19.06. Mobile Dashboard set up (after v4.0)

August 2020:

- The instructions on this page are for configuring both
 - mSupply's legacy web dashboard. This is now superseded by the mSupply Grafana web dashboard
 - mSupply Mobile dashboards. The instruction on this page are still the only way to configure them for mSupply versions 4.0 and later

The following instruction are for setting up dashboards for mSupply versions 4.0 and later. For mSupply versions earlier than v4.0, the dashboard setup is accessed and configured via the mSupply Preferences menu, refer to Dashboard set up (prior to mSupply v4.0).

Before you set the dashboard up you must:

- know what ports are already in use on the server
- have an appropriate SSL Certificate set up.
- make sure your webserver is currently running.

Sustainable Solutions can help with these.

Configure the dashboards

1. On the Admin tab of the Navigator click on the Dashboard button:

2. This will show you a list of the available dashboard reports:

earch		Dashboard		
earch Report				Duplicate
	Dashboard Reports	Dashboard Tab	Export Settings	
Report name	Is active	Update period (mins)		Last updated time
Transactions per store	I O I	1440		30/08/2018 17:03:51
Expiring stock		1440		02/10/2019 13:14:55
Top Facilities Supplied		1440		02/10/2019 13:15:26
Total stock value		1440		30/08/2018 17:05:22
% VEN items in stock	Ö	1440		30/08/2018 17:05:52
% Vital medicines in stock		1440		30/08/2018 17:06:26
This month transactions		1440		02/10/2019 13:15:56
Map stock on hand		1440		02/10/2019 13:16:26
Sync sites last connection date		1440		29/01/2017 17:37:36
Sync sites sent and received statistics		1440		29/01/2017 17:37:36
Stock_for_category1_stores_by_item_list	- O	60		12/06/2018 18:13:16
This month transactions [copy]	I O I	1440		31/08/2018 08:53:53
Sync Site Statistics	Ö	1440		21/02/2019 14:34:23
13				
				Cancel OK

3. Tick the box in the **Is active** column for each report that you want generated. Note that if one or more reports are selected, the scheduled process for generating and refreshing the

dashboard reports is automatically started, there is no separate setting for turning it on and off. Similarly, if no reports are selected the dashboard report generating process will be turned off automatically.

4. Set the number of minutes in the **Update Period (mins)** column to set how often each of these reports is generated. 1440 is one full day.

The *Dashboard Tab* tab is for setting up Dashboard tabs (see the <u>Dashboard tabs</u> section below) and the Export settings tab is for telling mSupply when and how to update the data behind the dashboard (see the <u>Exporting msupply data to the dashboard tab</u> section below).

Available dashboard reports

There are several built-in dashboard reports that everyone can use. The table below documents what they show and what properties can be edited:

If you would like help with adding one of these reports to your list, contact Sustainable Solutions on support@msupply.org.nz

Report	Method	Format		Parameters
			ven_category	v or e or n if you want to include items that are Vital or Essential or Necessary
		Bar chart		TRUE if you want to include items with this field checked
Vital items in stock Shows a bar graph of the percentage of medicines of the chosen category in stock at each	dashboard_store_stock_percent		user_field_7	TRUE if you want to include items with this field checked Note that the labels for fields 4 and 7 may be different, as they are set up in the mSupply preferences (misc tab)
facility			critical_stock	TRUE if you want to include items with this field checked, false for all items
			I I	entering healthcentre will only include stores with the "healthcentre" tag
Report	Method	Format		Parameters
			store_code	search for a single store matching this code
			lookBack_mon	how many months of data to review when calculating; defaults to 6
Item Stock on Hand and Months Cover Shows a table of item VEN status, Stock on Hand, Monthly Consumption, and Months Cover		Table	ven_category	V,E,N or E, N or V, Netc will filter the VEN items. If blank all visible items for the store are chosen. If not supplied the filter is not used; specify 'blank' to show items with empty ven. Note: each category in combination must be separated by comma, example: either v,e,n or v,e or v,n
			item_code	Searches for items matching this code
			customisation	Allows for a client customisation: currently supports MAM.

If you can't make a dashboard report that does what you want then please speak to us, it's usually a fairly simple matter for us to create one for you.

Editing dashboard reports

Double-click a report in the list shown above and the following window will open:

) () Da	ashboard repo	ort para	meters	
Map stock on hand				
Parameters	Method Code	Json	Notification Rules	
	memore court	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		
-				
New line D	elete line(s)			
New line D	elete inie(s)			
Property		V	alue	
item_code	030453			
country	Demo Land			
lat_nw_corner	81.186379			
long_nw_corner	-61.126562			
lat_se_corner	67.705518			
long_se_corner	-33.001562			
		Ca	ncel	ОК
				- On

- If there are any properties shown in the list, these can be edited to change what is displayed.
- To edit a property or value, click once to select the row, and then click again in the appropriate cell to edit it.
- To add or delete a row use the **New line** and **Delete line(s)** buttons at the top of the window.
- In the example shown in the screenshot above (a map report), the coordinates of two of the map corners and the item code of the item whose stocks will be shown on the map have been entered. Note that if you add extra properties to the default reports they'll be ignored.

August 2020: The remaining instructions on this page are for configuring mSupply's legacy web dashboard. This may still work, but is no longer supported as it has been superseded by the mSupply Grafana web dashboard. The instructions are left here for historic reference only.

Dashboard tabs

You set up Dashboard tabs which will display on your dashboard. Dashboard tabs are "containers" for one or more dashboard reports. To edit them click on the *Dashboard Tabs* tab of the File > Preferences > Dashboard window shown above:

0			Dashboard	
		Dashboard Reports	Dashboard Tab Export Settings	
New line	Delete line			Duplicate
	Internal name			Tab name
mSupply Mobile Cli	inics		mSupply Mobile Clinics	
Stock			Stock Summary	
Transactions			Transaction Summary	
				Cancel OK

To add a tab click the **Add** button. To edit a tab, double-click it. You will be shown a window for editing a dashboard tab:

				New	Dashboa	rd '	Tab		
Internal	nam	e Managem	ent1			Т	ab name Stock		
New line		Delete lin	ie(s)						
Row		Colum		Report Title	Type		Width	Report	
Row 1		Column 1		Vital medicines in stock			6 :	Vital medicines in stock	•
Row 1		Column 2		Expiring items	line_chart		6:		
								Cancel	ОК

Now you add reports that will show on this tab.

Understanding rows and columns

Take this example dashboard tab:

- The tabs themselves occupy their own space on the left of the window- they aren't considered when laying out the dashboard
- The first row has two reports- each report takes up half the row. So for the first report:
 - Row 1, Col 1, width 12 ("12" means it takes up the full width of the cell it is in- "4" would mean it would take up 1/3 of the width)
- For the report at the top right:
 - Row 1, Col 2, width 12
- For the map
 - Row 2, Col 1, width 12
- The next two reports are on the same row, but are divided into 5/12 and 7/12 of the width of the window, so we put them in the same cell but change the width settings:
 - $\circ\,$ Row 3, Col 1, width 5
 - $\circ\,$ Row 3, Col 1, width 7

Adding a report to a dashboard tab

Click **New Line** to add a new report to the tab. Then edit the values in each column

- Row: The row it will be in
- **Column:** The column within the row- set to "1" if you don't have multiple reports on this row.
- **Report tite:** The title that will show in the Orange heading bar for the report. Note that the same report can display different information depending on the parameters you set for that report- hence the need for the ability to customise report names
- **Type:** You'll need to know the appropriate type for the report you're displaying. The options are • bar chart
 - ∘ table
 - pie chart
 - time_series
 - ∘ map
 - ∘ line_chart
- Width: The fraction of the cell width in "twelfths" that this report will take up ("6" will make it take up half the cell width)
- Report: Choose the report name from the drop-down list of available reports

Configure users to have access to dashboards

Once the tabs have been setup you have to choose which users will see which tabs. You do this in individual users' settings. For instructions on how to do this, see:

- Managing users > General tab > Users can: (Use the Dashboard permission)
- Managing users > Dashboard tab
