*

Report Basics

Click Report , and this menu appears:

<note important="">For some reports, the default setting includes all items, and as most stores will</note>
have several hundred items - maybe over 1,000 - reports on all items will, if printed, use a great deal
of paper. If you must have a printout of your report, please exercise caution when selecting the
criteria, and so avoid wasting paper.

Reports on purchasing are displayed when *Purchasing* is selected:

Purchase orders
Purchases
Suggest order quantities

Reports on items and stock are displayed when *Items and Stock* is selected:

Custom report	
ATC Category analysis	
Transactions	
ABC analysis	
Management summary	
Quotation summary	
Purchasing	
Items and Stock	
Debtors and Creditors	14.14
Transport Report	
Prescriber report	
User transaction totals	
Backorder report	
Suggest price list additions	
Update price list	
Price list	
Location report	
Manage reports	

Reports on debtors and creditors are displayed when Debtors and Creditors is selected.

Many reports are available from the Reports page of the Navigator, as shown below:

Many of the reports present you with a window like this before printing the report:

Print option			_ X
Header			
	ABC analysis for date: 1	5/02/09 - 15/02/12 , Store none	•
Footer			
		page	•
Destination			
Printer	eview on screen before printing	default	•
Open in Excel			
Save as HTML file			
Save as Text file			
Report name : item_usage_rankir	ng	Cancel OK	

This window allows you to set various options:

Report destinations

Printer: Select this option to display.the print window. The preview of the report can be displayed by

turning on the print preview.

Open in Excel: If the `Open in Excel' box is checked, mSupply will immediately open the report as a spreadsheet in MS Excel, assuming MS Excel is installed on your computer; this feature also opens the report as a spreadsheet in Staroffice/Openoffice. [We've included special code to make sure they open using the "Calc" module of these applications.]

- When this box is checked, you will first be asked to save the report. Once you have given it a name, the report will be saved, and then automatically opened in spreadsheet form.
- The first time you use this option, mSupply may ask you for the location of your spreadsheet program, which is then stored for future reference.
- The location can also be set by choosing **File > Preferences** and clicking on the *This Computer* tab.

Save to HTML file: If this option is selected, your report will be saved with extension ".html". Hence, it can be opened by any web-browser or spreadsheet application on any platform or operating system.

Save as Text file: Your report will be saved to a file as a tab-delimited text file. (That is, a tab character between each column and a return character at the end of each row). After saving, you can open the file in a spreadsheet or word processing program.

Header and footer

You can choose what information will be displayed at the top and bottom of each page. The default report heading is set according to the report you are printing. By default, the date will print on the left and the page number on the top right of each page.

If you have filled in a default header and footer in the Preferences, these will be displayed at the top left (for the header) and the bottom centre (for the footer)

Preview on screen before printing

This option turns on print preview. Note that you can also turn on print preview from the print window that is displayed after you click the OK button.
