

## Purchase order preferences

There are two tabs of purchase order preferences in the **File > Preferences...** menu item.

### Purchase Order Defaults tab

The screenshot shows the 'Preferences' dialog box with the 'Purchase order default' tab selected. The left sidebar lists various preference categories, and the main area contains several text input fields and a notes area. The fields are filled with the following text:

- Heading 1: MINISTRY OF HEALTH & MEDICAL SERVICES
- Heading 2: Department of Pharmacy, Republic of Singaland
- Heading 3: Phone: +691 72400 Fax: +691 72300 Email: fin\_mgr@gmail.com
- Notes: Checked (Director of Pharmacy):
- Reply Address: Director of Pharmacy, Ministry of Health & Medical Services, PO Box 320, Tulemakar, Republic of Singaland
- CC to:
- Delivery Address & Shipping marks: Director of Pharmacy, Ministry of Health & Medical Services, PO Box 320, Tulemakar, Republic of Singaland

At the bottom right, there are 'Cancel' and 'OK' buttons.

This window allows you to enter text that will be printed on Purchase Orders.

The easiest way to see how these fields will look on a Purchase Order is to fill in the fields and then print a sample Purchase Order. Note that we are willing to design custom Purchase Order forms to meet individual needs.

OK

**Print signature section on Purchase Orders**

When this box is checked a section will be printed on Purchase Orders that shows the authorising officer(s) and includes a space for signatures. This is applicable if you print Purchase Orders and post them to suppliers, but should most likely be turned off if you send Purchase Orders via email.

**Number of decimal places for price field:**

This field allows you to specify the number of decimal places that may be entered in the price field on Purchase Orders. This will override the currency format setting in the Misc tab only for the price field on Purchase Orders.

**Prefix printed Purchase Order number with**

Enter any required prefix in this field

**Default number of days usage to evaluate when creating an order**

Enter the number of days to “look back” when evaluating each item's usage to calculate the amount of stock needed. Entering a higher number will give a better long term average, but will mean that orders take longer to create.

**Purchase Order category must be chosen**

Check if you need a Purchase order category to be chosen on every purchase order.

When clicking the **OK** button on a purchase order you can override this setting by holding down the shift key as you click **OK**

**Expected delivery date must be chosen:**

Check if required, leave unchecked if not.

**Show purchase order custom field**

Check this box if you would like an extra field added that you can customise and use for your own purposes.

The space below this check box is for you to enter the name of your custom field.

**Purchase order contract date must be entered**

If you require this information on your purchase orders then check this box - this will force users to enter it when a purchase order is created.

**Purchase order advance payment date must be entered**

If you check this, the Advance paid field must be completed when a purchase order is created - a user will not be able to save a purchase order without entering it.

**Purchase order received at port date must be entered**

If you check this, the **Received at port** field must be completed when a purchase order is created - a user will not be able to save a purchase order without entering it.

**Procurement is done centrally**

This option is only relevant for a synchronised system (refer [Remote Synchronisation](#)). If you select this option, purchase orders for stores on sync satellites can only be prepared, confirmed and finalised on the sync primary. There is a work-around if you need some stores on some sync satellites

to do their own purchase orders. For help with setting that up, contact [support@msupply.org.nz](mailto:support@msupply.org.nz).

### Labels for custom fields on Purchase Order categories:

Fields 1 and 2 accept text entries, field 3 accepts numeric entries. The use of these fields is optional.
