

# Goods received

[Back to list of main tables](#)

Table name is trans\_line. Contains the lines that belong to transactions.

| Field name         | Description                                                                                    | mSupply use                                                                       | Report reference link                                                                                                                                             | Type         | Indexed |
|--------------------|------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|---------|
| ID                 | Unique system generated UUID for the Goods Received (record not normally visible to end users) | Not use in UI                                                                     |                                                                                                                                                                   | Alpha        |         |
| purchase_order_ID  | Reference ID of the purchase order linked to this Goods Received record                        | Not use in UI                                                                     |                                                                                                                                                                   | Alpha        |         |
| entry_date         | The date the Goods Received record was entered into the system.                                | goods received window»Entry date                                                  | <a href="https://docs.msupply.org.nz/receiving_goods:goods_receipts#goods_receipts">https://docs.msupply.org.nz/receiving_goods:goods_receipts#goods_receipts</a> | Date         |         |
| received_date      | The actual date the goods were physically received                                             | goods received window»Received date                                               |                                                                                                                                                                   | Date         |         |
| supplier_reference | Reference number or code provided by the supplier (e.g., delivery note or invoice reference)   | goods received window»supplier reference                                          |                                                                                                                                                                   | Alpha        |         |
| user_id_created    | ID of the user who created the Goods Received record                                           | ID are not used in UI. User name can be seen in goods received window>created by  |                                                                                                                                                                   | Alpha        |         |
| user_id_modified   | ID of the user who last modified the Goods Received record                                     | ID are not used in UI. User name can be seen in goods received window>modified by |                                                                                                                                                                   | Alpha        |         |
| status             | Current status of the Goods Received record (e.g., nw = new, fn = finalised)                   | goods received window»status                                                      |                                                                                                                                                                   | Alpha        |         |
| store_ID           | Identifier of the store where the goods were received                                          | ID are not used in UI. Store name can be seen in goods received window>Store      |                                                                                                                                                                   | Alpha        |         |
| budget_ID          | Identifier of the budget comes from purchase order                                             | ID are not used in UI                                                             | <a href="https://docs.msupply.org.nz/other_stuff:budgets#budgets">https://docs.msupply.org.nz/other_stuff:budgets#budgets</a>                                     | Alpha        |         |
| donor_id           | Identifier of the donor, used when goods are tracked by donor                                  | ID are not used in UI. Donor name can be seen in goods received window>Donor      |                                                                                                                                                                   | Alpha        |         |
| serial_number      | System-generated serial number for the Goods Received transaction                              | goods received window>Goods received:                                             |                                                                                                                                                                   | Long Integer |         |
| comment            | Additional notes or remarks entered by the user                                                | goods received window>Comment                                                     |                                                                                                                                                                   | Text         |         |
