# 6.05. Multi-store Purchase Orders

1/6

The multi-store purchase order will enable you to create a purchase order that includes lines for many stores at once.

## Limitations

- You can only create a multi-store purchase order in supervisor mode.
- You can only create a multi-store purchase order as a blank purchase order. You cannot create a calculated multi-store purchase order (yet;-)).
- You cannot use multi-store purchase orders to order from another store in the mSupply system.
- For a specific item, you cannot order different pack sizes for different stores. For any item, all stores must have receive the stock in the same pack size.

### Set up

To make a store available for multi-store purchasing, you will need to go into the store preferences and add a custom field labelled canBeIncludedInMultiStorePOs with its value set to true:

- 1. Log into any store
- 2. Special > Show stores...
- 3. Double click on the store name in the list
- 4. Go to the Custom fields tab
- 5. Add a new line that looks like this (be VERY careful to get the spelling of canBeIncludedInMultiStorePOs correct. It is case sensitive):

#### ×

### How it works

#### Permissions

To be able to create a multi-store purchase order the user must have permissions to:

- Log in to Supervisor All stores
- Create a purchase order in **Supervisor All stores** refer The permission tabs

#### Creating a new purchase order

To create a new multi-store purchase order

Last update: 2020/06/04 purchasing:purchasing\_from\_multiple\_store https://docs.msupply.org.nz/purchasing:purchasing\_from\_multiple\_store?rev=1591252424 06:33

- 1. login to Supervisor All stores
- 2. Choose Supplier > New blank Purchase Order.
- Enter in PO general details as usual. As with a normal purchase order, only one supplier can be chosen, but for multi-store purchase orders this supplier cannot be an mSupply store in your system.

When entering a new line, you will be presented with this window.

|                               |               |              |           |               |                         |          |                  |     |
|                               |               |              |           |               |                         |          |                  |     |
|                               |               |              |           |               |                         |          |                  |     |
| Totals                        | 0             |              | 0         | 0             |                         |          |                  |     |

- Select an item in the normal way.
- After choosing an item, a line will appear in the table for each of the stores that you have setup to be included in multi-store purchase orders, along with the default pack size for that item and the currently set requested delivery date.

| Totals                             | s 25              |             | 25          | 23750          |                         |        |                        |            |

- If you put a price per pack and a discount, the discounted price per pack will be calculated and applied to each line.
- For each store, you can specify the number of packs to order.
- The total quantity will be automatically calculated.
- You can change the requested delivery date and add an expected delivery date either manually or through the calendar icon on the column to the right.
- When you click OK, only the lines for which the number of packs is not 0 will be included in the purchase order.
- The other tabs are the same as normal purchase orders with two exceptions:
  - Usage tab When adding a line for a normal purchase order, the usage is calculated for the currently logged in store only. For multi-store purchasing there is now a dropdown list that lets you choose for which store you want the usage to be calculated.

• Ledger tab There is also a dropdown list in the ledger tabs, where you can select the store for which you want the ledger to be displayed.

#### Editing a new purchase order

To edit a multi-store purchase order line

- 1. login to Supervisor All stores
- 2. Open the purchase order
- 3. Double-click on the line you want to edit. All the lines pertaining to the same item will be loaded.

Here's an example of a multi-store purchase order opened in supervisor mode:

#### ×

If you double-click on the first line of the "Acryliser, Electric", all five stores' order lines for that item will be loaded.

| tem              |              |           | and an    |               |                         |          |                     |         |   |

- You can change the pack size, the price, the discount and the requested and expected delivery dates.
- If you put 0 as the number of packs for a line that had previously contained a quantity, this line will be deleted when the user clicks the OK or OK & Next button.

As with normal purchase orders, when a purchase order has been confirmed it is no longer possible to go back and edit the order lines.

#### Viewing multi-store POs when logged in to the receiving stores

When logged in to the receiving stores, multi-store purchase orders can be identified by an asterisk (\*) after the supplier name in the purchase order display list.

| Purchase order | list   |            |                 |          |       |           |              |       |          |       |         |
|----------------|--------|------------|-----------------|----------|-------|-----------|--------------|-------|----------|-------|---------|
| New PO         | Delete | Report     | Find            | Order by | Print | Customise | Duplicate    | Split |          | 16    | /5926   |
| Order no       | Status | Date       | S               | upplier  | Lock  |           | P0 reference |       | Target m | Lines | Confirm |
| 67109829       | cn     | 2018-09-04 | Badili AMS      |          |       |           |              |       | 0        | 2     | 2011    |

- A multi-store purchase order appears in the purchase order list of each store for which goods have been ordered.
- When viewed in a particular store, only the lines that belong to that store will be displayed see example:

Good receipting will function as normal (refer Goods receipts) but only the lines pertaining to the store you are currently logged in to will be available.

Previous: 6.04. Ordering from one store to another | | Next: 7. Receiving Goods
