

18.05. Dashboard

Once the dashboards have been set up (refer [Dashboard set up \(before v4.0\)](#) or [Dashboard set up \(after v4.0\)](#)), it can be used to monitor and access reports from anywhere using an internet browser (such as Chrome, Safari or Firefox).

The address for the dashboard is the public IP address of the server (or its web address if one has been assigned) on the port setup in the web server preferences (see the [server preferences](#) section for details) with /dashboard added. For example, if port 3000 is specified in the server preferences and the server is at web address example.com, users would browse to `https://example.com:3000/dashboard` using their internet browser.

This means users can access dashboard reports using their computer at home or even their tablet or cell phone!

Using the dashboard

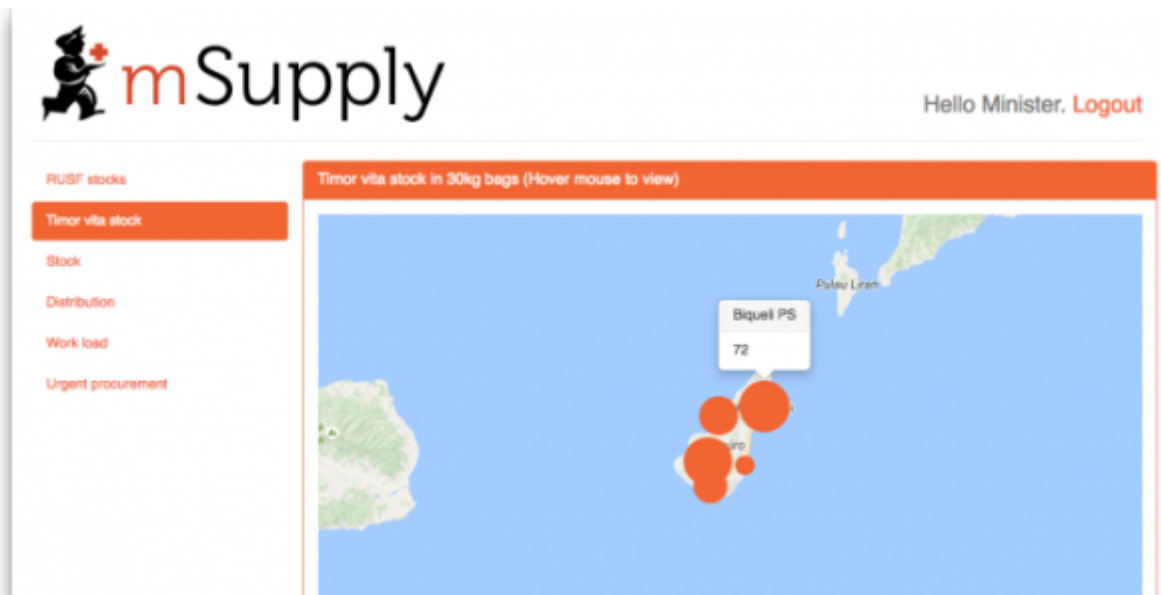

Login

You'll need to be given the right URL ("web site") to go to in your browser. Type it into the address bar of the browser you want to use (on the device of your choice) and click on the *Go* button or tap the *Enter* key. You will be shown the login page:

A screenshot of the mSupply login page. At the top left is the mSupply logo, which consists of a black silhouette of a person carrying a red cross on their back, followed by the text 'mSupply' in a sans-serif font. Below the logo are two input fields: 'Username' with the text 'Minister' and 'Password' with a series of dots. To the right of each field is a small icon of a document with a lock. Below the password field is a checked checkbox labeled 'Remember me'. At the bottom is a 'Log in' button.

Enter your normal mSupply login username and password and click on the *Log in* button.

You will be taken to your dashboard which will show the first "page" or tab set up for you by default. You can click on other tabs at the left of the screen (if they have been set up for you) to see other reports:

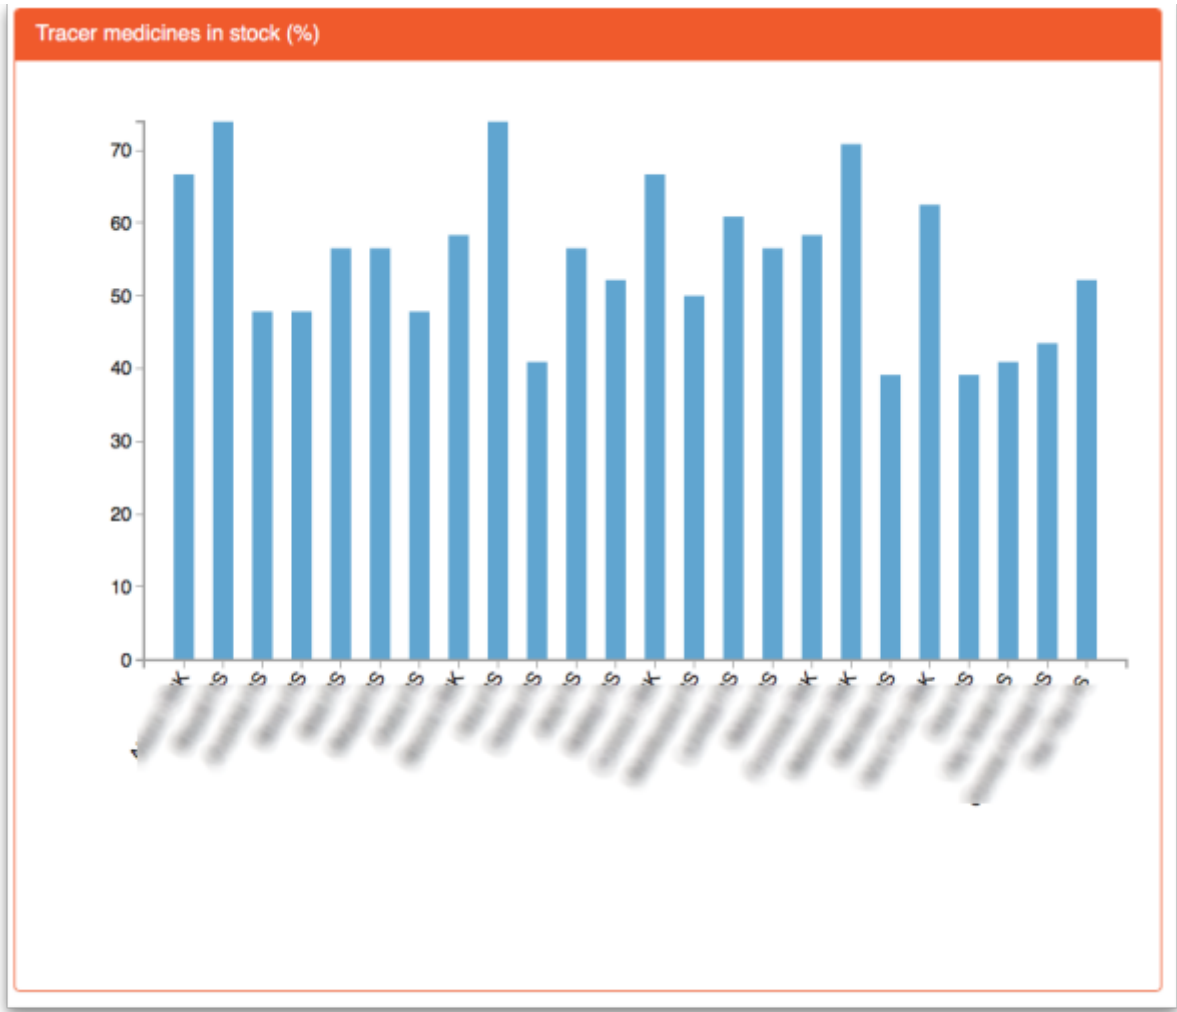

The dashboard works just as well on a tablet or your phone, but the different “pages” will be at the top of your screen, not on the left.

There are several very useful reports on the dashboard, helping you to keep up to date with current stock levels and much, much more. And, if one of the standard reports doesn't give you what you want then it's fairly simple to create a new one from scratch or by duplicating and editing an existing one (see [Setting up dashboards](#)). Below are just a few examples of the kinds of reports the dashboard can show for you:

Nutritional supplements and medicines at : Timor-Leste	
Item	Stock
Albendazole scored 400mg tabs	352661
Ferrous Sulphate 200mg (60mg Iron) tabs	5000
