

18.10. Supplier instructions for submitting tenders via Excel

As a supplier, you may be invited to participate in a tender managed using mSupply. The client may send you a tender template Excel document in xlsx format, which you are expected to complete and submit for evaluation.

You must use Microsoft Excel to view and edit the tender template. Microsoft Excel 2016 or newer has been tested to work with the tender template xlsx file. Theoretically Microsoft Excel 2007 should be fine, but this has not been tested.

The tender template will look something like this. You can also download a reference template from [here](#):

supplier_tender_reference_template.xlsx

The **yellow** section contains the item that you may bid for. **Do not modify any contents of the yellow section.**

The **blue** section is where you can enter the price for the items you wish to bid on.

The currency and the manufacturer column should appear as a dropdown list. [View currency pop down list](#) If this doesn't work, please make sure you are using Microsoft Excel and that the version supports xlsx file format. Contact the client if you suspect that the xlsx file is wrong.

Do not change the cell format. If the cell is set to text or number, then it must be left as it is. Changing the cell to a different format will cause issues later with information potentially being lost.

The Excel file has the header row frozen, allowing you to scroll down the list and enter data while still being able to view the corresponding header.

The three worksheets

The Excel template contains three worksheets. **Do not modify the name of the worksheets.**

- **TenderItems:** Main worksheet containing the tender items.
- **ManufacturerList:** Contains the manufacturers that populate the [manufacturer dropdown list](#) in the main worksheet. Do not add to the list of manufacturers manually as this list needs to come from your client.
- **CurrencyList:** Contains the available currencies that populate the [currency dropdown list](#) in the main worksheet. Do not add to the list of currencies manually as this list needs to come from your client.
