Using benchmark prices

A benchmark price can be considered to be a standard price to which other prices can be compared once you are at the stage of evaluating quotations. mSupply provides the ability to set up benchmark prices to help you make such a comparison. This section describes how to set them up and how to use them.

> The International Medical Products Price Guide, published and maintained by MSH, is available on their website (http://mshpriceguide.org/en/home/) and is a good source of information on medical products from a range of international distributors.

Setting up

You need to create a dummy supplier, that is to say a `virtual' supplier, whose only purpose is to store benchmark prices.

From the menu, or the Navigator, choose **Supplier > New supplier**

supplier 🗶	teres and the second	-	
General			
	Name		Contact
	Code		eı
	G Charge to		web
	🖬 Name	Pho	
	Master ID 0		
	Category	Status	
	Customer 📃		
	Supplier 🗸	Preferred	
	Manufacturei	Price Categor	y]
	Address		

mSupply® requires that the Code, Charge to and Name fields are completed, so you should choose appropriate entries. In the Category section, the checkbox *Supplier* should already be checked, and you must check the *Benchmark* checkbox.

You may set up more than one benchmark `Supplier'

Entering benchmark prices

Once you have the required benchmark prices, they should be entered into mSupply, and here's how to do it:

Open the Edit supplier window for the Benchmark supplier and click on the Quotes tab

約 Edit	Custome	r/Supplier		
Benchma	rk			
General	Invoices	Backorders	Quotes	Notes
(+	(*	
New	Quote	Delel	te Quote	
	lte	em		Date

Click on the *New Quote* button to enter the benchmark figure for each item - in our example we're entering the details for Albendazole 400mg tablets:

tedit Quote lines		×
General Date Item Supplier Manufacturer	International Drug Price Indicator Gui IDPIG	Price break Price break quantity 0 Discount 0 Price break notes
Price Pack Freight factor Net cost Strip pack Preferred	1 Rate 1.0116 0.04 Rate to use 1.01 Supplier item code	Freight Preferred pack 0 Freight for preferred pack 0 Freight notes
Comment	•	Cancel OK

Points to note:

- If the figure you have is for a single tablet, we suggest you multiply it by 100 and change the pack size to 100 to avoid working with very small figures.
- Make sure that the currency used for the entry is correct, remembering that it might be different from your default currency.
- Make sure that your pack size matches the pack size of the benchmark figure.

Once a number of entries have been made, the window may appear like this:

You will note the difference for each item in the Price column and the Cost column; the explanation is that the default currency in this example is AUD (Australian dollars), while the benchmark figures are in US dollars; the Cost (and Adjusted cost) columns show the figures converted by mSupply to their AUD equivalents.

Using the benchmark figures when evaluating submitted quotations from suppliers is discussed here
