

12.01. Configuring the Supplier Hub

The Supplier Hub is an intermediary service for requesting, sending and receiving stock between separate mSupply instances.

Server Settings

To use the Supplier Hub, you first need to define the supplier hub URL - this is the URL to which the mSupply instances will be connecting. If you don't know what this should be, contact us at support@msupply.foundation.

This can be done through the Preferences window. Navigate to the 'Supplier Hub' tab and enter in the supplier hub url that you are using. Click OK to save these details.

Store Settings

To use the supplier hub, you must register at least one store on your own mSupply instance as a Supplier Hub site. Search for the store that you would like to register (either through Suppliers or Customers on the mSupply navigator). Click on the 'Supplier Hub' tab and enter in the details of your store and password - this will be given to you by Sustainable Solutions staff.

The screenshot shows a macOS-style window titled "Edit customer/supplier". On the left is a vertical sidebar menu with the following items: General, Invoices, Backorders, Quotes, Notes, Contacts, Group, Purchase Orders, Item List, Requisitions, Store Visibility, Photo, Custom data, Log, mSupply Link (highlighted in blue), and Tags. The main content area is titled "Test store" and "mSupply Link Registration". At the top right of the main area, it says "Store: Central Contraceptiv..." with a dropdown arrow and an information icon. Below this, there are two input fields: "Site Name" and "Password". A "Register" button is positioned below the "Password" field. At the bottom of the window, there are three buttons: "OK & Next", "Cancel", and "OK".

To interact with facilities on other mSupply instances, you must first have them set up as a customer or supplier on your instance, and then register them as a Supplier Hub site. This is done through the same window as above. Only the site name needs to be entered here. This must be the same site name as the one stored on the Supplier Hub (contact Sustainable Solutions if you are not sure).

The screenshot shows the same "Edit customer/supplier" window, but with the "Supplier Hub" option selected in the sidebar menu. The main content area is now titled "External Customer" and "Hub Registration". The "Store" dropdown at the top right is set to "General". The "Site Name" input field now contains the text "external_customer". The "Register" button is still present below the input field. The "OK & Next", "Cancel", and "OK" buttons remain at the bottom of the window.

Setting up Catalogs

If you are a supplier site, you can define which goods a supplier hub site can order from you via catalogs. All master lists and local lists that you assign to a customer will be added to their Supplier Hub Catalog for your site. They will only be able to order these items from your site.

Master and local lists can be added through the editing window for the customer.

External Customer

Store: General

Default Order Days: 0

Item lists attached to this name

Add master list Add local list Copy from master list Delete list

List name	Master list	Imprest	Stock Takes	Web	Price
Reproductive Health	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Items

Add item Delete Item(s) Save Sort order

Item code	Item name

Style: Sort by Group

Output to: ☒ Printer ☐ Excel

Ordering method: ☐ Imprest ☒ Stocktakes

OK & Next Cancel OK

On the customer side, this will show up as a new local list for the supplier called 'Supplier Hub Catalog'. This is created by the supplier hub and does not need to be edited.

External Supplier

Store: General
