- Who the cash was received from or paid to
- Payment type:
 - **rc** is a cash receipt (cash paid to you by a customer or patient)
 - **ps** is a cash payment (cash paid by you to a supplier)
- Amount received or paid, where a positive number is cash in and a negative number is cash out
- Date of the transaction
- Other details such as reasons and comments

Adding or removing cash

All transactions involving payments will be *automatically* added to the cash register. Those payments are made using the customer receipts module, the supplier payments pmodule or by receiving payments on a prescription and all those payments are conncted to their transaction.

You can use this cash register functionality to manually add **cash in** or take **cash out** from the cash register, without it being attached to another transaction. For example, this may be necessary for depositing cash in the bank.

You can set permissions to allow users to manually add **cash in** or take **cash out** from the cash register.

Permissions for manual cash in/out transactions

Users need to have the **Create cash transactions** permission set on the **Permissions(2)** tab of the user's details window to be able to add or remove cash from the cash register. See the Managing users page for details.

Manual cash in/out transactions

1. Click the Add transaction button:
