Print signature section on Purchase Orders

When this box is checked a section will be printed on Purchase Orders that shows the authorising officer(s) and includes a space for signatures. This is applicable if you print Purchase Orders and post them to suppliers, but should most likely be turned off if you send Purchase Orders via email.

Number of decimal places for price field:

This field allows you to specify the number of decimal places that may be entered in the price field on Purchase Orders. This will override the currency format setting in the Misc tab only for the price field on Purchase Orders.

Prefix printed Purchase Order number with

Enter any required prefix in this field

Default number of days usage to evaluate when creating an order

Enter the number of days to “look back” when evaluating each item's usage to calculate the amount of stock needed. Entering a higher number will give a better long term average, but will mean that orders take longer to create.

Purchase Order category must be chosen

Check if you need a Purchase order category to be chosen on every purchase order.

When clicking the **OK** button on a purchase order you can override this setting by holding down the shift key as you click **OK**

Expected delivery date must be chosen:

Check if required, leave unchecked if not.

Show purchase order custom field

Check this box if you would like an extra field added that you can customise and use for your own purposes.

The space below this check box is for you to enter the name of your custom field.

Purchase order contract date must be entered

If you require this information on your purchase orders then check this box.

Purchase order advance payment date must be entered

Check if required, leave unchecked if not.

Purchase order received at port date must be entered

If you require this information on your purchase orders then check this box.

Procurement is done centrally

This option is only relevant for a synchronised system (refer [Remote Synchronisation](#)). If you select this option, purchase orders for stores on sync satellites can only be prepared, confirmed and finalised on the sync primary. There is a work-around if you need some stores on some sync satellites to do their own purchase orders. For help with setting that up, contact support@msupply.org.nz.

Labels for custom fields on Purchase Order categories:

Fields 1 and 2 accept text entries, field 3 accepts numeric entries. The use of these fields is optional.
